
**Second International
CISM-IFToMM SYMPOSIUM
Warsaw, Poland
September 14-17, 1976**

sponsored by:
CISM-Centre International des Sciences Mécaniques
IFToMM-International Federation
for the Theory of Machines and Mechanisms
in association with
the Technical Division
of the Polish Academy of Sciences

THEORY AND PRACTICE OF ROBOTS AND MANIPULATORS

PROCEEDINGS

Edited by
A. Morecki
K. Kędzior

Technische Hochschule Darmstadt
FACHBEREICH INFORMATIK
BIBLIOTHEK
Inventar-Nr.: 4271
Sachgebiete:
Standort:

Fachbereichsbibliothek Informatik

CONTENTS

Preface VII

Editorial Note X

M.Nałęcz, Some problems in modern biocybernetics and biomedical engineering 1

A.Liegois, W.Khalil, J.M.Dumas, M.Renaud, Methematical and computer models of interconnected mechanical systems 5

B.Shimano, B.Roth, Ranges of motion of manipulators.... 18

W.J.Book, Characterization of strength and stiffness constraints on manipulator control..... 28

M.S.Konstantinov and P.I.Genova, Reduced variational problems in the transitional dynamics of robots... 38

A.Morecki, Z.Buśko, K.Kędzior, K.Wolski, K.Fidelus, J.Morawski, Some identification problems of structure and control of human movements..... 49

A.P.Bessonov, N.W.Umnov, Choice of geometric parameters of walking machines 62

I.Kato, H.Morita, T.Onozuka, Development of myoelectric control system for an above-knee prosthesis..... 74

H.J.Warnecke, R.D.Schraft, A computer-aided method to design a manipulator 85

M.Salmon, Consideration of the design of the Olivetti Sigma: An industrial robot for the manufacturing industries 93

A.Freedy, J.Lyman, M.Salomonov, A microcomputer aided prosthesis control 110

M.V. Aristova, M.B.Ignatiev, V.M.Prokhorov, Algorythmic system for robot's motion simulation..... 124

J.N.Fawcett, J.R.Hewit, Electronic logic control of pneumatic actuation..... 134

P.J.Drazan, M.F.Jeffery, J.M.Zarek, Recent developments in the design of a novel electro-pneumatic robot.. 143

M.Vukobratović, D.Hristić, D.Stokić, New method of motion synthesis and its application to artificial skeletal activity..... 151

K.Taguchi, K.Ikeda, S.Matsumoto, Four-legged walking machine..... 162

T.Yamashita, K.Kabashima, Y.Sakatani, Control of macro-model to simulate human level walking 172

J.W.Hill, Hydraulically powered lower-limb orthosis ... 182

M.Vukobratović, D.Stokić, D.Hristić, N.Gluhajić, Synergetic control principle of anthropomorphic movements..... 193

J.K.Ober, J.Leonhard, A.Ogórkiewicz, On the head manipulator for bilateral shoulder disarticulated children 206

M.Weiss, B.Kwiatkowski, Engineering in medical rehabilitation of patients with paresis of extremities.. 211

D.E.Okhotsimsky, A.K.Platonov, Walker's motion control. 216

R.B.McGhee, D.E.Orin, A mathematical programming approach to control of joint positions and torques in legged locomotion systems..... 225

J.Grundmann, A.Seireg, Computer control of multi-task exoskeleton for paraplegics 233

S.Hirose, Y.Umetani, Kinematic control of active cord mechanism with tactile sensors..... 241

R.Gawroński, B.Macukow, Learning system for optimal movement control with minimum error criterion..... 253

M.Petternella, S.Salinari, A single master-multiple slaves manipulator with penalty invariance..... 265

A.H.Bond, Fast vision for a low cost computer controlled robot 273

J.Bretschi, M.König, A.Schief, Reduction of information in optical sensors of industrial robots..... 285

C.R.Flatau, Force sensing in robots and manipulators... 294

J.Vertut, J.Charles, P.Coiffet, M.Petit, Advance of the new MA 23 force reflecting manipulator system..... 307

I.I.Artobolevskii, A.A.Kobrinskii, A.E.Kobrinskii, A.I.Korendyasev, B.L.Salamandra, V.I.Sergeyev, L.I.Tyves, Principles governing the design and motion of sensing robots..... 323

J.Kawecki, Application of the inferring circuits in the robot's control systems 334

I.M.Havel, O.Štěpánková, The role of problem solving in cognitive robotic systems..... 343

M.Colombetti, E.Pagello, A logical framework for robot programming..... 354

P.Corti, G.Gini, M.Gini, M.Somalvico, Problem solving and automatic emergency recovery: towards the design of intelligent robots..... 364

E.Lodi, F.Luccio, Further results on monitored finite state machines..... 374

H.Roesler, V.Paeslack, Manipulators for tetraplegics in adapted environments..... 384

T.B.Sheridan, Modelling supervisory control of robots.. 394

S.I.Novatchenco, V.A.Pavlov, N.S.Teleshev, E.J.Yurevich, Principles and experience of application of sensitized robots supervisory control..... 407

A.K.Bejczy, Allocation of control between man and computer in remote manipulation..... 417

G.A.Spinu, G.A.Linkin, G.I.Sergatsky, Method of control of industrial robots for arc welding..... 431

E.I.Yurevich, Electromechanical robot systems for the automation of manufacturing process..... 441

P.N.Belyanin, Automation of production process based on the use of industrial robots..... 449

M.W.Thring, Telechiric mining 460

H.J.Warnecke, G.Herrmann, G.Lundström, Applications, social impacts, education and training..... 473

J.F.Engelberger, The artificial appendage game..... 480

K.Hasegawa, K.Matsushima, T.Kaneko, On the study of the standardization of terminology and symbols related to industrial robots in Japan 494
