

# Strategies to Reduce Greenhouse Gas Emissions from Road Transport: Analytical Methods

ORGANISATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT

## TABLE OF CONTENTS

<b>Executive Summary</b> .....	7
Approach and aim of the report.....	7
<b>Conclusions and Recommendations</b> .....	9
Recent growth in CO <sub>2</sub> emissions from road transport.....	9
Policies and measures to reduce CO <sub>2</sub> emissions by road transport.....	9
Assessment and modelling methods.....	10
Future trends.....	11
Recommendations.....	11
<b>Chapter 1. Introduction</b> .....	13
Context.....	13
Greenhouse gas emissions from transport.....	13
Timeframe.....	13
Working method and objectives.....	15
Structure and content of the report.....	15
<b>Chapter 2. Recent Trends in CO<sub>2</sub> Emissions from Road Transport</b> .....	17
Introduction.....	17
Local and global pollutants from road transport.....	17
Types of road vehicles.....	19
Trends in CO <sub>2</sub> emissions.....	21
National transport share of CO <sub>2</sub> emissions.....	24
Contribution of road freight transport to CO <sub>2</sub> emissions.....	25
Conclusions.....	27
References.....	29
<b>Chapter 3. Policies and Measures to Reduce CO<sub>2</sub> Emissions from Transport</b> .....	31
International measures to reduce emissions of greenhouse gases.....	31
Catalogue of existing measures.....	33
Combinations of measures.....	37
Conclusions.....	37
Reference.....	38
<b>Chapter 4. Assessment and Modelling Methods: an Evaluation Framework</b> .....	39
Assessing the impact of CO <sub>2</sub> reduction measures: a framework.....	39
Evaluation methods.....	44
What is missing? Improving current modelling approaches.....	51
Lack of <i>ex post</i> evaluation.....	52
Conclusions.....	54
Notes.....	54
References.....	55
<b>Chapter 5. Future Trends in CO<sub>2</sub> Emissions and Technological Improvements</b> .....	57
CO <sub>2</sub> emissions reduction policies.....	57
Factors influencing road emissions by passenger cars.....	57
Future trends in freight transport.....	60
Conclusions: Outlook for CO <sub>2</sub> emissions.....	61

References .....	64
<i>Annex A. List of participants</i> .....	65
<i>Appendix A. UN Framework Convention on Climate Change</i> .....	66
<i>Appendix B. CO<sub>2</sub> Emissions from Road Transport</i> .....	67

### Box

I .Comparison of the evaluation methodologies used in Canada and Japan .....	53
--	----

### Tables

1. New registrations of passenger cars, 1998, 1999 and 2000 .....	19
2. New registrations of duty vehicles, 1998, 1999 and 2000 .....	20
3. CO <sub>2</sub> emissions from fuel combustion worldwide, 1990 and 1999 .....	22
4. Emission factors for selected fuel types .....	24
5. CO <sub>2</sub> emissions from road transport.....	27
6. Measures for improving the fuel consumption of vehicles.....	34
7. Strategy documents for climate change action plans .....	38
8. Evaluation framework for transportation strategies.....	43
9. Average power of new passenger cars in four European countries .....	59
10. France: number of cars and average annual distance travelled .....	59
11. Vehicle ownership per 1 000 inhabitants .....	60
12. Projected CO <sub>2</sub> emissions growth and transport share of CO <sub>2</sub> emissions compared to other sectors.....	61

### Figures

1. The mechanisms of greenhouse gases.....	14
2. Shares of diesel and gasoline vehicles, 1997 .....	21
3. CO <sub>2</sub> emissions from fuel combustion by road transport, 1990-99.....	26
4. Evolution of road freight transport, 1990-97 .....	28
5. Expected increase in CO <sub>2</sub> emissions from transport.....	62
