

Thomas Straubhaar

On the Economics of International Labor Migration

Verlag Paul Haupt Bern und Stuttgart

LIST OF CONTENTS

PART I	INTERNATIONAL LABOR MIGRATION AS AN ECONOMIC PHENOMENON	17
1	International Labor Migration and the Positive Theory of International Economics	18
1.1	The Ricardo-Model	18
1.2	The Heckscher-Ohlin-Samuelson-Model	19
1.3	Mundell's Contribution	20
1.4	A Step Towards a more General Analysis	23
1.5	Conclusions	28
2	International Labor Migration and the Normative Theory of International Economics	31
2.1	A Basic View	31
2.2	A Domestic View	33
2.3	An Extended Domestic View	35
2.4	A Generalization	38
2.5	Conclusions	40
PART II	INTERNATIONAL LABOR MIGRATION AS AN EMPIRICAL PHENOMENON	43
3	On Measuring Migration Flows	47
3.1	Definition Problems	47
3.2	Statistical Problems	49
3.3	Additional Problems	50
3.4	Conclusion	51
4	The European Experience	53
4.1	The Early Beginning of Temporary European Migration	53
4.2	Relatively High Reliability of European Migration Data	59
4.3	Conclusion: The Procedure of our Study	61

PART III	THE ECONOMIC DETERMINANTS OF INTERNATIONAL LABOR	
	MIGRATION	65
5	On Modeling the Microeconomic Determinants of International Labor Migration	67
5.1	A Basic Push-Pull Factors Approach	68
5.2	A Human Capital Approach	70
5.3	Limits of Modeling the Microeconomic Determinants of International Labor Migration	75
5.4	Conclusions: The "New Economics of Labor Migration"	79
6	On Modeling the Macroeconomic Determinants of International Labor Migration	84
6.1	The Macroeconomic Push and Pull Factors of International Labor Migration in the Case of the European Emigration Countries	85
6.1.1	The Case of Italy	85
6.1.2	The Case of Greece	88
6.1.3	The Case of Portugal	92
6.1.4	The Case of Spain	97
6.1.5	The Case of Turkey	101
6.2	Econometric Results	105
6.3	The Economic Determinants of Immigration Control Systems	111
6.4	Removing the Migration Restrictions: International Labor Migration within a Common Labor Market	119
6.5	The Dynamics of Labor Migration	123
6.6	Conclusions	126
PART IV	THE ECONOMIC CONSEQUENCES OF INTERNATIONAL	
	LABOR MIGRATION	129
7	On Measuring the Economic Consequences of International Labor Migration	131
7.1	Labor Market Effects	134
7.2	Human Capital Effects	136
7.3	Consumption Effects	137
7.4	Balance of Payments Effects	139

7.5 Long Term Effects	141
7.6 Conclusions	142
8 Some Empirical Results about the Consequences of International Labor Migration	145
8.1 Labor Market Effects	145
8.2 Human Capital Effects	147
8.3 Effects of Remittances	149
8.3.1 Income Effects	152
8.3.2 Private Consumption Effects	156
8.3.3 Savings and Investment Effects	158
8.4 Balance of Payments Effects	160
8.4.1 Import Effects	162
8.4.2 Foreign Exchange Rate Effects	164
8.5 Conclusions	165
PART V THE INTERDEPENDENCE OF THE CAUSES AND CONSEQUENCES OF INTERNATIONAL LABOR MIGRATION	169
9 A Simultaneous-Equations Approach	170
9.1 The Need for a Simultaneous-Equations Model	172
9.2 Setting up a Simultaneous-Equations Model	174
9.3 The Formal Prototype Model	181
9.4 The Dynamics of the Model	184
9.5 Conclusions: Pros and Cons of the Model	187
10 Empirical Estimation of the Simultaneous-Equations Model	191
10.1 Empirical Estimation of the Single Model Equations	192
10.2 Empirical Estimation of the Complete Model	199
10.3 An Interpretation of the Results	205
10.3.1 The Emigration Equation	206
10.3.2 The Unemployment Equation	209
10.3.3 The Real Income Per Capita Equation	210
10.4 A Simulation Exercise	211
10.5 Conclusions: What Can We Learn from our Simultaneous-Equations Model?	212

PART VI CONCLUSIONS

- 11 On the Economic Causes of International Labor Migration
- 12 On the Economic Consequences of International Labor Migration

219

221

227
