CONTENTS

| | | |
|------------------|---|----|
| <i>Part I.</i> | INTRODUCTION | 9 |
| <i>Part II.</i> | BUDGET FINANCING AND THE MONEY SUPPLY PROCESS | 13 |
| | A. The monetary implications of alternative sources of finance | 13 |
| | <i>a)</i> Central bank finance | 15 |
| | <i>b)</i> Commercial bank finance | 15 |
| | <i>c)</i> Non-bank private sector finance | 16 |
| | <i>d)</i> Foreign finance | 16 |
| | B. The importance of institutional arrangements for monetary policy | 16 |
| | <i>a)</i> Type I systems of monetary control | 17 |
| | <i>b)</i> Type II systems of monetary control | 18 |
| | <i>c)</i> Comparative properties of the two systems with regard to budget financing | 18 |
| | C. The implications of a fixed or managed exchange rate | 21 |
| | <i>a)</i> The response to a higher budget deficit | 21 |
| | <i>b)</i> The special case of the United States | 22 |
| | D. Cross-country comparisons and econometric simulations | 23 |
| | <i>a)</i> Simulation of an increment to the PSBR | 25 |
| | <i>b)</i> An increased PSBR with an alternative monetary policy | 27 |
| <i>Part III.</i> | BUDGET FINANCING AND THE "CROWDING OUT" ISSUE | 31 |
| | A. Money balances as a source of finance | 33 |
| | <i>a)</i> Money-bond substitution effects | 33 |
| | <i>b)</i> Possible wealth effects | 36 |
| | B. The foreign sector as a source of finance | 38 |
| | C. The influence of expected inflation | 39 |
| | D. Some medium-term aspects of large non-accommodated budget deficits | 40 |
| | E. A quantitative assessment of the effectiveness of fiscal policy under alternative budget financing assumptions | 41 |
| | <i>a)</i> Government expenditure multipliers from large econometric models | 41 |
| | <i>b)</i> Government expenditure multipliers from a small macro-model | 44 |
| <i>Part IV.</i> | EXPERIENCE WITH BUDGET FINANCING IN SELECTED OECD COUNTRIES | 47 |
| | A. Countries with Type I systems of monetary control | 48 |
| | United States | 48 |
| | Germany | 54 |
| | Canada | 59 |

| | | |
|----------------|--|-----|
| B. | Countries with Type II systems of monetary control | 65 |
| | Japan | 65 |
| | France | 71 |
| | United Kingdom | 76 |
| | Italy | 82 |
| C. | The case of smaller economies | 87 |
| | Australia | 87 |
| | Belgium | 93 |
| | Denmark | 98 |
| <i>Part V.</i> | CONCLUDING REMARKS | 105 |

ANNEXES

| | | |
|------|---|-----|
| I. | Technical background for the monetary simulations | 109 |
| II. | Identification of "crowding out" associated with budget financing | 117 |
| III. | References | 123 |

TABLES

Main Text

| | | |
|----|--|----|
| 1. | Public sector borrowing requirements | 10 |
| 2. | Sectoral financial accounts | 14 |
| 3. | Bank credit to the Government and change in the broad money supply | 24 |
| 4. | The demand for money in Seven Major OECD Countries | 34 |
| 5. | Credit rationing by price and non-price methods in Seven Major OECD Countries | 35 |
| 6. | Cumulative nominal Government expenditure multipliers under alternative monetary policy assumptions, from large econometric models | 42 |
| 7. | Cumulative real Government expenditure multipliers under alternative monetary policy assumptions, from large econometric models | 43 |
| 8. | Government expenditure multipliers under alternative monetary policy assumptions, from a small macro-model | 45 |

Annexes

| | | |
|----|---|-----|
| A. | Structure of financial sector models | 110 |
| B. | Financial sector model variables | 111 |
| C. | FIML estimates of parameters and fit statistics | 112 |
| D. | Root mean square error statistics for dynamic control solutions | 114 |
| E. | Simulations for the United Kingdom | 114 |
| F. | Simulations for Germany | 115 |
| G. | Structure of the small macro-model and variables | 118 |
| H. | Analytical multiplier solutions for the small macro-model | 119 |
| I. | Parameter values for the small macro-model | 120 |

CHARTS

Main Text

| | | |
|----|---|----|
| 1. | Budget financing simulations for the United Kingdom | 26 |
| 2. | Budget financing simulations for Germany | 28 |
| 3. | United States | |
| | A. Main determinants of the relationship between monetary base and money supply | 50 |
| | B. Interest rate trends | 51 |
| | C. Financial flows by source and recipient | 53 |

| | | |
|-----|---|-----|
| 4. | Germany | |
| | A. Main determinants of the relationship between monetary base and money supply | 56 |
| | B. Interest rate trends | 57 |
| | C. Financial flows by source and recipient | 58 |
| 5. | Canada | |
| | A. Main determinants of the relationship between monetary base and money supply | 61 |
| | B. Interest rate trends | 62 |
| | C. Financial flows by source and recipient | 64 |
| 6. | Japan | |
| | A. Main determinants of monetary growth | 67 |
| | B. Interest rate trends | 68 |
| | C. Financial flows by source and recipient | 69 |
| 7. | France | |
| | A. Main determinants of monetary growth | 72 |
| | B. Interest rate trends | 73 |
| | C. Financial flows by source and recipient | 75 |
| 8. | United Kingdom | |
| | A. Main determinants of monetary growth | 77 |
| | B. Interest rate trends | 79 |
| | C. Financial flows by source and recipient | 81 |
| 9. | Italy | |
| | A. Main determinants of monetary growth | 83 |
| | B. Interest rate trends | 85 |
| | C. Financial flows by source and recipient | 86 |
| 10. | Australia | |
| | A. Main determinants of monetary growth | 89 |
| | B. Interest rate trends | 90 |
| | C. Financial flows by source and recipient | 92 |
| 11. | Belgium | |
| | A. Main determinants of monetary growth | 95 |
| | B. Interest rate trends | 96 |
| | C. Financial flows by source and recipient | 97 |
| 12. | Denmark | |
| | A. Main determinants of monetary growth | 99 |
| | B. Interest rate trends | 101 |
| | C. Financial flows by source and recipient | 102 |
