PREFACE xiii

**CHAPTER 1 · AN INTRODUCTION TO
STATISTICS** 1

**CHAPTER 2 · SOCIAL VARIABLES AND
THEIR MEASUREMENT** 10

 1 · **FUNDAMENTALS OF MEASUREMENT** 10

 Quantitative and Qualitative Variables · Measuring Quantitative
Variables · The Unit of Measure · Indicators · Information Access · Types
 of Scales · Questions and Problems

 2 · **ERRORS OF MEASUREMENT AND CLASSIFICATION** 21

 Errors in Information Processing · Response Error · Observer Error ·
 Indicator Error · Misrepresentation as Error · Sampling Error as
Measurement Error · Random, Constant, and Correlated Measurement
Errors · The Reliability and Validity of Measures and Classifications ·
 The Implications of Measurement Error in Statistics · Questions and
 Problems

 3 · **ROUNDED MEASURES** 29

 Rounding Procedures · Severity of Rounding · Significant Digits ·
Confidence and Precision · True Limits of Rounded Numbers · Questions
 and Problems

SELECTED REFERENCES 34

CHAPTER 3 · GROUPING OF QUALITATIVE DATA

35

1 · SINGLE CLASSIFICATION

Rules of Classification · Problems in Application · Some Rules for the Percentage Table · Questions and Problems

41

2 · CROSS-CLASSIFICATION

Questions and Problems

48

3 · GRAPHS OF QUALITATIVE DATA

The Simple Bar Chart · The Sliding-Bar Chart · The Pie Chart · Perspective on Qualitative Data · Questions and Problems

54

SELECTED REFERENCES

CHAPTER 4 · GROUPING OF QUANTITATIVE VARIABLES

55

1 · SINGLE VARIABLE

Array · Number and Size of Class Intervals · Constructing the Frequency Distribution · Rounded and True Limits · Midpoint of Class Interval · Relative (Percent) Frequencies · Cumulative Frequency Distribution · Questions and Problems

67

2 · CROSS-CLASSIFICATION

Joint Frequency Table · Classifying by Attribute and Magnitude · Questions and Problems

71

3 · GRAPHIC PRESENTATION

Histogram · Frequency Polygon · Cumulative Frequency Graph (Ogive) · Construction of the Cumulative Frequency Graph · Using the Cumulative Graph · Scatter Diagram · Questions and Problems

83

SELECTED REFERENCES

CHAPTER 5 · AVERAGES

84

1 · MEASURES OF LOCATION AND CENTRAL TENDENCY

The Maximum and Minimum as Measures of Location · The Concept of Average · Uses of Averages · Questions and Problems

90

2 · THE MODE

Finding the Mode · Bimodality · Evaluation of the Mode · Questions and Problems

96

3 · THE MEDIAN OR POSITION AVERAGE

Calculation of the Median · Procedure in Grouped Data · Median of Discrete Data · Other Position Measures · Quantiles as Standardized Measures · Questions and Problems

104

4 · THE MEAN OR ARITHMETIC AVERAGE

Computing the Mean from an Arbitrary Origin · The Weighted Mean · Unweighted Means · Calculation for Grouped Data · A Useful

Computing Formula • Proportions and Rates as Means • Questions and Problems

5 • CRITERIA FOR CHOICE OF AVERAGE 115

Purpose to Be Served • Pattern of Distribution • Technical Considerations • Characteristics of Averages • Comparability of Averages • Conclusion • Questions and Problems

SELECTED REFERENCES 122

CHAPTER 6 • NORMING OPERATIONS 123

1 • ELEMENTARY NORMING 123

Ratio • Proportion • Percent • Index • Demographic Rates • Specific Rates • Questions and Problems

2 • STANDARDIZED RATES 132

Assessing the Effect of Standardization • Component Analysis • The Standard Million • Aggregative Index • Versatility of Standardization • Conclusion • Questions and Problems

SELECTED REFERENCES 149

CHAPTER 7 • VARIATION 150

1 • MEASURES OF SPREAD 150

Measurements of Range • Intermediate Ranges • Questions and Problems

2 • VARIATION AS MEASURED BY ABSOLUTE DEVIATIONS 154

Deviations from a Norm • Choice of Origin • Average Deviation (*AD*) • Coefficient of Relative Variation (*CRV*) • Questions and Problems

3 • VARIATION AS MEASURED BY SQUARED DEVIATIONS 159

Sum of Squared Deviations • Variance • The Standard Deviation (*SD*) • The Coefficient of Relative Variation (*CRV*) • Computation of Variance: Ungrouped Variates • Computation of Variance: Grouped Variates • Averaging Variances • Variance of 0,1 Variates • Questions and Problems

4 • THE NORMAL DISTRIBUTION AS A PATTERN OF VARIATION 169

Characteristics of the Normal Curve • Normal Deviates • Converting Given Measures to Standard Measures • Questions and Problems

5 • VARIATION OF QUALITATIVE VARIABLES 175

Counting Differences • Index of Qualitative Variation (*IQV*) • Use of the *IQV* • Relation of *IQV* to Variance • Questions and Problems

SELECTED REFERENCES 181

CHAPTER 8 • MEASUREMENT OF ASSOCIATION: QUALITATIVE AND ORDINAL VARIABLES 183

1 • CONCEPT OF STATISTICAL ASSOCIATION 183

Principle of Contingency • What Are the Evidences of Relationship? • Devices for the Measurement of Association

186	2 · MEASURING ASSOCIATION: SOME GENERAL CONSIDERATIONS Inadequacy of the 2×1 Table for Estimate of Association • Statistical Association and the Cross-Classification Table • General Features of Relative Reduction in Error Measures of Association • Questions and Problems
196	3 · GOODMAN AND KRUSKAL'S TAU Computing Formula for Tau • The Use and Interpretation of Tau • Questions and Problems
207	4 · THE PREDICTION OF ORDER: GAMMA Marginal Distributions and Gamma • The Use and Interpretation of Gamma • Yule's Q as a Special Case of Gamma • Questions and Problems
222	5 · ELABORATION IN THE ANALYSIS OF ASSOCIATION Questions and Problems
232	SELECTED REFERENCES

233 **CHAPTER 9 · BIVARIATE REGRESSION AND CORRELATION**

233	1 · THE CORRELATION RATIO Interval Errors • Computing Formula for the Correlation Ratio • Use and Interpretation of the Correlation Ratio • Questions and Problems
242	2 · THE SCATTER DIAGRAM Types of Scatter • Scedasticity • Questions and Problems
251	3 · LINEAR REGRESSION AND CORRELATION The Relative Reduction in Prediction Error • Computing Formulae • Rank Order Correlation • Point Biserial Correlation (r_{pb}) • The Correlation between Two Dichotomies (ϕ) • Comparison of r and r^2 • Questions and Problems
268	4 · SOME GENERAL GUIDES TO THE INTERPRETATION OF CORRELATION (1) Correlation as Evidence of Cause and Effect • (2) Common Factor and "Spurious" Correlations • (3) Artfactual Correlations • (4) Chance Elements in Observed Correlations • Questions and Problems
273	SELECTED REFERENCES

274 **CHAPTER 10 · PARTIAL CORRELATION, MULTIPLE REGRESSION, AND PATH ANALYSIS**

274	1 · AN OVERVIEW OF MULTIVARIATE ANALYSIS Purposes and Uses of Multivariate Analysis • The Logic of Controlling by Statistical Adjustment • Questions and Problems
-----	--

2 · THE PARTIAL CORRELATION COEFFICIENT	279
The First-Order Partial Correlation Coefficient • Rules of Thumb for Inferring Partial Correlations • Second-Order and Higher-Order Partial Correlations • Questions and Problems	
3 · MULTIPLE REGRESSION AND MULTIPLE CORRELATION	293
The Special Case of Two Predictors • Computing Partial Regression Coefficients: Two Predictors • Rationale for the Computational Formulae for Partial Regression Coefficients • The Multiple Correlation Coefficient • An Illustration of Multiple Regression: Two Predictors • Elaborations on Multiple Regression • Special Problems in Determining the Relative Importance of Variables in Multiple Regression Analysis • Questions and Problems	
4 · PATH ANALYSIS	312
Decomposing the Zero-Order Correlations • Selecting the Final Path Model • Questions and Problems	
SELECTED REFERENCES	330

CHAPTER 11 · PROBABILITY 331

1 · NATURE OF PROBABILITY	331
Basis of Probability • Probability Defined • The Validity of the Probability Measure • Questions and Problems	
2 · PROBABILITY CALCULATIONS	338
Equally Likely Outcomes • Alternative Events • Compound Event • Independent and Dependent Outcomes • Outcomes Not Mutually Exclusive • Fourfold Table • The Probability of a Single Event • Questions and Problems	
3 · COMBINATIONS AND PERMUTATIONS	347
Combinations • Permutations • The Calculation of Permutations • Complete Permutation • Partial Permutation • Recurring Items • Combining N Objects, r at a Time • Questions and Problems	
4 · BINOMIAL PROBABILITIES: INDEPENDENT EVENTS	352
The Binomial • Full Set of Binomial Probabilities • The Expanded Binomial • Binomial Probability Distribution • Mean and SD of Binomial Distribution • Empirical Probabilities • Binomial and Normal Distributions • Questions and Problems	
SELECTED REFERENCES	362

CHAPTER 12 · SAMPLING 363

The Purpose of Sampling • Advantages of Sampling	
1 · UNIVERSE AND SAMPLE	364
Definition of Universe • Finite and Infinite Universes • The Target Universe and the Sampled Universe • Problems of Sampling • Questions and Problems	

368 2 · SAMPLING PROCEDURES
Haphazard Sampling · Availability Sampling · Judgment (Purposive) Sampling · Definition of Random Sampling · Simple Random Sampling · Sampling by Random Digits · Stratified Sampling · Comparison of Strata · Cluster Sampling · Interval (Systematic) Sampling · Interrelatedness of Random Sampling Procedures · Questions and Problems

382 SELECTED REFERENCES

383 CHAPTER 13 · PARAMETER ESTIMATION

383 1 · CONFIDENCE INTERVALS

Sampling Error · Sampling Distribution · Distribution of Sampling Errors · Parameter Estimates with Allowance for Sampling Error · Interval Estimate of the Mean · The Logic of the Standard Error of the Mean · Computation of the Standard Error · Construction of the Confidence Interval (Large Sample) · Working Procedure · Demonstration of Experimental Confidence Intervals · Convenience of Large Samples · Confidence Interval for a Percentage (Large Sample) · Computing an Interval Estimate of a Percentage · Confidence Intervals for Other Parameters · The Finite Population Multiplier · Questions and Problems

407 2 · DETERMINING APPROPRIATE SAMPLE SIZE

Resources · Sampling Procedure · Analysis Planned · Anticipated Loss of Cases · Variation in the Population Sampled · The Precision Required · Questions and Problems

413 CHAPTER 14 · TESTING A STATISTICAL HYPOTHESIS

413 1 · THE GENERAL LOGIC OF HYPOTHESIS-TESTING

Hypothesis-Testing and Estimation Compared · Null Hypotheses · Testing the Null Hypothesis · Level of Significance · Zone of Rejection · Questions and Problems

422 2 · TESTING THE HYPOTHESIS OF NO DIFFERENCE BETWEEN MEANS

Large Sample Test for Difference between Means · The Difference between Two Proportions · Small Sample Test for Difference between Means · The t -Test for Matched or Correlated Samples · Questions and Problems

441 3 · DISTRIBUTION-FREE TESTS FOR A DIFFERENCE IN LOCATION

The Mann-Whitney Test · The Kolmogorov-Smirnov (K-S) Test · The Relative Power of Nonparametric Tests · Questions and Problems

450 4 · TESTING HYPOTHESES ABOUT CORRELATION AND REGRESSION COEFFICIENTS

Questions and Problems

453 SELECTED REFERENCES

CHAPTER 15 · HYPOTHESIS-TESTING	455
1 · ONE-WAY ANALYSIS OF VARIANCE	456
Total Sum of Squares and Component Sums of Squares · Twice-Adjusted Measures · The <i>F</i> -Ratio · The <i>F</i> -Table · The <i>F</i> -Distribution · Unequal n_i · Computing <i>BSS</i> · Analysis of Variance Assumptions · Questions and Problems	
2 · TWO-WAY ANALYSIS OF VARIANCE	468
Preliminary Comment · Once-Adjusted Measures · Twice-Adjusted Measures · Thrice-Adjusted Measures · Testing Hypotheses · Case of $n_{ij} = 1$ · Review of Assumptions · Questions and Problems	
3 · A × B CONTINGENCY TABLE	480
Make-up of χ^2 · Degrees of Freedom · Assumption of χ^2 -Test · Questions and Problems	
4 · A × B × C CONTINGENCY TABLE	489
Preliminary Remark · Procedure · Hypothesis 1 · Hypothesis 2 · Hypothesis 3 · Degrees of Freedom · Iterating for Expected Frequencies · Perspective on Data Analysis · Questions and Problems
