Contents

PREFACE	xi
Chapter 1 DEFINITIONS AND INTRODUCTION	1
1-1 Files	2
1-2 Computations on a Database	5
1-3 A Hierarchical View of Data	8
1-4 Current Practice	12
1-5 Descriptions	15
1-6 Binding	17
1-7 Classification of Operating Systems	19
1-8 Applications	23
1-9 Review	24
Background and References	25
Chapter 2 HARDWARE AND ITS PARAMETERS	27
2-1 Basic Hardware Choices	28
2-2 Basic Hardware Parameters	37
2-3 Blocks and Buffers	51
2-4 Storage Architecture	63
Background and References	70

PART I

FILE STRUCTURES AND DESIGN

Chapter 3	BASIC FILE SYSTEM ORGANIZATION	73
3-0	Introduction	73
3-1	The File	79
3-2	The Sequential File	86
3-3	The Indexed-Sequential File	94
3-4	The Indexed File	110
3-5	The Direct File	124
3-6	The Multiring File	145
	Background and References	162
Chapter 4	HYBRID FILE ORGANIZATIONS	167
4-1	Simple Files	169
4-2	Multilevel Index Structures	178
4-3	An Implementation of an Indexed-Sequential File	192
4-4	Tree-Structured Files	202
4-5	Hierarchically Structured Data	209
4-6	Methods Based on Direct Access	220
4-7	Options of the Complex Ring Organization	231
4-8	Files Using Virtual Storage	239
4-9	Phantom Files	242
	Background and References	243
Chapter 5	OVERALL FILE SYSTEM EVALUATION	249
5-1	The Estimation of System Usage	251
5-2	Analysis of System Benefits	254
5-3	Database Storage Requirements	262
5-4	Access Load and Capability of a File System	265
5-5	Cost-Benefit Comparison	282
	Background and References	289
Chapter 6	TECHNIQUES	291
6-1	Statistical Techniques	292
6-2	Simulation	311
6-3	Queues and Scheduling Techniques	314
6-4	Operations Research in Database Design	325
6-5	Storage Allocation	335
	Background and References	341

PART II DATABASE STRUCTURES AND DESIGN

Chapter 7	DATABASE STRUCTURE	345
7-0	Structure Definition	346
7-1	View Models	349
7-2	Semantics of Relations	354
7-3	Building Blocks for Models	361
7-4	Operations on Relations	377
7-5	The Design of a Database Model	389
	Background and References	401
Chapter 8	SCHEMAS	405
8-1	Defining the Elements for a Database	406
8-2	The Schema and Its Use	414
8-3	Defining the Structure of a Database	421
8-4	Manipulation of the Schema	433
8-5	Subschemas	439
8-6	Structure, Schema, and Usage	443
	Background and References	446
Chapter 9	DATABASE IMPLEMENTATION	449
9-1	Issues in Database Implementation	451
9-2	Relational Calculus Implementation	456
9-3	Relational Algebra Implementation	470
9-4	Hierarchical Databases	477
9-5	Databases with Network Capability	486
9-6	Interlinked Hierarchies	505
9-7	Advances in Implementation	514
	Background and References	517
Chapter 10	QUERY LANGUAGES	521
10-1	Data Constellations	522
10-2	Categories of Information Retrieval	525
10-3	Query Formulation	529
10-4	Dynamics of Information-retrieval Systems	538
	Background and References	540

PART III SECURITY AND OPERATION

Chapter 11	METHODS TO GAIN RELIABILITY	543
11-1	Reliability	544
11-2	Redundancy	547
11-3	Transaction Reliability	555
11-4	Activity Logging	562
11-5	A Scenario for Recovery	568
	Background and References	576

Chapter 12	PROTECTION OF PRIVACY	579
12-1	Components of the Protection Problem	581
12-2	The Accessor	584
12-3	Types of Data Access	587
12-4	The Objects to be Locked	590
12-5	Envelope of Protection	592
12-6	Access Key Organization	593
12-7	Cryptography	600
12-8	Anonymity and Pollution	608
	Background and References	611
Chapter 13	INTEGRITY OF DATABASES	613
13-1	Locking	615
13-2	Hibernation and Deadlock	628
13-3	Maintenance of Integrity	641
	Background and References	644
Chapter 14	CODING	646
14-1	Representation of Knowledge	647
14-2	Machine Representation	652
14-3	Compression of Data	657
	Background and References	666
Chapter 15	DATA BASE OPERATION AND MANAGEMENT	669
15-1	Development of the Database	670
15-2	Maintenance of a Database	672
15-3	The Database Administrator	676
	Background and References	678
Appendix A	INDEX FOR ALTERNATE TERMINOLOGY	679
Appendix B	LIST OF DATABASE SYSTEMS	689
Appendix C	SYMBOLS USED	699
	Mathematical Symbols	699
	Programming and Syntax Symbols	700
	Variables for Performance Formulas	701
	BIBLIOGRAPHY	703
	INDEX	735
