Contents

| | |
|---|----|
| Prologue | 1 |
| 1 Location Theory | 5 |
| 1.1 The Weber Problem | 5 |
| 1.2 Pick's Construction | 11 |
| 1.3 Location and Substitution | 17 |
| 1.4 Non-Euclidean Metrics..... | 23 |
| 2 Optimal Routes | 31 |
| 2.1 Flows and Routes | 31 |
| 2.2 Parameterized Paths | 32 |
| 2.3 Shortest Paths and Euler's Equation | 34 |
| 2.4 A Simpler Case | 38 |
| 2.5 An Example | 39 |
| 2.6 Another Example | 43 |
| 2.7 Fermat's Principle and Snell's Law | 46 |
| 2.8 Geodesics on Curved Surfaces | 50 |
| 2.9 Generalizations: Several Functions | 57 |
| 2.10 Generalizations: Constraints | 58 |
| 2.11 Coordinate Transformations | 59 |
| 2.12 The Isoperimetric Problem | 63 |
| 3 Flows in the Space Economy | 67 |
| 3.1 Flows in One Dimension | 68 |
| 3.2 Flows in Two Dimensions | 71 |
| 3.3 Euler's Equations Revisited | 80 |

| | | |
|----------|---|------------|
| 3.4 | Minimal Surfaces | 83 |
| 3.5 | Generalizations | 85 |
| 3.6 | Beckmann's Flow Model | 86 |
| 3.7 | Uniqueness in the Beckmann Model | 93 |
| 3.8 | Aggregate Values | 97 |
| 4 | Market Areas | 99 |
| 4.1 | From Launhardt to Lösch | 99 |
| 4.2 | Compactness and Stability | 104 |
| 4.3 | Optimality Versus Stability | 110 |
| 4.4 | Nesting of Market Areas | 112 |
| 4.5 | Price Policies | 116 |
| 4.6 | Mill Pricing | 118 |
| 4.7 | Discriminatory Pricing | 120 |
| 4.8 | Uniform Delivery Price | 121 |
| 4.9 | Public Utility Location | 123 |
| 4.10 | Demand: One Dimension | 126 |
| 4.11 | Bifurcations | 131 |
| 4.12 | Two Dimensions: Circles | 133 |
| 4.13 | Two Dimensions: Polygons | 137 |
| 5 | Land Use | 143 |
| 5.1 | Von Thünen's Model | 143 |
| 5.2 | Generalization: Production | 148 |
| 5.3 | Generalization: Transportation | 152 |
| 5.4 | Beckmann's Flow Model Revisited | 153 |
| 5.5 | Differential Equations in the Plane | 155 |
| 5.6 | Structural Stability Defined | 158 |
| 5.7 | The Square Flow Grid | 162 |
| 5.8 | Triangular/Hexagonal Grids | 167 |
| 5.9 | Changes of Structure | 171 |
| 5.10 | Fractal Rent Landscapes | 179 |
| 6 | Commuting and Migrating | 183 |
| 6.1 | The Gravity Model | 183 |
| 6.2 | Traffic | 184 |
| 6.3 | The Entropy Model | 191 |

| | | |
|----------|--|------------|
| 6.4 | Hotelling's Migration Model | 198 |
| 6.5 | Hotelling's Model with Production | 203 |
| 6.6 | Stability of Hotelling's Model | 206 |
| 7 | Cycles, Growth, and Equilibrium | 211 |
| 7.1 | Spatial Growth | 211 |
| 7.2 | Spatial Business Cycles | 219 |
| 7.3 | Equilibrium of the Beckmann Model | 226 |
| 7.4 | Stability | 228 |
| 8 | Transportation Networks | 233 |
| 8.1 | Transportation Cost Metrics | 235 |
| 8.2 | Nested Networks | 243 |
| 8.3 | Detours and Accessibility | 249 |
| 8.4 | Topological Considerations | 254 |
| 8.5 | Networks in Reality | 256 |
| 8.6 | Fractal Networks | 258 |
| 8.7 | Central Networks | 260 |
| 8.8 | The Number of Radials | 262 |
| 8.9 | Approximations | 265 |
| 8.10 | Bifurcations of Radials | 268 |
| 8.11 | Curved Bifurcations | 275 |
| 8.12 | Accessibility | 278 |
| | Epilogue | 283 |
| | Subject Index | 285 |
| | Glossary of Formulas | 291 |
