# Contents

Preface xi

1 Introduction and Overview 1
  1.1 The Evolution of Macrodynamics 1
  1.2 Scope of the Book 3
  1.3 Outline of the Book 5

I Traditional Macrodynamics 13

2 A Dynamic Portfolio Balance Macroeconomic Model 15
  2.1 Some Preliminary Concepts 15
  2.2 The Output Market 18
  2.3 The Financial Sector 24
  2.4 Equilibrium in Product and Money Markets 30
  2.5 The Supply Function 31
  2.6 The Phillips Curve 33
  2.7 Dynamics of Asset Accumulation 34
  2.8 Expectations 36
  2.9 A Complete Dynamic Macro Model 37
  2.10 Fixed Real Stock of Money Policy 42
  2.11 Constant Rate of Nominal Monetary Growth Policy 47
  2.12 Fixed Real Stock of Government Bonds Policy 50
  2.13 Conclusions: Some Methodological Remarks 52
  Notes 55

II Rational Expectations 57

3 Rational Expectations: Some Basic Issues 59
  3.1 The Rational Expectations Hypothesis 59
  3.2 Specification of Expectations in Continuous-Time Models 61
  3.3 The Cagan Monetary Model 66
  3.4 Forward-Looking Solution to the Cagan Model 69
  3.5 Discrete-Time Cagan Model 76
  3.6 Bubbles 80
  3.7 Learning 82
  Notes 85

4 Rational Expectations and Policy Neutrality 87
  4.1 The Lucas Supply Function 87
  4.2 A Complete Rational Expectations Macro Model 93
  4.3 The Lucas Critique and Policy Neutrality 95
  4.4 Robustness of the Policy Neutrality Proposition 99
## Contents

4.5 Full Information Level of Output 103  
4.6 Alternative Information Set 105  
4.7 Persistence of Shocks and Business Cycles 112  
4.8 Conclusions 116

### 5 Nonuniqueness Issues in Rational Expectations Models 117

5.1 The Taylor Model 118  
5.2 Nonuniqueness Due to Policy 121  
5.3 Critique of the Minimum Variance Criterion 123  
5.4 The Minimum State Representation Solution 124  
5.5 Some Objections to the Minimum State Representation Solution 128  
5.6 Characterization of Solutions of General Rational Expectations Models 130  
5.7 A Nonlinear Macrodynmic Model 132  
5.8 Endogeneity of Coefficients 134

### 6 Rational Expectations and Saddlepoint Behavior 137

6.1 Saddlepoint Behavior 137  
6.2 Example 1: Cagan Model with Sluggish Wages 141  
6.3 Example 2: Term Structure of Interest Rates 148  
6.4 Example 3: Exchange Rate Dynamics 159  
   Appendix 164  
   Notes 170

### 7 The Stability of Government Deficit Financing under Rational Expectations 171

7.1 Introduction 171  
7.2 A Simple Macro Model 173  
7.3 Money-Financed Deficit 176  
7.4 Bond-Financed Deficit 182  
7.5 Some Methodological Issues 186  
7.6 Bond Financing and Stability in a Growing Economy 191  
7.7 Conclusions 198  
   Notes 199

### 8 Macroeconomic Stabilization Policy under Rational Expectations 201

8.1 Wage Indexation 202  
8.2 Monetary Instrument Problem 207  
8.3 Generalized Disturbances and the Role of Information 210  
8.4 A Rational Expectations Model of a Small Open Economy 214  
8.5 General Solution 216
# Contents

8.6  Jointly Optimal Wage Indexation and Monetary Policies 219  
8.7  The Barro-Gordon Model 227  
8.8  Conclusions 229  
      Notes 230  

III  Intertemporal Optimization 231  

9  The Representative Agent Model 233  
   9.1  Introduction 233  
   9.2  The Framework and Macroeconomic Equilibrium 234  
   9.3  Sustainability of Equilibrium 242  
   9.4  Unanticipated Permanent Increase in Government Expenditure 245  
   9.5  Temporary Increase in Government Expenditure 254  
   9.6  Government Expenditure as a Productive Input 258  
   9.7  Term Structure of Interest Rates 261  
   9.8  Money in the Utility Function 265  
   9.9  Population Growth 271  
   9.10  The Representative Agent Model: Some Caveats 273  
       Appendix 275  
       Notes 278  

10  Equilibrium in a Decentralized Economy with Distortionary Taxes and Inflation 281  
   10.1  Introduction 281  
   10.2  The Macroeconomic Structure 283  
   10.3  Perfect Foresight Equilibrium 289  
   10.4  Determination of Optimality Conditions for Households 290  
   10.5  Determination of Optimality Conditions for Firms 292  
   10.6  Equilibrium Structure and Dynamics of the System 299  
   10.7  Steady State 301  
   10.8  Characterization of Alternative Steady States 303  
   10.9  Dynamic Response to Monetary Expansion 307  
   10.10  Interior Debt-to-Equity Ratio 310  
   10.11  A Final Comment 312  
       Notes 313  

11  A Dynamic Analysis of Taxes 315  
   11.1  Introduction 315  
   11.2  The Framework 317  
   11.3  Macroeconomic Equilibrium 325  

Contents

11.4 Steady-State Effects 326
11.5 Transitional Dynamics 331
11.6 The Dynamics of Policy Shocks 332
11.7 Short-Run Effects of Increases in Tax Rates 334
11.8 Tax Incidence 340
11.9 Optimal Taxation 342
11.10 Time Inconsistency 346
   Notes 352

12 The Representative Agent Model in the International Economy 355
12.1 Introduction and Overview 355
12.2 Basic Monetary Model 356
12.3 Real Model of Capital Accumulation 363
12.4 Some Extensions 384
   Notes 388

13 An Introduction to Endogenous Growth Models 391
13.1 Introduction 391
13.2 Externalities and Ongoing Growth 393
13.3 Integrated Fiscal Policy and Endogenous Growth 395
13.4 A Linear Endogenous Growth Model 398
13.5 Productive Government Expenditure 416
13.6 Two-Sector Model 419
13.7 Conclusions 423
   Notes 424

IV Continuous-Time Stochastic Models 427

14 Continuous-Time Stochastic Optimization 429
14.1 Introduction 429
14.2 Some Basic Results from Continuous-Time Stochastic Calculus 431
14.3 A Basic Stochastic Intertemporal Model 436
14.4 Two Examples 446
14.5 Proportional Disturbances and Stochastic Growth 450
14.6 Some Extensions 464
14.7 Some Previous Applications of Continuous-Time Stochastic Methods to Economics 466
14.8 Real Business Cycle Model 467
   Appendix 469
   Notes 471
