Inv.-Nr. 6649

TABLE OF CONTENTS

I. MECHANISMS OF CREEP AND SHRINKAGE	1
<i>Preface</i>	v
M.J. SETZER <i>A model of hardened cement paste for linking shrinkage and creep phenomena</i>	3
R.L. DAY and B.R. GAMBLE <i>The use of activation spectrum theory to describe creep in concrete</i>	15
J. LUIJERINK <i>Deformation kinetics of concrete</i>	27
L.J. PARROTT and J.F. YOUNG <i>Shrinkage and swelling of two hydrated alite pastes</i>	35
A.K. MULLICK <i>Creep and microstructural changes in concrete</i>	49
S. SABRI and J.M. ILLSTON <i>Isothermal drying shrinkage and wetting swelling of hardened cement paste</i>	63
II. STOCHASTIC NATURE OF CREEP AND SHRINKAGE	73
F. ALOU and F.H. WITTMANN <i>Etude expérimentale de la variabilité du retrait du béton/ Experimental study of the variability of shrinkage in concrete</i>	75
H.W. REINHARDT, M.G.M. PAT and F.H. WITTMANN <i>Variability of creep and shrinkage of concrete</i>	93
H.A.W. CORNELISSEN <i>Creep of concrete - A stochastic quantity</i>	109
III. EXPERIMENTAL TECHNIQUES AND RESULTS	125
F. KRUML <i>A contribution to the problem of reversible and irreversible creep of compact structural concretes</i>	127
M. MAMILLAN <i>Checking the principle of superposition by testing</i>	135

VIII

<i>P. ACKER</i> <i>Drying of concrete: Consequences for the evaluation of creep test</i>	149
<i>H. TROST</i> <i>Relaxation tests on very old concrete</i>	171
<i>R. WALTHER and T. PARETH</i> <i>Rheological properties at high temperature of a concrete with a crushed limestone aggregate and blast furnace cement</i>	179
<i>U. SCHNEIDER</i> <i>Creep effects under transient temperature conditions</i>	193
<i>K. ALTMANN</i> <i>Shrinkage of concrete in extreme climate</i>	203
<i>D.W. HOBBS</i> <i>Drying shrinkage of symmetrically reinforced concrete and some estimates of the creep of concrete in tension</i>	213
<i>M. KAVYRCHINE and Z.T. NUNG</i> <i>Déformations de sections transversales et de poutres fléchies sous charge soutenue</i>	227
<i>L. BRULL and K. KOMLOS</i> <i>Early shrinkage of hardening cement pastes</i>	239
IV. CONSTITUTIVE RELATIONS FOR CREEP AND SHRINKAGE	249
<i>G.J. CREUS</i> <i>Non linear constitutive equations for concrete</i>	251
<i>J.E. JONASSON</i> <i>Analyses of shrinkage in concrete</i>	259
<i>H.S. MULLER and H.K. HILSDORF</i> <i>Comparison of prediction methods for creep coefficients of structural concrete with experimental data</i>	269
<i>L.F. NIELSEN</i> <i>On the prediction of creep functions for concrete</i>	279
V. OBSERVATIONS ON STRUCTURES	291
<i>H.G. RUSSEL and K.N. SHIU</i> <i>Creep and shrinkage behaviour of tall buildings and long span bridges</i>	293
<i>C.H. THORNTON and I.P. LEW</i> <i>Analysis of restrained concrete structures for creep and shrinkage</i>	305
<i>T. JANOV</i> <i>Experimental Analysis of prestressed concrete bridges</i>	323

VI. STRUCTURAL CREEP ANALYSIS	339
R. IDING and B. BRESLER <i>Prediction of shrinkage stresses and deformations in concrete</i>	341
P.E. ROELFSTRA <i>Computerized structural analysis applied to large span bridges</i>	353
W. HAAS <i>Numerical analysis of creep and shrinkage on concrete structures</i>	369
Y. BANGASH and G.L. ENGLAND <i>The influence of thermal creep on the operational behaviour of complex structures</i>	381
S. MERAZZI, P. STEHLIN and F.A. BROGAN <i>Viscoelastic stability analysis of shells</i>	405
V. LAZIC and J. LAZIC <i>Stresses and displacements of composite and prestressed structures</i>	413
V. KRISTEK and Z. SMERDA <i>Simplified calculation of the relaxation of stress respecting the delayed elasticity</i>	425
D.W. HOBBS <i>Shrinkage and load induced curvature of reinforced concrete beams</i>	439
M. KOPRINA <i>Prise en compte du fluage par la méthode des forces</i>	451
R.J. SUTER <i>Comportement d'une structure continue réalisée à l'aide d'éléments préfabriqués</i>	459
J.P. JACCOUD <i>Déformation des dalles en béton: Méthode bilinéaire pour le calcul des flèches</i>	471
M.A. CHIORINO and F. MOLA <i>Analysis of linear visco-elastic structures subjected to delayed restraints</i>	485
F. MOLA and G. CREAZZA <i>General and approximate method for the analysis of linear visco-elastic structures sensitive to second order effects</i>	497
Panel Discussion I MICROSTRUCTURAL ASPECTS, MECHANISMS AND CONSTITUTIVE MODELING	511
Chairman: F.H. Wittmann	
Recorder: L.J. Parrott	
Panelists: Z.P. Bazant, C.D. Pomeroy, E. Cinlar, J.W. Dougill, H.K. Hilsdorf, S.E. Pihlajavaara and J.F. Young	

X

Panel Discussion II
CONSTITUTIVE MODELING AND STRUCTURAL CREEP ANALYSIS

515

Chairman: Z.P. Bazant

Recorder: D.W. Hobbs

Panelists: C.A. Anderson, T. Javor, M.A. Chiorino, R. Favre,
B.L. Meyers, H. Trost, and K. Willam
