

Econometric Analysis by Control Methods

GREGORY C. CHOW

*Class of 1913 Professor of Political Economy and Director,
Econometric Research Program*

Princeton University

John Wiley & Sons
New York • Chichester • Brisbane • Toronto

Contents

PART 1	TECHNIQUES OF STOCHASTIC CONTROL	1
1	Introduction	3
1.1	<i>Optimal control of a linear model with known parameters, 4</i>	
1.2	<i>Techniques of stochastic control, 7</i>	
1.3	<i>Economic applications of stochastic control, 8</i>	
1.4	<i>Stochastic control under rational expectations, 10</i>	
1.5	<i>Optimal control methods for stochastic models in continuous time, 12</i>	
2	An Approach to the Feedback Control of Nonlinear Econometric Systems	14
2.1	<i>Feedback control for known econometric systems, 14</i>	
2.2	<i>Feedback control with unknown parameters, 19</i>	
2.3	<i>Usefulness of feedback control, 20</i>	
2.4	<i>A numerical example using the Klein-Goldberger model, 22</i>	
3	The Control of Nonlinear Econometric Systems With Unknown Parameters	30
3.1	<i>Introduction, 30</i>	
3.2	<i>An exact solution to a one-period control problem, 31</i>	

- 3.3 *An approximate solution to multiperiod control by dynamic programming, 36*
- 3.4 *Approximate evaluation of required expectations, 39*
- 3.5 *Concluding remarks, 42*
- 4 **The Control of Large-Scale Nonlinear Econometric Systems 44**
 - 4.1 *Nature of econometric models, 44*
 - 4.2 *Use of econometric models for policy projections and optimization, 46*
 - 4.3 *A feedback control algorithm, 48*
 - 4.4 *Further details concerning computations, 50*
 - 4.5 *Application to the Michigan Quarterly Econometric Model, 52*
 - 4.6 *Further research, 55*
- 5 **Optimal Control of Nonlinear Systems Program: User's Guide 57**
 - 5.1 *Eliminating second- and higher-order lags in the model, 57*
 - 5.2 *Description of the program, 59*
 - 5.3 *Description of time- and space-saving procedures, 61*
 - 5.4 *User-supplied subroutines, 63*
 - 5.4.1 *Main program, 63*
 - 5.4.2 *MODELS, 65*
 - 5.4.3 *MODEL1, 67*
 - 5.5 *Data requirements, 68*
 - 5.5.1 *&DIMENS, 69*
 - 5.5.2 *&OPT, 70*
 - 5.5.3 *Input matrices, 73*
 - 5.5.4 *Construction of IDENTVEC and VARBLVEC, 75*
 - 5.6 *Space requirements, 78*
 - 5.6.1 *The dimension of MAINAR, 78*
 - 5.6.2 *Region size, 79*
 - 5.7 *The use of two or more job runs, 79*

5.8	<i>Output and error messages, 81</i>	
5.9	<i>JCL requirements, 82</i>	
6	Applications of the Kalman Filter to the Estimation of Econometric Models	85
6.1	<i>Introduction, 85</i>	
6.2	<i>Derivation of $\beta_{t s}$ by recursive regression of β_t on y_1, \dots, y_s, 86</i>	
6.3	<i>Derivations of $\beta_{t s}$ by regression of y_1, \dots, y_s on x_1, \dots, x_s, 91</i>	
6.4	<i>Maximum likelihood estimation of s^2, V, and M, 93</i>	
6.5	<i>System of linear simultaneous equations, 97</i>	
6.6	<i>System of nonlinear simultaneous equations, 101</i>	
6.7	<i>Model with stationary coefficients, 102</i>	
6.8	<i>The estimation of seasonal components in economic time series, 106</i>	
PART 2	ECONOMIC APPLICATIONS OF CONTROL METHODS	109
7	An Econometric Definition of the Inflation-Unemployment Trade-Off	111
7.1	<i>Inflation-unemployment possibilities in a static model, 113</i>	
7.2	<i>Unemployment-inflation trade-off possibilities in the dynamic case, 115</i>	
7.3	<i>Analysis of the St. Louis model, 118</i>	
7.4	<i>Analysis of the Michigan Quarterly Econometric model, 120</i>	
7.5	<i>Concluding remarks, 121</i>	
8	Evaluation of Macroeconomic Policies by Stochastic Control Techniques	123
8.1	<i>Introduction, 123</i>	
8.2	<i>A theory for policy evaluation, 124</i>	

8.3	<i>Comparison with Fair's approach, 126</i>	
8.4	<i>Limitations and extensions, 129</i>	
8.5	<i>An illustrative evaluation, 130</i>	
9	Has Government Policy Contributed to Economic Instability?	131
9.1	<i>Introduction, 131</i>	
9.2	<i>Analytical framework, 132</i>	
9.3	<i>Description of the Michigan model and additional equations, 136</i>	
9.4	<i>Measurement of instability and empirical results, 139</i>	
	<i>Appendix: Equations for the Exogeneous Variables, 145</i>	
10	The Estimation of Total Investable Resources	149
10.1	<i>Introduction, 149</i>	
10.2	<i>Definition of investable resources, 150</i>	
10.3	<i>The matching of instruments and targets, 150</i>	
10.4	<i>The need for optimal control, 152</i>	
11	Usefulness of Imperfect Models for the Formulation of Stabilization Policies	154
11.1	<i>Introduction, 154</i>	
11.2	<i>Evaluation of imperfect models for policy analysis, 156</i>	
11.3	<i>Fitting two illustrative models, 159</i>	
11.4	<i>Illustrative evaluation of two imperfect models, 164</i>	
11.5	<i>Concluding remarks, 167</i>	
12	Effective Use of Econometric Models in Macroeconomic Policy Formulation	168
13	Econometric Analysis of Soviet Economic Planning by Optimal Control	177
13.1	<i>Three uses of optimal control in the analysis of planning, 177</i>	

13.2	<i>The structure of SOVMOD V, 180</i>	
13.2.1	<i>Agricultural production, 183</i>	
13.2.2	<i>The balance of payments, 183</i>	
13.2.3	<i>Investments, 184</i>	
13.2.4	<i>Capital stock, 184</i>	
13.2.5	<i>Employment, 184</i>	
13.2.6	<i>Nonagricultural production, 185</i>	
13.2.7	<i>Foreign trade, 186</i>	
13.2.8	<i>Wages and incomes, 187</i>	
13.2.9	<i>Consumption, 187</i>	
13.3	<i>Setting up the optimal control experiments, 187</i>	
13.4	<i>Testing the constraints on total output, 189</i>	
13.5	<i>Examining the allocation of investment and production, 191</i>	
13.6	<i>Possible respecifications of SOVMOD V, 192</i>	
	<i>Appendix: List of variables and equations in SOVMOD V, 194</i>	
14	Comparison of Econometric Models by Optimal Control Techniques	207
14.1	<i>Existing characterizations of an econometric model, 208</i>	
14.1.1	<i>Static model, 208</i>	
14.1.2	<i>Dynamic deterministic model, 208</i>	
14.1.3	<i>Dynamic stochastic model, 209</i>	
14.2	<i>Characterization of an econometric model by deterministic control, 210</i>	
14.3	<i>Characterization of an econometric model by stochastic control, 213</i>	
14.4	<i>An illustration using the Michigan model, 217</i>	
PART 3	STOCHASTIC CONTROL UNDER RATIONAL EXPECTATIONS	223
15	Econometric Policy Evaluation and Optimization Under Rational Expectations	225

15.1	<i>Introduction, 225</i>	
15.2	<i>Econometric policy evaluation, 226</i>	
15.2.1	<i>Linear model without expectations of future variables, 226</i>	
15.2.2	<i>Linear model with expectations of future variables, 227</i>	
15.2.3	<i>Nonlinear model with expectations of future variables, 230</i>	
15.3	<i>Econometric policy optimization, 232</i>	
15.3.1	<i>Linear model without expectations of future variables, 232</i>	
15.3.2	<i>Linear model with expectations of future variables, 233</i>	
15.3.3	<i>Nonlinear model with expectations of future variables, 237</i>	
15.4	<i>Concluding remarks, 237</i>	
16	Estimation of Rational Expectations Models	239
16.1	<i>Introduction, 239</i>	
16.2	<i>Maximum likelihood estimation in the general case, 241</i>	
16.3	<i>Estimation when environment is unaffected by agent's action, 247</i>	
16.4	<i>A family of consistent estimators for the general case, 250</i>	
16.5	<i>The assumptions of rational expectations models, 252</i>	
16.6	<i>Estimating nonlinear rational expectations models, 253</i>	
17	Estimation And Optimal Control of Dynamic Game Models Under Rational Expectations	255
17.1	<i>Policy evaluation and optimization under rational expectations, 257</i>	
17.2	<i>Estimation of dynamic game model with a dominant player, 262</i>	
17.3	<i>Estimation of dynamic game model under Nash equilibrium, 263</i>	

PART 4	OPTIMAL CONTROL METHODS FOR STOCHASTIC MODELS IN CONTINUOUS TIME	265
18	Optimum Control of Stochastic Differential Equation Systems	267
	<i>18.1 Introduction, 267</i>	
	<i>18.2 Linear stochastic differential equations, 268</i>	
	<i>18.3 Mean and covariance of solution to linear stochastic differential equations, 271</i>	
	<i>18.4 Dynamic programming for models in continuous time, 273</i>	
	<i>18.5 Ito's differentiation rule, 274</i>	
	<i>18.6 Optimum consumption and portfolio selection over time, 276</i>	
	<i>18.7 Consumption and portfolio selection when asset prices are log-normal, 279</i>	
	<i>18.8 Capital asset pricing with shifts in investment opportunities, 282</i>	
	<i>18.9 The pricing of options and corporate liabilities, 286</i>	
	<i>18.10 Optimal control of a linear system with quadratic loss, 288</i>	
19	Optimum Use and Exploration of a Natural Resource	291
	<i>19.1 Solution in the certainty case, 291</i>	
	<i>19.2 Assumptions concerning unknown stock of reserves, 294</i>	
	<i>19.3 The optimal control problem formulated, 296</i>	
	<i>19.4 Investigation of a simplified problem, 298</i>	
	<i>19.5 Explicit solution to the simplified problem, 300</i>	
	Bibliography	302
	Index	309
