

GENERALIZED INVERSES OF LINEAR OPERATORS

REPRESENTATION AND APPROXIMATION

C. W. Groetsch

Department of Mathematical Sciences

University of Cincinnati

Cincinnati, Ohio

MARCEL DEKKER, INC. New York and Basel

CONTENTS

I	HILBERT SPACE AND HILBERT SPACE OPERATORS	
§ 1	Hilbert space-----	1
§ 2	Linear operators-----	9
§ 3	Spectral theory-----	17
§ 4	Differentiation-----	24
	Exercises-----	32
II	GENERALIZED INVERSES OF BOUNDED LINEAR OPERATORS WITH CLOSED RANGE	
§ 1	Definition and basic properties-----	37
§ 2	Other definitions-----	47
§ 3	A representation theorem and applications--	54
1.	An operator-valued integral representation-----	59
2.	An iterative method-----	62
3.	An analog of Schulz's method-----	69
4.	Hyperpower methods-----	71
5.	Tihonov regularization-----	74
6.	A method based on interpolatory function theory-----	76
7.	Other representations-----	81
§ 4	Steepest descent-----	82
§ 5	The conjugate gradient method-----	90
	Exercises-----	110
III	GENERALIZED INVERSES OF BOUNDED LINEAR OPERATORS WITH ARBITRARY RANGE	
§ 1	Definition and basic properties-----	113

§ 2	A representation theorem-----	119
§ 3	Steepest descent-----	124
§ 4	The conjugate gradient method-----	130
	Exercises-----	143
BIBLIOGRAPHY-----		145
INDEX OF SYMBOLS-----		162
SUBJECT INDEX-----		163
