CONTENTS

I. INDUSTRIAL PRODUCTION PROBLEMS

Programming and Lot Size Approaches to Determine Optimal Volume of Coal Production in the Federal Republic of Germany	
Horst Albach	1
Optimization Problems in a Queueing System with Breakdowns	
Klaus-Peter Kistner	14
A Queueing Model of a Capacity Planning Problem in the Tea Industry	
Karl Heinz F. Meyer	31
Optimal Adjustment of Production Facilities in a Stochastic Production Process	
Manfred R. Wolff	66
The Optimality of Preventive Maintenance in a Complex System	
Werner Spickenheuer	83

II. PRODUCTION PROBLEMS IN UNIVERSITIES

PPBS As A Managerial Tool for Research and Higher Education Institutions	
Walter Goldberg	98
Input-Oriented and Output-Oriented Models of Universities: A Production-Theoretical Approach	
W. Schüler	123
A Multiple-Objective Programming Algorithm for the Dis- tribution of Resources among Teaching and Research	
Günter Fandel	146
Models of University Planning as a Tool for Education Policy in the Federal Republic of Germany: Problems of Admissions Policy and Capacity Planning	
Horst Albach	176
