

CONSUMER BEHAVIOR MODELS FOR NON-STATISTICIANS

The River of Time

Jerome D. Greene

PRAEGER

PRAEGER SPECIAL STUDIES • PRAEGER SCIENTIFIC

CONTENTS

Preface	ix
Introduction	xiii
PART I—STOCHASTIC MODEL THEORY	
Chapter	
1 Latent Variables	3
2 Logic of Stochastic Models	7
PART II—GAMMA-POISSON MODEL	
3 Gamma-Poisson Frequency Model	13
4 Predicting Latent Rate and Future Frequency	27
5 Screening	39
6 Time Reliability Index	43
7 Marketing Analysis	49
8 Sampling in Time and Space	61
9 Recency vs. Frequency	67
10 Other Applications	77
PART III—BETA-BINOMIAL MODEL	
11 Beta-Binomial Frequency Model	99
12 Analysis	115

PART IV—IN CONCLUSION	127
Suggested Reading	132
Appendixes	
Appendix A	
Estimating Gamma-Poisson Parameters and Calculating Frequency Distribution in Any Time Period	135
Appendix B	
Reliability of Estimation of Latent Variable from Manifest Variable	141
Appendix C	
Sampling in Time and Space	151
Appendix D	
Beta and Gamma Formulas Useful in Social Research	155
Index	165
About the Author	171
