Preface v

Introduction x

## **Session One** (Chairman: A. R. Smith)

Opening speeches:

*Prof. Manuel Corrêa de Barros* 3

*Prof. Abreu Faro*

An historical survey:

*S. Vajda* 7

## **Session Two, Part One** (Chairman: V. Brijatoff)

Future manpower requirements of the British economy:13

*C. S. Leicester*

A brief note on some improvements in U.K. statistics:37

*Rosemary Medlar*

Measuring the stock of educational capital by the costs of education: estimates  
for Norway, 1950 & 1960: 39

*E. Hoffmann*

The demand for higher education in Portugal:53

*Mário Murteira*

## **Session Two, Part Two** (Chairman: V. Brijatoff)

Forecasting and planning the structure of personnel of a University:67

*G. Menges & G. Elstermann*

Traitement automatique des demandes de mutation des professeurs: 81

*S. Aoustin & P. Cassagne*

A survey of educational planning models in the OECD member countries:107

*A.G. Khan*

## **Session Three** (Chairman: H. Wool)

PERSYM: a generalised entity simulation model of a military personnel system:153

*R.O. Groover*

A computerised system for projection of long-range military manpower  
accession requirements and manpower supply:167

*W.A. Lindsay*

Econometric models of enlistment behaviour:177

*A.E. Fechter & S.A. Hoenack*

## **Session Four** (Chairman: G.D. Kaye)

A simple static model for forecasting officer requirements:195

*D.S. Cotterill*

Calcul automatique de l'avancement des officiers dans l'Armée de l'Air  
Française:215

*J.C. Izaac*

A mathematical approach to measuring manpower requirements: 225

*B.F. Caputo*

Pilot training study: 233

*W.E. Mooz*

**Session Five** (Chairman: S. Vajda)

A model for civilian manpower management and planning in the US Navy: 247

*A. Charnes, W.W. Cooper, R.J. Niehaus & D. Sholtz*

Models for examining and optimizing manpower deployment: 265

*C.J. Purkiss*

Modèle de gestion à long terme du personnel d'encadrement: 285

*J. Agard & J. Vautier*

**Session Six** (Chairman: S. Vajda)

Mathematical programming models of a quasi-independent subsystem of the Canadian Forces manpower system: 299

*D.J. Clough, R.C. Dudding & W.L. Price*

Manpower planning in the Royal Air Force: an exercise in linear programming: 317

*R.W. Morgan*

Un Modèle de gestion previsionnelle des cadres d'entreprise: le modèle POLCA: 327

*J.C. Holl, P.J. Leyrate & R. Benayoun*

Model of a manpower selection procedure in the Armed Forces: 347

*H. Stolley*

**Session Seven** (Chairman: S.J.G. Barba)

Les méthodes de choix multi-critères appliquées à la sélection de personnel: 363

*E. Roba, B. Sussmann & M. Theys*

A brief note on personnel assignment under risk—a class of solvable stochastic zero-one programs: 381

*G. Mensch*

Development of optimal allocation algorithms for personnel assignment: 383

*R.S. Hatch*

**Session Eight** (Chairman: A.R. Smith)

Promotion and recruitment policies for the control of quasi-stationary hierarchical systems: 401

*A.F. Forbes*

The distribution of the number of leavers for an organisation of fixed size: 417

*D.J. Bartholomew & A.D. Butler*

**Appendix 429**
