PREFACE AND GUIDE FOR READERS	ix
Preface	ix
Guide for this Book	xi
Introductory Glossary	xiii
Synopsis of the Book	xv
INTRODUCTION TO INTERSTELLAR TRAVEL	1
0.1 Travel to the Stars	1
0.2 Science, Technology, and Interstellar Travel	3
0.3 First Look at Possible Interstellar Missions	6
CHAPTER 1: BASICS OF TRAVEL IN SPACE	11
1.1 Mechanics of Space Travel	11
1.2 Rocket Propulsion	14
1.3 Mission Design Using Rockets	18
1.4 Gravity and Circular Motion	21
1.5 Rockets and Energy	23
1.6 Gravitational Assistance	29
1.7 Further Considerations for Interstellar Travel	33
CHAPTER 2: ADVANCED PROPULSION METHODS	35
2.1 Energy Sources: Solar	35
2.2 Solar-Powered Mission	38
2.3 Energy Sources: Nuclear Fission	41
2.4 Energy Sources: Nuclear Fusion	43
2.5 Fusion Propulsion	47
2.6 Electric Ion Propulsion	52
2.7 Electromagnetic Mass Driver and Other Mass Ejectors	55
2.8 Solar Sails	58
2.9 Runways and Pellet Streams	64
CHAPTER 3: RELATIVITY AND INTERSTELLAR TRAVEL	67
3.1 Einstein's Relativity in Physics	67
3.2 Effects on Mass, Length, and Time	70

	Page
3.3 Optical Effects	73
3.4 Apparent Paradox of Twins	75
3.5 Relativistic Motion	77
3.6 Relativistic Rocket Equation	80
3.7 Relativistic Transforms of Speed and Other Quantities	81
3.8 Relativistic Energy and Momentum	83
CHAPTER 4: RELATIVISTIC DRIVES AND PROBLEMS	87
4.1 Sunbeams	87
4.2 Laser and Microwave Beams and Large-Scale Optics	89
4.3 Photon Drive	92
4.4 Total Conversion and Anti-Matter Reaction	93
4.5 Anti-Matter Drive and Production	96
4.6 Missions with Anti-Matter	99
4.7 Interstellar Gas and Dust	101
4.8 Interstellar Electric and Magnetic Fields and Their Use	105
4.9 Interstellar Ramjets	110
4.10 Summary of Propulsion, and Beyond	116
CHAPTER 5: STARSHIPS AS SYSTEMS	119
5.1 Engineering Rules	119
5.2 Starship as System	122
5.3 Starship Size and Big Subsystems	125
5.4 Fine Subsystems	129
5.5 Subsystems for Basic Human Needs	131
5.6 Subsystems for Advanced Human Needs	133
5.7 Staging and Landing	135
5.8 Optimization and More Engineering	136
CHAPTER 6: MISSIONS	139
6.1 Destinations	139
6.2 Nearby Stars and Possible Planets	142
6.3 Scientific Opportunities	148
6.4 Human Missions	151
6.5 Simple Probes	154
6.6 Advanced Probes	157
6.7 Self-Reproducing Probes and Diffusion	160
6.8 Large Colony Ships	163
CHAPTER 7: ASTROGATION, OBSERVATION, AND COMMUNICATION	167
7.1 Location	167
7.2 Astrogation	168
7.3 Maneuvers	171
7.4 Active Detection	173

	Page
7.5 Passive Observation and SETI	174
7.6 Communication	178
7.7 More Relativistic Considerations	181
CHAPTER 8: TECHNOLOGICAL REQUIREMENTS AND HAZARDS	183
8.1 Closed Systems and Leakage	183
8.2 Deterioration and Reliability	186
8.3 Conservation, Repair, and Replacement	190
8.4 Equipment, Stores, and Materials	195
8.5 Radiation Damage, Erosion, and Shielding	196
8.6 Computers and Self-Reproduction	202
8.7 Data Storage	205
8.8 Breakdowns	206
8.9 Transport	208
CHAPTER 9: BIOLOGICAL REQUIREMENTS	211
9.1 Physical Requirements of Life in Closed Systems	211
9.2 Artificial Gee	214
9.3 Food and Ecosystem	215
9.4 Waste Recycling	221
9.5 Generations and Lifetimes	223
9.6 Radiation and Other Hazards	225
9.7 Health	227
9.8 Large Colony Ships	229
CHAPTER 10: PERSONAL, SOCIAL, AND POLITICAL CONSIDERATIONS	231
10.1 People for an Interstellar Mission	231
10.2 Psychological Considerations	236
10.3 Command and Community	240
10.4 Social and Philosophical Context	242
10.5 Political and Economic Context	244
10.6 Cost Estimates	248
10.7 Technical Programs	253
CHAPTER 11: INTERSTELLAR LIFE AND CIVILIZATIONS	257
11.1 Estimating Other Civilizations	258
11.2 The Fermi Paradox or Dilemma	261
11.3 Radio Search and Communication	264
11.4 If They Travel and Visit	269
11.5 Habitable Planets	272
11.6 Origin and Evolution of Life	276
11.7 Galactic Civilization (Ours and Theirs)	279
11.8 Visiting Other Worlds	284

	Page
CHAPTER 12: LONG-TERM PROSPECTS	287
12.1 Advances in Science and Technology	287
12.2 More Energy	293
12.3 Distorting Space-Time	296
12.4 Space-Ground Transport	299
12.5 Still Wilder Ideas	301
12.6 Conclusions on Starships and Missions	303
12.7 Conclusions in Social and Political Context	306
MATHEMATICAL APPENDICES	311
A. Unit System, Powers of Ten, Conversions, and Constants	313
B. Classical Physics	316
C. Relativistic Travel	321
D. Other Selected Topics	327
E. Programs and Printout Tables of Results for Rocket Motion	331
BIBLIOGRAPHY	341
INDEX	365
ABOUT THE AUTHOR	370
