of Simulation

Contents

Part I Data and Uncertainties in Hydraulic Modeling for Engineering, Specific Applications of Modeling

Introduction to Part I: Data and Uncertainties in Hydraulic Modelling for Engineering, Specific Applications of Modelling	3
Philippe Gourbesville, Jean Cunge and Guy Caignaert	
What Do We Model? What Results Do We Get? An Anatomy of Modelling Systems Foundations	5
Jean Cunge	
Use of Standard 2D Numerical Modeling Tools to Simulate Surface Runoff Over an Industrial Site: Feasibility and Comparative Performance Survey Over a Test Case	19
Morgan Abily, Claire-Marie Duluc and Philippe Gourbesville	
Hydraulic Modelling for Rhône River Operation	35
Laëtitia Grimaldi, Guillaume Bontron and Pierre Balayn	
Numerical Modeling: A Tool for the Decision-Making Process	47
Cédric Bernardi, Claire Auriault, Monique Bourrilhon and Pierre Maruzewski	
Information Handling in Interdisciplinary, Hydroenvironment Engineering Projects	65
Frank Molkenthin, Chi Yu Li and K. Vikram Notay	
Multivariable Model Predictive Control of Water Levels on a Laboratory Canal	77
Klaudia Horváth, Peter-Jules van Overloop, Eduard Galvis, Manuel Gómez and José Rodellar	

Estimation of Lateral Inflows Using Data Assimilation in the Context of Real-Time Flood Forecasting for the Marne Catchment in France	93
Johan Habert, Sophie Ricci, Andrea Piacentini, Gabriel Jonville, Etienne Le Pape, Olivier Thual, Nicole Goutal, Fabrice Zaoui and Riadh Ata	
Dam Break Flow Modelling with Uncertainty Analysis	107
Benjamin Dewals, Sébastien Erpicum, Michel Piroton and Pierre Archambeau	
Coupling TOMAWAC and EurOtop for Uncertainty Estimation in Wave Overtopping Predictions	117
Nicolas Chini and Peter K. Stansby	
Coupling 1-D and 2-D Models for Simulating Floods: Definition of the Exchange Terms	129
André Paquier and Pierre-Henri Bazin	
Detection of Contamination in Water Distribution Network	141
Zineb Noumir, Kévin Blaise Guépié, Lionel Fillatre, Paul Honeine, Igor Nikiforov, Hichem Snoussi, Cédric Richard, Pierre Antoine Jarrige and Francis Campan	
Water Planning and Management: An Extended Model for the Real-Time Pump Scheduling Problem	153
Louise Brac de la Perrière, Antoine Jouglet, Alexandre Nace and Dritan Nace	
Study of Flow in a Staircase at Subway Station	171
Walid Bouchenafa, Nassima Mouhous-Voyneau, Philippe Sergent and Jacques Brochet	
 Part II New Numerical Methods and Approaches for Modeling Systems	
Introduction to Part II	187
Philippe Gourbesville, Jean Cunge and Guy Caignaert	
A Non-Hydrostatic Non-Dispersive Shallow Water Model	189
Didier Clamond and Denys Dutykh	

Finite Volume Implementation of Non-Dispersive, Non-Hydrostatic Shallow Water Equations.	197
Vincent Guinot, Didier Clamond and Denys Dutykh	
Modeling Flood in an Urban Area: Validation of Numerical Tools Against Experimental Data.	207
Quentin Araud, Pascal Finaud-Guyot, Fabrice Lawniczak, Pierre François, José Vazquez and Robert Mosé	
FullSWOF: A Software for Overland Flow Simulation	221
Olivier Delestre, Stéphane Cordier, Frédéric Darboux, Mingxuan Du, François James, Christian Laguerre, Carine Lucas and Olivier Planchon	
SWASHES: A Library for Benchmarking in Hydraulics.	233
Olivier Delestre, Carine Lucas, Pierre-Antoine Ksinant, Frédéric Darboux, Christian Laguerre, François James and Stéphane Cordier	
Correct Boundary Conditions for Turbulent SPH.	245
Martin Ferrand, Damien Violeau, Arno Mayrhofer and Omar Mahmood	
Integrated Water Quality Modelling of the River Zenne (Belgium) Using OpenMI	259
Olkeba Tolessa Leta, Narayan Kumar Shrestha, Bruno de Fraine, Ann van Griensven and Willy Bauwens	
 Part III 3D CFD and Applications	
Introduction to Part III: 3D CFD and Applications	277
Philippe Gourbesville, Jean Cunge and Guy Caignaert	
Use of Numerical Modeling to Optimize the Placement of Data-Gathering Equipment in Low-Head Hydro Production Structures	279
Julien Schaguene, Olivier Bertrand, Eric David, Pierre Roumieu, Gilles Pierrefeu, Karine Pobanz, Xavier Cornut and Laurent Tomas	
Optimization of a Shared Tailrace Channel of Two Pumped-Storage Plants by Physical and Numerical Modeling	291
Giovanni De Cesare, Martin Bieri, Stéphane Terrier, Sylvain Candolfi, Martin Wickenhäuser and Gaël Micoulet	

Influence of the Hydraulic System Layout on the Stability of a Mixed Islanded Power Network	307
Christian Landry, Christophe Nicolet, Silvio Giacomini and François Avellan	
Determination of Surge Tank Diaphragm Head Losses by CFD Simulations	325
Sébastien Alligne, Primoz Rodic, Jorge Arpe, Jurij Mlacnik and Christophe Nicolet	
Study of the Hydrodynamic Phenomena and Fluid–Structure Interactions of a Bypass Butterfly Valve with Double Disc	337
Julien Large, Jérôme Fouque and David Reungoat	
Simulations of Rotor–Stator Interactions with SPH-ALE	349
Magdalena Neuhauser, Francis Leboeuf, Jean-Christophe Marongiu, Etienne Parkinson and Daniel Robb	
Numerical Simulations of a Counter-Rotating Micro-Turbine	363
Cécile Münch-Alligné, Sylvain Richard, Bastien Meier, Vlad Hasmatuchi and François Avellan	
CFD-Based Mathematical Optimization of Hydroturbine Components Using Cloud Computing	375
Albert Ruprecht, Andreas Ruopp and Jakob Simader	
Numerical Simulation of Pressure Pulsations in Francis Turbines	389
M. V. Magnoli and R. Schilling	
3D RANS Modeling of a Cross Flow Water Turbine	405
Christian Pellone, Thierry Maitre and Ervin Amet	
FPM Simulations of a High-Speed Water Jet Validation with CFD and Experimental Results	419
Christian Vessaz, Ebrahim Jahanbakhsh and François Avellan	
A Vortex Modeling with 3D CFD	433
Grégory Guyot, Hela Maaloul and Antoine Archer	
Bubble-Stirred Melts in Vitrification	445
Delphine Gautheron, Armand Bonnetier, Emilien Sauvage, Jean-François Hollebecque, Patrice Brun, Roland Riva and Yves Du Terrail	

3D Oil Spill Model: Application to the “Happy Bride” Accident.	457
Cédric Goeury, Jean-Michel Hervouet, Olivier Bertrand, Régis Walther and Vincent Gouriou	
Modelling Combined Wave–Current Flows Using a RANS CFD Solver with Emphasis on the Effect of the Turbulent Closure Model.	473
Maria João Teles, Michel Benoit and António A. Pires-Silva	
3D Numerical Modeling of a Side-Channel Spillway	487
Géraldine Milési and Stéphane Causse	
Numerical Modelling of Two-Dimensional Flow Patterns in Shallow Rectangular Basins.	499
Matthieu Secher, Jean-Michel Hervouet, Pablo Tassi, Eric Valette and Catherine Villaret	
A 3-Dimensional Numerical Simulation of Flow Over a Broad-Crested Side Weir	511
Mohammad R. Namaee, Mohammad Rostami, S. Jalaledini and Mahdi Habibi	
Rans Simulations of Flow Over Dunes with Low Lee and Sharp Lee Angles	525
Artemis Motamedi, Hossein Afzalimehr, Gerald Zenz, Majid Galoie and Artemis Motamedi	
Particle Image Velocimetry (PIV) Measurement and Numerical Modeling of Flow Over Gravel Dune	535
Artemis Motamedi, Hossein Afzalimehr, Gabriele Harb and Majid Galoie	
Hydroinformatics Vision 2011	545
Klaus Peter Holz, Jean Cunge, Rainer Lehfeldt and Dragan Savic
