

Contents

Foreword	iii
Preface	v
Contributors	xi

I. Introduction

1. Growth of the World Fertilizer Industry <i>Charles A. Hodge</i>	1
2. Pollutants, Wastes, and By-Products of the Fertilizer Industry <i>Neculai N. Popovici</i>	9
3. Regulation and Pollution Control in the Fertilizer Industry <i>Charles A. Hodge</i>	23

II. Nitrogen Fertilizer Industry

4. Ammonia Production <i>Mircea Turtureanu</i>	35
5. Ammonia Pollution Control Measures <i>Thomas A. Czuppon, Hassan M. Gomaa, and Stan A. Knez</i>	51
6. Ammonia Storage, Loading, and Transport <i>Robert H. Roberts and John G. Baguley</i>	73
7. Nitric Acid Production <i>Eugen-Petre Cristescu</i>	81

8. Impact of NO _x Abatement on the Fertilizer Industry <i>Jumpei Ando</i>	93
9. Ammonium Nitrate and Nitrochalk <i>Robert E. Nitzschmann and Johannes G. A. Reuvers</i>	99
10. Urea Production <i>Hidetoshi Uchino</i>	109
11. Control of Water Pollution and Water Treatment in the Nitrogen Fertilizer Industry <i>Lucian Negulescu</i>	119
III. Phosphate Fertilizer Industry	
12. Introduction to the Phosphate Fertilizer Industry <i>Manny Sierra</i>	145
13. Phosphate Rock Storage, Transportation, and Processing <i>Manny Sierra</i>	151
14. Sulfuric Acid Production <i>Teodor Ciobanu</i>	161
15. Sulfuric Acid Storage and Transport <i>Robin W. Strickland</i>	187
16. Impact of SO ₂ Abatement on the Fertilizer Industry <i>Jumpei Ando</i>	189
17. Phosphoric Acid by Wet Process: Recovery of Fluorine-Containing Gases <i>W. R. Parish</i>	197
18. Phosphoric Acid by Wet Process: Phosphogypsum, Transport, Storage, and Utilization <i>Jumpei Ando and John E. Cameron</i>	209
19. Phosphoric Acid by Wet Process: Pond Water Management <i>John E. Cameron</i>	225
20. Phosphoric Acid by Wet Process: Radioactive Components in Phosphoric Acid and Their Removal <i>Florin T. Bunus</i>	237
21. Phosphoric Acid by Wet Process: Heavy Metals in Phosphoric Acid and Their Removal <i>Marinela Man</i>	253
22. Granular Triple Superphosphate and Single Superphosphate <i>Henryk Jan Górecki</i>	269
23. Utilization of Fluorine from Phosphate Fertilizer Plants <i>Henryk Jan Górecki</i>	299

IV. Potassium Fertilizer Industry

24. Introduction to the Potassium Fertilizer Industry	337
<i>Maurice O. Klein, Kenneth W. Reid, and Elmar L. Goldsmith</i>	
25. Environmental Aspects in Mining and Production of KCl	343
<i>Kenneth W. Reid and Maurice O. Klein</i>	
26. Long-Term Solid Waste Management and KCl Facilities Decommissioning	361
<i>Kenneth W. Reid and Maurice O. Klein</i>	
27. Air Emissions at KCl Facilities	369
<i>Maurice O. Klein, Kenneth W. Reid, and Elmar L. Goldsmith</i>	
28. KCl Handling, Storage, and Transport	387
<i>Elmar L. Goldsmith</i>	

V. Mixed Fertilizer Industry

29. MAP, DAP, and NPK Fertilizers: Pollution Control Practices in Japan	393
<i>Jumpei Ando and Ichiki Hamada</i>	
30. MAP, DAP, and NPK Fertilizers: Pollution Control Practices in the United States and Europe	405
<i>Frank P. Achorn</i>	
31. Nitrophosphate-Based NPK Fertilizer: Air Pollution Control	419
<i>Robert E. Nitzschmann and Johannes G. A. Reuvers</i>	
32. Nitrophosphate-Based NPK Fertilizer: Wastewater Treatment	433
<i>Paula-Gabriela Petreanu</i>	
33. Nitrophosphate-Based NPK Fertilizer: Radioactive Components and Their Removal	449
<i>Florin T. Bunus</i>	
34. Storage and Transport of Solid Fertilizers	461
<i>Robert E. Robinson</i>	

VI. Liquid Fertilizer Industry

35. Ammonium Phosphate Solutions and Suspensions	467
<i>Mark T. Holt</i>	
36. Hot and Cold Blend Liquid Fertilizer Plants	473
<i>Derek A. Palgrave</i>	
37. Containment Systems for Liquid Fertilizer Plants	477
<i>Horace C. Mann, Jr.</i>	

VII. Plant Site Remediation

38. Remediation Measures for Existing Plant Facilities and Decommissioned Facilities	485
<i>Susanna Tomlinson</i>	
39. Remediation Measures for Distribution and Dealer Facilities	491
<i>Horace C. Mann, Jr.</i>	

Index	493
