---

# 5th International Workshop on Polymer Reaction Engineering

Papers of the 5th International Workshop on  
Polymer Reaction Engineering  
Berlin, 9-11 October, 1995

organized by

DECHEMA  
Deutsche Gesellschaft für Chemisches Apparatewesen,  
Chemische Technik und Biotechnologie e.V.  
Frankfurt am Main

# Contents

## Emulsion Polymerization

H. Tobita Microgel formation in emulsion crosslinking copolymerization	3
M. Mazotti, G. Storti, S. Fiorentino, A. Ghielmi, M. Morbidelli Kinetics of branching in emulsion polymerization	19
D. E. Mestach, W. H. Baan Emulsion polymerization of carboxylated polybutyl methacrylate microparticles – Modelling and experimental verification	35
J. Meuldijk, F. H. A. M. van den Boomen, D. Thoenes Batch and semi-batch emulsion copolymerization – Influence of recipe and scale on reactor performance	45
K. E. Mulyono, C. Schrauwen, J. Villermaux, F. Pla A new approach to modeling emulsion polymerization reactions	55
R. Bachmann, U. Pallaske, A. Schmidt, H. G. Müller Emulsion polymerisation of butadiene: Average number of radicals per particle – Comparison between model and experiment	65
R. Schomäcker, P. Müller Emulsion polymerization with nonionic surfactants	75
C. Abad, J. C. de la Cal, J. M. Asua Macromixing and micromixing in continuous loop reactors	87
K. Tauer, I. Müller Modelling sustained oscillations in continuous emulsion polymerisation of vinyl chloride	95
E. Saldivar, W. H. Ray Detailed modeling of emulsion copolymerization processes	105

D. Charmot, J. F. D'Allest, F. Dobler Carboxylated styrene-butyl acrylate and styrene-butadiene emulsion copolymers – Modelling the distribution of the acid monomer between serum, particle surface and the particle core	113
W.-j. Wang, B.-G. Li, Z.-z. Yu, Z.-r. Pan Modelling of seeded semi-continuous emulsion copolymerization for butyl-acrylate and 2-ethylhexyl-acrylate	123
Th. Stockhausen, A. A. Abushita, G. Weickert, H.-U. Moritz Influence of particle size on reaction rate of seeded emulsion polymerization of styrene	137
A. Siani, M. Apostolo, M. Morbidelli, G. Storti On-line monitoring of emulsion polymerization reactors through ultrasonic velocity measurements	149
S. Rudschuck, J. Adams, J. Fuhrmann Study of emulsion polymerization by fluorescence technique	159

### **Reactive Extrusion**

J. P. Puaux, A. Ainsler, A. Stefan Modelling a reactive extrusion in a twin-screw extruder	171
R. Diener, J. Hofmann, K.-D. Hungenberg Combination of a newly designed kneader with a twin-screw extruder for kinetic investigations of high-temperature polymer reactions	179

### **Suspension Polymerization and Heterophase Systems**

L. L. Böhm Catalysts, processes and products: Essential elements of polyolefin-technologies	191
J. J. Zacca, J. A. Debling, W. H. Ray Reactor residence time distribution effects on the multistage polymerization of olefins	213

T. F. McKenna, H. Benamouama, R. Spitz Mass transfer resistance in Ziegler catalysed slurry phase polymerisation: A new look at reaction modelling	223
G. Weickert, J. J. Samson, P. Roos, K. R. Westerterp Investigations of olefine polymerisations with Ziegler-Natta catalysts and metallocenes	235
M. Zerfa, B. W. Brooks, A. G. Faraday Influence of experimental conditions on the suspension polymerisation of vinyl chloride	249
I. Krispin, W. Pauer, I. Fresen, H.-U. Moritz Suspension polymerization of styrene – The influence of bifunctional initiators on kinetics and reactor performance	259
Ch. Paul, G. Schmidt-Naake Influence of oxygen on the suspension polymerization of styrene – New knowledge	271
W. Ramirez, T. McKenna, A. Guyot Suspension copolymerisation of styrene and n-cyclohexyl maleimide stabilised with polyvinyl alcohol: Optimisation of particle size distribution	281
N. Lazrak, A. Ricard Modeling of the heat transfer in drops during the suspension polymerisation of methyl methacrylate	291
M. Lahti, T. Karjalainen, J. Seppälä Polymerization of $\delta$ -caprolactone: Route selection and characterization of reaction	301
M. Lahti, J. Koivumäki, J. Seppälä Macro-scale mass transfer in polymerizations carried out with $\text{Et}[\text{Ind}]_2\text{ZrCl}_2$ -methylaluminoxane catalyst	311
 <b>Bulk and Solution Polymerization</b>	
K.Y. Choi, S. I. Cheong Modeling and design of melt polycondensation processes	323

A. Renken Recycle tubular reactors for polymerization and copolymerization processes	343
R. G. Gosden, S. Auguste, H. G. M. Edwards, A. F. Johnson, Z. G. Meszena, M. A. Mohsin Modelling and control of living polymerisation in flow reactors	365
W. Zimmerer, R. Doepper, A. Renken Thermogravimetric studies on the condensation kinetics of fully aromatic polyesters	373
K. D. Hungenberg, K. Knoll, L. Janko, F. Bandermann Anionic polymerization of styrene at high temperatures	387
R. Torvik, A. R. Gravdahl, G. R. Fredriksen, Ø. Meon, J. Laurell Design of HPPE stirred autoclaves using 3D computational fluid dynamics	401
M. Baumgärtel, F. Stroh, W. Fischer Modelling of bulk polymerization of polystyrene in multitube reactors	413
G. Schmidt-Naake, J. Zessin, U. Engelmann Experimental and theoretical investigation of mixings effects in discontinuous free radical polymerization process	423
S. Maeder, A. Renken Experimental determination of reactivity ratio – radical bulk copolymerisation of acrylic monomers	433
Z. Yao, B.-G. Li, K. Cao, Z.-R. Pan Model of thermal bulk copolymerization of styrene and maleic anhydride	445
A. H. E. Müller, R. Zhuang, D. Yan, G. Litvinenko Kinetic analysis of "living" polymerization processes exhibiting slow equilibria. Application to group transfer and cationic polymerizations	455

## Rate Coefficients and Kinetic Modelling of Polymerization

- R. A. Hutchinson, D. A. Paquet, Jr., J. H. McMinn, S. Beuermann, R. E. Fuller, C. Jackson 467  
The application of pulsed-laser methods for the determination of free-radical polymerization rate coefficients
- M. F. Cunningham, H. K. Mahabadi 493  
Kinetics of high conversion free radical polymerization: Experimental evidence of "constituent molecular weight distributions"
- G. Maschio, A. Visco, C. Scali 505  
Analysis of the molecular weight distribution in polymerization process
- D. I. Christie, R. G. Gilbert, J. P. Congalidis, J. R. Richards, J.H. McMinn 513  
Measurement of transfer constants to predict emulsion polymerization kinetics
- M. R. N. Costa, R. C. S. Dias 523  
New developments in the kinetic modelling of complex non-linear polymerizations
- J. A. Feliu, C. Sottile, C. Bassani, G. Maschio 531  
A kinetic study on the polymerisation of MMA
- D. Panke 547  
A model for the free-radical polymerization of methyl methacrylate over the complete range of conversion
- N. Tefera, G. Weickert, K. R. Westerterp, J. Schweer 557  
Modeling of free radical polymerisations up to high conversions: Applications to suspension and bulk polymerisation of MMA and ST
- M. Buback, M. Busch, R. Lämmel 569  
Modeling of molecular weight distributions for polymer produced by pulsed laser initiation

O. F. Olaj, G. Zifferer	579
Simulation of pseudostationary radical polymerization, 2. The role of chain-transfer and continuous initiation in periodic (pseudostationary) pulsed-laser polymerization	
J. Schweer, F. Bandermann, C. Günther	599
Towards the propagation rate coefficient for the free-radical polymerization of 1,3-butadiene	
P. A. Clay, R. G. Gilbert	611
Using molecular weight distributions to obtain mechanistic data from free-radical polymerization	
N. G. Podossenova	621
The application of statistic data for the determination of free-radical polymerization rate constants	
<b>Polymer Reactor Control and Monitoring</b>	
E. Topalis, P. Pladis, C. Kiparissides	631
Computer aided design of multizone, multifeed LDPE, Autoclaves	
I. Sáenz de Buruaga, M. Arotcarena, A. Urretabizkaia, P. D. Armitage, L. M. Gugliotta, J. R. Leiza, J. M. Asua	655
On line control of emulsion polymerization reactors	
A. Tietze, A. Proß, K.-H. Reichert	673
Temperature oscillation calorimetry in stirred tank polymerization reactors	
C. Scali, M. Morretta, D. Semino	681
Performance of control schemes based on estimators in the control of continuous polymerization reactors	
D. Semino, N. Manning, A. Brambilla	693
Control of continuous solution polymerization through neural network models
