

AERODYNAMICS, AERONAUTICS, AND FLIGHT MECHANICS

BARNES W. McCORMICK

The Pennsylvania State University

JOHN WILEY & SONS

New York Chichester Brisbane Toronto

CONTENTS

ONE INTRODUCTION	1
A Brief History	1
A Brief Introduction to the Technology of Aeronautics	9
TWO FLUID MECHANICS	16
Fluid Statics and the Atmosphere	16
Fluid Dynamics	22
Conservation of Mass	26
The Momentum Theorem	29
Euler's Equation of Motion	31
Bernoulli's Equation	33
Determination of Free-Stream Velocity	35
Determination of True Airspeed	36
Potential Flow	38
Velocity Potential and Stream Function	39
Elementary Flow Functions	42
Vortex	43
Source	44
Biot-Savart Law	45
The Calculation of Flows for Well-Defined Body Shapes	47
The Circular Cylinder	51
The Numerical Calculation of Potential Flow Around Arbitrary Body Shapes	54
THREE THE GENERATION OF LIFT	61
Wing Geometry	61
Airfoils	63
Airfoil Families	72
NACA Four-Digit Series	72
NACA Five-Digit Series	72
NACA 1-Series (Series 16)	74
NACA 6-Series	74
Modern Airfoil Developments	76
Prediction of Airfoil Behavior	82
Maximum Lift	93
Flaps	95
Plain Flaps	99
Split Flaps	99
Slotted Flaps	100

xii CONTENTS

Flap Effectiveness in the Linear Range	109
Leading Edge Devices	113
The Optimum Airfoil for High Lift	117
Powered-Lift Systems	120
The Lifting Characteristics of a Finite Wing	130
The Vortex System for a Wing	131
The Maximum Lift of a Finite Wing	140
Effect of Fuselage on $C_{L_{\max}}$	144
Effect of Trim on $C_{L_{\max}}$	146
Estimation of $C_{L_{\max}}$ for a Complete Airplane Configuration	148
Airfoil Characteristics at Low Reynolds Numbers	151
FOUR DRAG	162
Skin Friction Drag	163
Form Drag	168
Drag of Streamlined Shapes	176
Interference Drag	181
Induced Drag	185
Calculation of Induced Drag	186
Effective Aspect Ratio	194
Drag Breakdown and Equivalent Flat-Plate Area	196
Drag Counts	196
Average Skin Friction Coefficients	197
Example Estimates of Drag Breakdown	199
Trim Drag	203
Cooling Drag	206
Drag Reduction	214
Winglets	215
Reduction of Skin Friction Drag	221
Drag Cleanup	231
Total Airplane Drag	232
FIVE LIFT AND DRAG AT HIGH MACH NUMBERS	237
Qualitative Behavior of Airfoils as a Function of Mach Number	237
Subsonic Flow at High Mach Numbers	238
Fundamentals of Gas Dynamics	244
One-Dimensional Isentropic Flow	244
Normal Shock Waves	248
Oblique Shock Waves	252
Expansion Waves	258
Transonic Airfoils	261
Supersonic Airfoils	266
Linearized Compressible Potential Flow	271
Subsonic Flow	271
Supersonic Flow (Ackeret Theory)	274
Three-Dimensional Wings	279
Characteristics of Sweptback Wings	28
Delta Wings	29

Supersonic Wings	303
Subsonic Leading Edges	304
Supersonic Leading Edges	309
Effect of Mach Number on the Zero Lift Drag of Two- and Three- Dimensional Shapes	315
Area Rule for Transonic Flow	321

SIX THE PRODUCTION OF THRUST	332
A Brief History of the Piston Engine	332
Piston Engine Characteristics	333
Supercharged Engines	339
Propeller Analysis	343
Momentum Theory	343
Blade Element Theories	347
Momentum-Blade Element Theory	349
Vortex Theory	351
Practical Use of Propeller Charts	359
Approximate Useful Relationships for Propellers	364
Propeller Selection	366
Design of a New Propeller	368
A Brief History of the Turbojet	370
Description of the Gas Turbine Engine	371
Engine Ratings	377
Flat Rating	378
Some Considerations Relating to Gas Turbine Performance	378
Qualitative Comparison of the Performance of Turbojet, Turbofan, and Turboprop Engines	382
Specific Engine Characteristics and Performance	385
Turbojet	385
Turbofan	398
Turboprop	405
Installation Losses	411
Trends in Aircraft Propulsion	411

SEVEN AIRPLANE PERFORMANCE	418
Takeoff	418
Ground Roll	419
Effect of Wind	425
Airborne Distance	427
Balanced Field Length	431
Rate of Climb, Time to Climb, and Ceilings	432
Generalized Power-Required Curve	438
Time to Climb	439
Range	440
Maximum Endurance	446
Descent	447
Landing	448

Airborne Distance	451
Ground Roll	45
Range Payload	45
Operating Limitations	46
Flight Envelope	46
Maneuvering Envelope (V - n Diagram)	46
Gust Load Factors	46
Energy Methods for Optimal Trajectories	46
The Art of Estimating and Scaling	47

EIGHT STATIC STABILITY AND CONTROL

Introduction	47
Coordinate System—Forces, Moments, and Velocities	47
Longitudinal Static Stability	47
Stick-Fixed Stability	47
Stick-Fixed Neutral Point and Static Margin	48
C_{Mac} and Aerodynamic Center Location for a Finite Wing	48
Downwash Angle	48
Longitudinal Control	48
Control Position as a Function of Lift Coefficient	48
All-Movable Tail	48
Stabilizer-Elevator	48
Stabilator	49
Control Forces	49
Gearing	49
Stick Force for A Stabilator	49
Stick Force for a Horizontal Stabilizer-Elevator Combination	49
Estimation of Aerodynamic Hinge Moments	49
Example Calculation of Stick Force	50
Stick-Free Longitudinal Static Stability	50
Elevator-Stabilizer Configuration	50
Stabilator Configuration	50
Stick-Free Static Margin	50
Steady Maneuvering	50
Horizontal Stabilizer-Elevator Configuration: Elevator Angle per g	50
Stabilator Angle per g	51
Stick Force per g	51
Stabilizer-Elevator Configuration	51
Stabilator	51
Effect of Fuselage and Nacelles	51
Effects of Propulsion System	51
Propellers	51
Jets	51
Ground Effect	52
Lateral and Directional Static Stability and Control	52

Directional Static Stability	524
Directional Control	526
Lateral Control	528
Adverse Yaw	534
Roll Control by the Use of Spoilers	534
Aileron Reversal	537
Steady Rolling Motion	538
Coupling Effects	541
Rolling Moment with Rudder	541
Rolling Moment with Yaw Rate	542
Yawing Moment with Roll Rate	543
Rolling Moment with Sideslip Angle—Dihedral Effect	543

NINE LONGITUDINAL DYNAMIC STABILITY AND CONTROL 552

Equations of Motion	552
Linearization of the Equations	556
A Summary Look at the Stability Derivatives and Other Parameters	
Affecting Longitudinal Dynamic Motion	561
X Derivatives and Parameters	561
Z Derivatives and Parameters	563
M Derivatives and Parameters	564
Examination and Reduction of Equations of Longitudinal Motion	565
Solution of n th-Order Linear Differential Equations with Constant	
Coefficients	565
Mode Shapes	569
Phugoid (Long-Period Mode)	574
Short-Period Mode	576
Solution of the Longitudinal Equations of Motion Using an Analog	
Computer	576
Longitudinal Flying Qualities	585
Phugoid Mode	586
Flight Path Stability	587
Short Period Mode	587

TEN LATERAL-DIRECTIONAL DYNAMIC STABILITY AND CONTROL 591

Equations of Motion	591
Euler Angles	594
Reduction of the Lateral-Directional Equations of Motion	595
A Summary Look at the Stability Derivatives and Other Parameters	
Affecting Lateral-Directional Dynamic Motion	596
Y Derivatives	596
$C_{Y\beta}$	597
$C_{Y\dot{\beta}}$	597
C_{Yr}	598
$C_{Y\dot{r}}$	600

I Derivatives	600
$C_{l\beta}$	600
$C_{l\dot{\beta}}$	601
$C_{l\dot{r}}$	602
$C_{l\delta_a}$	603
$C_{l\delta_r}$	603
N Derivatives	604
$C_{N\beta}$	604
$C_{N\dot{\beta}}$	604
$C_{N\dot{r}}$	604
$C_{N\delta_a}$	605
$C_{N\delta_r}$	605
Lateral-Directional Equations for the Cherokee 180	605
Mode Shapes	606
Roll Mode	606
Spiral Mode	607
Oscillatory or "Dutch Roll" Mode	609
Lateral Directional Flying Qualities	610
Roll Mode	611
Dutch Roll Mode	612
Spiral Stability	612
Spinning	613
 APPENDIX A.1 THE SI SYSTEM	 621
 APPENDIX A.2 STANDARD ATMOSPHERE	 624
 APPENDIX A.3 AIRPLANE DATA	 629
 APPENDIX A.4 NOMENCLATURE AND ABBREVIATIONS	 640
 INDEX	 649
