Contents

PART ONE

COST ACCOUNTING BACKGROUND AND CONCEPTS

1. **Historical development, uses, and challenges of cost accounting,**
James C. Stallman and T. Alan Russell 3
Highlights in the historical development of cost accounting: *Early industrial bookkeeping. The modernization of cost accounting (1880–1920). Further developments (1920–1940). Continuing influences.* Uses of cost accounting: *Product or service costing (income determination). Product pricing. Coordination of operations. Performance evaluation. Decision making. The role of cost accounting.* The challenges of cost accounting.
2. **Concepts of cost, Roger A. Roemmich and Donald W. Baker** . . . 42
Cost: A conceptual view: *A natural viewpoint. Relationship to accounting periods. Relationship to products. Behavior of costs. Departmental relationships. Costs for analytical uses. Costs for planning and control.* Concepts of cost measurement and flow: *Inclusiveness of the cost definition. Measuring the acquisition cost of an asset. Assignment of costs to plant and equipment. Cost of self-constructed assets. Cost of leased plant and equipment. Measuring the cost of inventory. Periodic versus perpetual inventory procedure. Specific identification. Cost flow assumptions. First-in, first-out, or Fifo. Last-in, first-out, or Lifo. Average costing. Allocation of indirect costs.* Alternatives to historical cost: *Replacement cost. Price-level adjustments of cost.*
3. **Cost components and cost behavior,**
Charles L. McDonald and Arthur L. Shealy, Jr. 67
Cost components: *Direct materials. Direct labor. Factory overhead. Relevant terminology.* Cost behavior: *Variable costs. Fixed costs. Semivariable costs. Semifixed (step) costs. Distinction between physical behavior of costs and cost behavior caused by management policy.* Cost-volume-profit analysis: *The C-V-P graph (break-even chart). Use of equations for C-V-P analysis. Contribution margin. The effect of changes in costs. Profit-volume graph. Assumptions of cost-volume-profit analysis.*

PART TWO

MANAGERIAL USES OF COST ACCOUNTING INFORMATION

4. **Budgeting, Edward B. Deakin, III and Edgar N. Howard. 91**
 Organizational context of budgeting. Human factors in budgeting. The budget period. Components of the tactical budget. Budget preparation procedures. Sales forecast: *Ad hoc estimates. Trend analysis. Econometric techniques.* Choosing the sales forecast. The production budget: *Budgeted income statement. Budgeted cost of goods manufactured and sold. Budgeting direct labor costs. Budgeted overhead cost estimation. Computing the budgeted cost of goods sold. Determining budgeted selling, general, and administrative expenses.* The budgeted income statement. The budgeted statement of financial position. The cash budget.

5. **Cost as a means of controlling operations, Leslie R. Loschen, Clarence J. Baudhuin, and William H. Wieland 121**
 Management philosophy of control. Controllability of costs: *Level of responsibility. Time span.* Control techniques. Control techniques—manufacturing: *Direct labor and materials. Factory overhead.* Control techniques—services: *Uniform services. Diversified services.* Control techniques—projects. Performance reports: *Level of management. Nature of the costs. Budgeting philosophy.* Cost accounting methods.

6. **Costs in relation to pricing products and services, Charles Purdy, Robert K. Zimmer, and James H. Grenell 142**
 Introduction. Revenue behavior—price-volume relationship (demand function): *The theory of demand. The pragmatics of demand.* Cost behavior—cost-volume relationship (supply function): *The theory of supply. The pragmatics of supply.* Product definition: *Joint demand. Joint costs.* Cost analysis to determine the minimum price: *Relevant costs. Future production costs. The demand function and variable costing. The legal minimum price.* Formula pricing: *Cost-plus pricing. Rate of return pricing.*

7. **Costs in labor negotiations, John R. Palmer 178**
 Current accounting participation in labor negotiations. Data availability versus data needs at the bargaining table. Management negotiator's command of accounting data. Factors influencing the use of accounting data in the negotiations process. The accountant's ideal role in the labor negotiations process. Use of and access to corporate accounting information by labor unions. Quantitative research by labor unions. Management disclosure of accounting data to union bargainers. Timing of management data disclosure. Effects of broad data disclosure on negotiations: *The union / management relationship vis-à-vis union access to management accounting data.* Types of information systems for various types of labor

negotiations: 1. *National collective bargaining.* 2. *Association collective bargaining.* 3. *Local unit collective bargaining.*

8. **Costs for managerial purposes versus financial and income tax purposes,** *Joseph G. Louderback and Richard P. Webb* 194
 Differing objectives and environments of reporting: *Financial accounting. Tax accounting. Managerial accounting.* Costs for financial-tax purposes: *Determination of periodic income. Expense recognition. Expense classification. Manufacturing costs. Relevance of financial-tax information for managerial use.* Costs for managerial uses: *Planning. Decision making. Evaluations of segment profitability. Effect of financial accounting methods on decisions. Control and performance evaluation. Responsibility accounting. Imputed costs. Balance sheets.* Recent developments: *Forecasts. Segment reporting. Replacement costs.*

PART THREE
ORGANIZATIONAL ASPECTS OF COST ACCOUNTING

9. **Responsibility accounting: Profit centers and cost centers,** *Terence E. McClary.* 233
 Responsibility accounting concept: *Responsibility accounting and the organization structure. Integration with other financial systems.* Profit center responsibility accounting. Cost center responsibility accounting: *Reporting system. Accumulation system. Other considerations.* Reporting integration. Roles of operating and financial executives: *Operating executive. Financial executive.*
10. **Cost accounting and organizational behavior,** *John Grant Rhode and Fulton M. Smith, Jr.* 257
 Introduction. The role of information and control systems in organizations: *Information systems and organizational effectiveness. Need for information and control systems. Characteristics of control systems.* Dysfunctional effects of cost accounting systems: *Rigid bureaucratic behavior. Strategic behavior. Invalid data reporting. Resistance.* Causes of dysfunctional behavior: *Characteristics of sensor measures. Nature of standards. Source of discrimination. Recipients of communication and source of motivation. Speed and frequency of communication. Type of activity. Conclusion.*
11. **Cost accounting and the management information system,** *Harold M. Sollenberger and Dave Parks* 295
 Introduction. The evolution of management information systems: *Transaction-oriented systems. The current environment — Why and where to from here?* Structure of management information systems: *Integrated management reporting. Integrated data collection. Integrated systems.* Developing the MIS: *The essential ingredient: LRSP. The LRSP in detail.*

Develop the long-range plan. Installing the MIS. The role of the controller in executing the MIS plan: MIS planning and control "truths." Ongoing controller involvement in MIS.

12. **Measuring and using return on investment information,**
Frank R. Rayburn and Michael M. Brown 321
 Introduction. Measurement of return on investment: *Du Pont formula*. Earnings: *Revenue. Depreciation. Inventory valuation*. Investment: *Definition of investment base. Centrally controlled or shared items. Measurement of the investment base*. Application of return on investment: *Performance evaluation. Capital investment decisions*.
13. **Transfer pricing, Richard G. Schroeder and Calvin A. Vobroucek 346**
 Profit centers. Objectives of transfer pricing systems. Elements of an effective transfer pricing system. Calculating the transfer price for tangible products: *Market-based prices. Cost-based transfers. Dictated prices. Negotiated prices*. An example of alternative transfer pricing techniques. Transfer pricing for intangible items. External constraints on transfer pricing. Journalizing transfer prices. Other uses of transfer pricing.

PART FOUR

COMMON ELEMENTS OF COST AND MANAGERIAL ACCOUNTING METHODOLOGY

14. **Accounting for production materials, Kenneth A. Strathdee . . . 365**
 Production material cost planning: *The ABC technique. The cost planning process. Cost bill of material*. Purchased materials price accounting. Freight cost accounting. Materials receipt accounting. Materials usage accounting. Salvage, rework, and discards accounting. Surplus, excess, and obsolete materials accounting.
15. **Accounting for production labor, Adolf T. Silverstein 397**
 Definition of production labor. Measuring and reporting efficiency. Problems in setting labor standards. Problems in measuring actual labor costs: *Cost factors. Physical inventory*.
16. **Accounting for production overhead,**
Louis F. Biagioni and Richard A. Warne. 409
 Basic cost concepts. Definition of manufacturing overhead. Manufacturing cost accounting cycle. Objectives of manufacturing overhead. Predetermined manufacturing overhead rates. Journal entry treatment. Variability of manufacturing overhead costs. Inverse relationship of unit and total cost behavior. Four categories of manufacturing costs. Process versus job order costing. Departmental overhead rates. Service department cost allocations. Determination of manufacturing overhead rates: *What base should be used? What are some measurement techniques? What activity*

level (denominator) should be used? Fixed manufacturing overhead variances: *Volume variance. Spending variance.* Variable manufacturing overhead variances: *An illustration of variances.* Direct costing. The Cost Accounting Standards Board (CASB). The Internal Revenue Service (IRS).

- 17. **Accounting for work-in-process and finished goods inventories,**
Donald L. Thiry 447
 Introduction. General inventory valuation considerations: *Inventory costing alternatives. Accounting for all inventory movement. Variance recognition. Stock status valuation. Timing of reporting.* Work-in-process inventory accounting: *Work-in-process cost flow example. Accounting for inventories in a job cost collection systems environment. Valuation of work-in-process in a process cost collection environment. Valuation of inventories in a hybrid cost collection system. Accounting for items awaiting rework. Inventory at outside processors. Inventory at separate plant locations.* Finished goods inventory: *Current and accounting transfer standards. The lower of cost or market. Valuation of joint products. Valuation of by-products.*

- 18. **Flexible budgeting, Michael W. Maher and David C. Yates . . . 477**
 The concept of flexible budgeting. Difficulties in applying the concept of flexible budgeting. Technical issues in flexible budgeting: *Activity levels: Causes of cost fluctuations. Which costs fluctuate with activity? Time lags. Functional relations between costs and activity levels. Summary.* Behavioral issues in flexible budgeting: *Understandable. Acceptance. Information. Participation. Rewards. Controllable. Summary.* Performance reporting with flexible budgeting.

- 19. **Structure and content of cost reports,**
James M. Fremgen and Martin V. Alonzo. 502
 Product costing reports: *Statement of cost and goods manufactured and sold. Cost classifications. Unit cost data. Job order cost reports. Process cost reports.* Control reports: *Identification of the responsibility center. Controllable and uncontrollable costs. Criteria for comparison of actual costs. Variances in the report.* Special reports for decision making: *Report format. Inclusion of underlying computations.*

PART FIVE
COST ACCOUNTING AND CONTROL SYSTEMS FOR
MANUFACTURERS

- 20. **Historical cost systems: Job order and process, Larry H. Beard and Leslie G. Schek 527**
 Benefits of cost accounting systems. Job order versus process cost systems. Overhead applied is an estimate. Job order systems: *Cost flows in job order systems.* Process cost systems: *Process costing and physical units.*

Illustration of unit cost computations: *Fifo EPU's. Weighted-average EPU's. Computing total costs for a process cost center. Fifo process costing. Weighted-average process costing. Reconciling actual and estimated overhead.*

21. **Year-end “physical to book” discrepancies: Accountability for losses and waste, Thomas S. Dudick. 552**
 Year-end physical inventory to book discrepancies: *Why is proper inventory valuation so important? How does it happen? Variations in cost flow. Job costing. Standard costing in a process flow. What is the solution? Importance of cycle counts. Categorizing the inventory. Cycle counting schedule. Overview of cycle counting requirements. Accounting for floor work-in-process. Accountability of losses and waste: Control of material losses. Selective control technique for material control. Inventory discrepancies not always due to unreported losses and waste.*
22. **Accounting for joint and by-product costs, J. O. Edwards. 572**
 Cost collection. Allocating costs to joint products: *Relative sales value method. Physical basis method. Replacement method.* Use of joint costs. Allocating costs to by-products.
23. **Setting standards and reporting standard costs, Stephen Landekich 588**
Principal notions and terms. Applicability of standards and standard costs. Design and implementation. Setting standards. Methods of obtaining data. Data sources. Setting production standards: Levels of performance. Standards for materials. Standards for labor. Revision of standards. Standards for manufacturing overhead. Reporting standard costs: Performance reporting. Inventory reporting. Reporting for budgeting and pricing.
24. **Analyzing variances from standard, Henry D. Powell and Elba F. Baskin 618**
 Responsibility centers. Traditional two-factor variance model: *Standard cost sheet. Variance calculations for materials. Variance calculations for direct labor. Variance calculations for factory overhead. Summary of two-factor variance analysis.* Calculations of mix and yield variances. The variance assessment process: *Variables affecting the assessment process: An example. The investigation decision: A formal approach. Surrogates of the formal model.*
25. **Direct and incremental costing, D. Jacque Grinnell and Donald J. Wait 645**
 Direct costing: *Comparing direct and absorption costing results. Direct costing as a planning and decision-making tool. Direct costing as a control tool. Implementing direct costing. Should direct costing be employed?*

Incremental costing: *Types of decision problems. The incremental approach. Other considerations.*

PART SIX COST AND MANAGERIAL ACCOUNTING FOR OTHER ECONOMIC ENTITIES

26. **Cost accounting for construction contracts, S. R. Okes, Jr. and G. H. Beisman 673**
Introduction. Resources of cost control. Cost centers. Budgets. General accounting procedures: *General ledger. Subsidiary ledger. Cash journal. Journal entry form. Payroll journal entry form. Cost ledgers. Bank accounts and check writing. Detailed cost reports.* Input required for cost accounting. Employment and payroll procedures. Purchasing procedure. Warehousing procedure. Subcontract procedure. Equipment cost accounting. Overhead. Computer cost accounting.
27. **Cost accounting for land and real estate development, James J. Klink and William Stoddart. 717**
Recent events in the real estate industry. Introduction to cost accounting: *Industry characteristics. Pervasive measurement principles. Modifying convention — conservatism. Recent developments.* Capitalization of costs: *Preacquisition costs. Land acquisition costs. Land improvement, development, and construction costs. Interest costs. Other carrying costs. Overhead costs. General and administrative expenses. Amenities. Selling and rental costs. Selling costs. Rental costs. Initial rental operations.* Allocation of costs: *Costs to be allocated. Methods of cost allocation.* Net realizable value: *General principles. Inventory versus long-term investment. Individual item or group basis. Determination of net realizable value. Financial statement disclosures.*
28. **Cost accounting for distribution, Paul M. Fischer and John D. Schoonover. 743**
Physical distribution: A total systems approach: *Functional cost control. Cost center management: Unique problems. The accounting system for cost control. Concept of trade-offs. Cost analysis by functions. Inventory. Transportation. Warehousing. Order processing.* Promotional costs: *Direction of efforts. Designing the promotional mix. Determining the amount of promotional expenditures. The problem of lagged advertising results. Control of salesmen.* Cost defense under the Robinson-Patman Act: *Constructing cost justification.*
29. **Cost accounting for financial enterprises, Michael J. Coie 772**
A special case of cost accounting. Requirements for management information. Cost for pricing and profitability analysis. Contribution concept.

Standards. Standards for business line profitability analysis. Standards for cost control. Nonlabor costs. Fitting the pieces together. A conceptual framework. Using the framework for decision making.

- 30. **Cost accounting and analysis in state and local governments**, *Robert J. Freeman, Harold H. Hensold, Jr., and William W. Holder*. 794

Introduction. Cost accounting versus cost finding. Essential fund accounting concepts and terminology: *Types of funds*. Essential cost concepts and terminology: *Variable versus fixed costs*. *Cost centers and responsibility accounting*. *Job order versus process costing*. *Direct and indirect costs*. Cost accounting and cost finding: "Proprietary" activities: *Enterprise Funds*. *Internal (Intragovernmental) Service Funds*. Cost accounting and cost finding: "General government" activities: *Reconciliation of expenditures, costs, and expenses (costs)*. *Governmental fund distinguishing characteristics*. *Project-oriented fund costing*. *Period-oriented fund costing*. Budgeting tools: *Static (fixed) budgeting*. *Flexible budgeting*. *Performance budgeting*. *Zero base budgeting*. Standard costs and variance analysis. Different costs for different purposes.

- 31. **Cost accounting in not-for-profit organizations**, *Robert E. Seiler and E. R. Gilley*. 840

Nature of not-for-profit organizations. Importance of cost accounting: *Cost accounting methods*. Importance of budgeting. Organizational aspects of control. Hospitals: *Organization*. *Third-party billing requirements*. *Revenue centers*. *Cost centers*. *Payroll-related costs*. *Donated services and supplies*. *Use of statistical allocational bases*. *Cost finding*. *Calculation of daily room costs*. *Cost allocation to type of patient*. *Budget systems*. *Capital budgeting*. Private clubs: *Role of cost accounting*. *Cost centers*. *Allocation bases*. *Contribution margin prices*. *Budgeting*. *Capital budgeting*. Churches. Voluntary health and welfare organizations: *Cost classifications*. *Depreciation*. *Donated materials and services*. Schools and universities: *Cost sharing*. *Overhead rate for sponsored programs*. *Cost Accounting Standards Board (CASB)*.

PART SEVEN
SPECIAL METHODS OF COST ACCOUNTING AND CONTROL

- 32. **Cash management**, *F. Norman Anderton and Percy B. Yeargan* 877

Introduction. Objectives. Forecasting. Cash collections. Cash disbursements. Investing. Borrowing. Bank relations.

- 33. **Capital budgeting**, *John M. Carroll* 902

Introduction. Strategic context of capital spending proposals: *The structure of strategy*. *Strategy and risk*. *Linking capital investments to strategy*. The capital expenditure proposal: *Developing investment opportunities*.

Tactical alternatives. Estimates of each investment's alternative cash flow. Measurement and selection of investment proposals: Basic concepts. Advanced concepts. Discount rates. Ranking and selection. Decision making under conditions of uncertainty: Sensitivity analysis. Simulation analysis.

- 34. Decision models and mathematical modeling, Gordon B. Harwood and Kenneth C. Levine 940**
 Linear programming: *An example involving the use of LP. Graphing LP constraints. What LP constraint graphs show. Proving the LP solution. Inventory control: Ordering cost and carrying cost behavior. A quantitative EOQ model. The reorder point. Computer simulation: The deterministic approach. Sensitivity analysis. The stochastic approach. Expected value. Monte Carlo simulation. Other decision models.*
- 35. The learning curve: Concepts and application, Felix P. Kollaritsch and Raymond B. Jordan. 971**
 Introduction. Definition of learning curve. Average cumulative unit cost: *Average incremental unit cost. Applications of the learning curve. Determination of specific cost values. Formula approach: Step and continuous functions. Applying the formulas. Steps in using the mathematical factors. Learning curve charts. Assumptions. Factors influencing the learning curve. Uses of the learning curve. The learning curve and financial reporting: Using the time sharing program. Input to the time sharing program. Computer output. Historical linear regression. Appendix.*
- 36. Input-output analysis, Werner G. Frank and James Fella . . . 1018**
Origins of input-output analysis. Explanation of input-output tables. Use of input-output analysis in planning: Analyzing market potential. Evaluating expansion alternatives. Integrating macroeconomic planning with the firm's financial planning model. Developing an input-output model for a divisionalized firm. Establishing cost standards for a complex production process. Extensions of input-output analysis for control: Use of input-output models in performance evaluation. Limitations and cautions in the use of input-output analysis: Assumptions of the input-output model.
- 37. Zero base budgeting: From the ground up, Robert A. Bonsack and Thomas F. Rowan 1045**
 Origins of ZBB. The ZBB concept. Mechanics of ZBB. Applying ZBB: *Public versus private business. Current budgeting and financial reporting practices. Management style and motivation. Size of the organization. Implementing ZBB: Strategic planning. Training and education. Top management commitment. Customize techniques. Systems integration. Implementation steps.*

PART EIGHT
EMERGING TRENDS AND CHALLENGES IN MANAGERIAL AND
COST ACCOUNTING

- 38. Current versus historical costs, Edward V. McIntyre and William J. Ihlanfeldt. 1067**
Historical cost accounting and inflation accounting. Efforts by the profession to deal with inflation: *Financial reporting versus financial statements. Report of the study group on objectives of financial statements (Trueblood report). FASB Discussion Memorandum on conceptual framework.* Current replacement cost accounting: *Operating profit and holding gains. The issue of comparability.* General price level adjustments and capital maintenance considerations: *General price-level adjusted historical cost statements. GPLA-HC versus RC statements. Preparation of GPLA-HC statements. Comparison of GPLA and RC statements. Capital maintenance factors. Selection of a purchasing power index. Combining GPLA and RC adjustments.* Uses of RC financial statements. Limitations of RC and problems of implementation. Exit values as an alternative to replacement costs. An eclectic approach as an alternative.
- 39. Accounting and reporting for segment performance evaluation, Donald C. Haley and Charles W. Plum 1109**
Pros and cons of segmentation. Segment organization. Impact of external reporting requirements on segment accounting: *Requirements of the Financial Accounting Standards Board and the Securities and Exchange Commission. The Federal Trade Commission.* Intersegment transfers. Allocation of common costs. Evaluation considerations. Appendix A: Relationship between a company's organizational philosophy and its accounting function. Appendix B: Cost information disclosure to stockholders. Appendix C: Top management monthly reporting of segment results. Appendix D: Federal Trade Commission line of business form.
- 40. Control of computer resources, Peter B. B. Turney and Donald A. Watne 1150**
Introduction: *Scope. Definitions.* Special problems: *Unique supply problems. Unique demand problems.* Planning and control of computer resources: *Planning and control of data processing development. Planning data processing development. Data processing project control.* Planning and control of the computer organizations and operations: *Organization of the data processing function. Management control. Operational control. Quality control. Control over quality of output.* Management audit and review: *Post-audit. Operations audit.* Future developments: *Simulation models. Normative models.*
- 41. Costs and forecasting, Doyle Z. Williams, Wig B. DeMerville, and Larry D. Franklin. 1193**
Selection of the appropriate forecasting technique: *Questions to ask of management. Questions to ask of the model.* Classification of selected

forecasting techniques: *Qualitative forecasting methods. Quantitative methods. Explanatory models. Time-series models.* Forecasting techniques: *Qualitative forecasting methods. Quantitative forecasting methods—explanatory models. Quantitative methods—time-series models.* Usage of forecasting models: *Top and middle management involvement. Forecasting time horizon.*

42. The Cost Accounting Standards Board, Gary F. Bulmash and Louis I. Rosen 1231

Background. Primary objectives. Organization. Procedures. Contractors and contracts subject to CAS: *General. Classes of contracts exempted by CASB action. Waivers. Application of CAS to nondefense contracts. Cost Accounting Standards contract clause. Rights and obligations under the Cost Accounting Standards clause. Interpretations.* Recent proposals to amend CASB rules and regulations. Disclosure statement. Cost Accounting Standards: *Introduction to Standards. Relationship to the existing Armed Services Procurement Regulation. Administration and implementation of CASB requirements. Format of Standards. Prefatory comments. Standards promulgated. Part 401—Consistency in estimating, accumulating and reporting costs. Part 402—Consistency in allocating costs incurred for the same purpose. Part 403—Allocation of home office expenses to segments. Part 404—Capitalization of tangible assets. Part 405—Accounting for unallowable costs. Part 406—Cost accounting period. Part 407—Use of standard costs for direct material and direct labor. Part 408—Accounting for costs of compensated personal absence. Part 409—Depreciation of tangible capital assets. Part 410—Allocation of business unit general and administrative expenses to final cost objectives. Part 411—Accounting for acquisition cost of material. Part 412—Composition and measurement of pension cost. Part 413—Adjustment and allocation of pension cost. Part 414—Cost of money as an element of facilities capital. Part 415—Accounting for cost of deferred compensation. Statements of the CASB. Cost allocation concepts. Other research. Sources of information.*

INDEX 1261
