LIST OF FIGURES	<i>page viii</i>
LIST OF TABLES	ix
PREFACE	x
Introduction Some Definitions	I
1 Natural Resources and Tropical Development	8
The significance of natural resources	8
The study of natural resources	11
2 Natural Resources: Climate and Water Supply	15
Climatic types	15
Climatic characteristics	18
Water supply	22
Methods of water control	27
3 Other Natural Resources	31
Vegetation	31
Soils	35
Soil erosion	39
Mineral and power resources	43
4 Human Resources: Qualitative Aspects	49
Some social and institutional issues	49
Climate and human comfort and energy	54
Tropical diseases	63
Diet and nutrition	69
5 Human Resources and the Population Problem	74
Population data	74
Racial and tribal composition	78
Population growth	80
The population problem	83

6. Types of Tropical Agriculture	<i>page</i> 94
Shifting-field cultivation	94
Wet-rice cultivation	99
Subsistence and cash agriculture	101
Smallholdings and plantations	106
Livestock farming	110
Mixed farming	112
7 The Increase of Agricultural Production	116
1 Intensification of agricultural production	116
<i>Land tenure</i>	117
<i>Crop improvement</i>	120
<i>Fertilizers</i>	122
<i>Pests, plant diseases and weed control</i>	125
<i>Crop successions, plant populations and spacing</i>	129
2 The extension of agricultural land	131
3 The large-scale scheme	134
4 Mechanization	137
8 Agricultural Development in Trinidad and Tobago, Uganda, and Malaya	140
Trinidad and Tobago	140
Uganda	145
Malaya	150
9 Agriculture or Industry?	156
Three points of view	156
The development continuum	164
10 Industrialization	168
Labour-intensive or capital-intensive technology	168
Obstacles to industrialization	169
Cottage and small-scale industry	173
Intermediate technology	175
11 Industrialization in Venezuela, Nigeria, and India	177
Venezuela	177
Nigeria	181
India	186
