

**Uniaxial Stress-Strain Curves  
for  
Normal and High Strength Concrete**

**Kaare K. B. Dahl**

# List of contents

<b>Notation</b> .....	<b>1</b>
<b>1 Introduction</b> .....	<b>3</b>
<b>2 Previous models</b> .....	<b>5</b>
2.1 The Tomaszewicz model .....	5
2.2 The CEB model .....	7
2.3 The Exner model .....	9
2.4 Summary .....	11
<b>3 Test equipment</b> .....	<b>13</b>
3.1 The test rig .....	13
3.2 Calibration of the test rig .....	16
3.2.1 Calibration of the 1000 tons hydraulic jack .....	16
3.2.2 Calibration of the center steel cylinder .....	17
3.2.3 Calibration of the 4 steel columns .....	18
3.3 Calculating the stress-strain curve .....	21
<b>4 Experimental program</b> .....	<b>23</b>
4.1 The scope of the investigation .....	23
4.2 Description of the concrete .....	24
4.2.1 Materials .....	24
4.2.2 Mix proportions .....	25
4.2.3 Mixing, casting and curing .....	27
4.2.4 Uniaxial compressive strength .....	28
<b>5 Experimental results</b> .....	<b>31</b>
5.1 Uniaxial test data .....	31
5.2 The stress-strain curves .....	37
5.3 Cracks in the concrete .....	38

<b>6</b>	<b>Discussion of experimental results</b>	<b>41</b>
6.1	E-modulus	41
6.2	Strain at peak stress	42
6.3	Concrete versus mortar	46
6.4	Modelling the stress-strain curve	48
6.5	Cracks in the concrete	50
<b>7</b>	<b>Conclusion</b>	<b>55</b>
	<b>References</b>	<b>57</b>

**Appendix 1      Uniaxial stress-strain curves**

**Appendix 2      Photographs of crack systems at various concrete strains**
