Preface .....	vii
---------------	-----

## **Part I. Models:**

<b>1. Sophisticated Stormwater Quality Modeling is Worth the Effort</b>	
<i>Sutherland and Jelen</i> .....	<b>1</b>
1.1 Introduction .....	1
1.2 Background .....	2
1.3 Runoff Volumes .....	4
1.4 Solids Washoff .....	5
1.5 Washoff of other pollutants .....	9
1.6 Performance of Street Cleaning Practices .....	10
1.7 Expected Loads and Benefits of Street Cleaning .....	11
1.8 Recommendations .....	12
<b>2. Calibration of SWMM-EXTRAN using Short-Term Continuous Simulation</b>	
<i>Schmidt, Bergman, Smith, and Cunningham</i> .....	<b>15</b>
2.1 Introduction .....	16
2.2 Methodology .....	19
2.3 Results .....	23
2.4 Discussion .....	26
<b>3 Continuous In-Stream Temperature Modeling: Integration with A Physically-Based Subwatershed Hydrology Model</b>	
<i>Schroeter, Van Vliet, Boehmer and Beach</i> .....	<b>27</b>
3.1 Blair, Bechtel, and Bauman Creeks Watersheds Study ...	28
3.2 Review of Processes .....	28
3.3 Model Formulation .....	33
3.4 Model Application .....	38
3.5 Critical Evaluation of Temperature Modeling Concept .....	46
3.6 Conclusion .....	47

<b>4. Reconciliation of Hydrologic Models to Coastal Flatland Watersheds</b>	
<i>Solanki and Suau</i> .....	<b>49</b>
4.1 Introduction .....	49
4.2 Basis for Study .....	50
4.3 Verification .....	55
4.4 Discussion .....	58
4.5 Conclusions .....	62
<b>5. Operational Model Development for a Regional Municipality</b>	
<i>Gray and Despault</i> .....	<b>65</b>
5.1 Background .....	66
5.2 Operational Model Selection .....	68
5.3 Collection System Sub-Model Development .....	69
5.4 Operational Model Analysis .....	76
5.5 Operational Changes .....	79
5.6 Conclusions .....	81

**Part 2. Data Management:**

<b>6. Modeling and Monitoring Inflow Reduction Programs</b>	
<i>Juza, Vilhauer and Adderley</i> .....	<b>83</b>
6.1 Background .....	83
6.2 Inflow Reduction Techniques .....	84
6.3 Modeling Infiltration Sumps and Roof Drain Disconnection ...	86
6.4 Current Monitoring and Modeling Practices .....	87
6.5 Concerns with Modeling and Monitoring Inflow Reduction ....	90
6.6 Model Limitations .....	93
6.7 Recommendations .....	94
6.8 Conclusion .....	96
<b>7. A Computer Mapping Program for Sewer Systems</b>	
<i>Shamsi, Benner and Fletcher</i> .....	<b>97</b>
7.1 Introduction .....	97
7.2 GIS Pilot Project .....	99
7.3 Needs Assessment .....	100
7.4 Mapping Requirements .....	102
7.5 Database Requirements .....	105
7.6 Computer System Configuration .....	107
7.7 Results .....	108
7.8 Conclusions .....	114

<b>8. Management of Time Series Data for Long-term Continuous Stormwater Modeling</b>	
<i>Gregory and James</i> .....	<b>115</b>
8.1 Introduction .....	116
8.2 Information Acquisition and Exchange .....	119
8.3 Time Series Data Management .....	124
8.4 Design and Testing of a Time-Series Manager .....	133
8.5 Conclusions .....	146
Appendix .....	151
<b>9. The Use of Neural Networks, Principal Component Analysis and Universal Process Modeling for the Interpretation of Environmental Data</b>	
<i>Cancilla and Fang</i> .....	<b>153</b>
9.1 Experimental Design .....	154
9.2 Between-Site Variability .....	158
9.3 Within-Site Variability .....	162
9.4 Conclusions .....	165
<b>10. An Update on Consolidated Frequency Analysis</b>	
<i>Ponnambalam</i> .....	<b>171</b>
10.1 Introduction .....	171
10.2 State of the Art .....	172
10.3 Critique of State-of-the-Art Methodologies .....	173
10.4 An Alternative to Frequency Analysis .....	174
10.5 Results .....	175
10.6 Conclusions .....	176
<b>11. Regional Estimation of Short-Duration Rainfall Distribution using Available Daily Rainfall Data</b>	
<i>Nguyen and Wang</i> .....	<b>179</b>
11.1 Introduction .....	180
11.2 Methodology .....	181
11.3 Application .....	182
11.4 Conclusions .....	185
<b>12. Design Storm Events for Urban Drainage Based on Historical Rainfall Data: a Conceptual Framework for a Logical Approach</b>	
<i>Rivard</i> .....	<b>187</b>
12.1 Design Storm Concept: Historical Perspective .....	188
12.2 Proposed Conceptual Framework .....	190
12.3 A Case Study: Design Storm Events for the Montréal Metropolitan Area .....	192
12.4 Comparison with Synthetic Design Storms .....	196
12.5 Conclusions .....	198

### **Part 3. Water Quality and BMP Issues:**

<b>13. Quality Control Optimization of Extended Detention Dry Ponds</b>	
<i>Papa and Adams</i> .....	<b>201</b>
13.1 Introduction .....	202
13.2 Statistical Analysis of Rainfall .....	203
13.3 Model of Urban Drainage System .....	204
13.4 Detention Storage Requirements and Outflow Rate .....	206
13.5 Suspended Solids (SS) Removal Efficiency .....	207
13.6 Input Parameters Used in Analysis .....	209
13.7 Results of Analysis .....	211
13.8 Sensitivity Analysis .....	212
13.9 Conclusions .....	221
Notation .....	221
<b>14. Stormwater Discharge Permitting - Experiences in a Rural Western State</b>	
<i>Bugosh</i> .....	<b>223</b>
14.1 Background Information .....	223
14.2 Montana's Stormwater Discharge Permit Program .....	226
14.3 Evaluation of Program Success .....	229
14.4 Precautions for Stormwater Modeling in Montana (and similar areas) .....	234
14.5 MPDES Stormwater Discharge Permit Fees .....	236
14.6 Conclusions from Montana's Experience with Stormwater Permitting .....	237
<b>15. Retention of an Existing Wetland for Stormwater Management - A New Approach for Calgary, Alberta</b>	
<i>van Duin, Gareau, Jalkotzy and McAuley</i> .....	<b>239</b>
15.1 Rocky Ridge Subdivision Stormwater Management Concept	240
15.2 Developments in Stormwater Management in the Calgary Area .....	241
15.3 Description of the Wetland .....	242
15.4 Methods Used for Evaluating Stormwater Storage Requirements .....	243
15.5 Pre- and Post-Development Runoff Rates and Volumes ...	244
15.6 Protecting the Integrity of the Wetland .....	245
15.7 Monitoring Program .....	250
15.8 Evaluation of Benefits .....	252
15.9 Conclusions .....	253

<b>16. Estimated CSO Conventional and Toxic Concentrations from Analysis of Wastewater Treatment Plant Influent Data</b>	
<i>Kummler, Lin and Rhee</i> .....	<b>257</b>
16.1 Background .....	258
16.2 Methodology .....	261
16.3 Results and Discussion .....	262
16.4 Conclusion .....	262
<b>17. Trace Metals Contamination of Urban Streams and Stormwater Detention Ponds</b>	
<i>Licsko and Struger</i> .....	<b>269</b>
17.1 Introduction .....	269
17.2 Water and Sediment Sampling Methodology .....	270
17.3 Results and Discussion .....	271
17.4 Conclusions .....	276
<b>18. Software and Database Access to 1736 papers of (a) 28 European Specialty Conferences, and (b) the 6 International Conferences, on Urban Storm Drainage 1978-1994</b>	
<i>James, James and Rowe</i> .....	<b>279</b>
18.1 Introduction .....	279
List of conferences .....	282
Listing of titles from European conferences .....	284
Listing of titles from International conferences .....	284

## **Part 4. Reference**

Glossary .....	339
Acronyms and Abbreviations .....	407
Programs and Models .....	413
SI-US Unit Conversion .....	417
Editor and Reviewers: Affiliations and Photographs .....	419
Chapter Authors: Affiliations and Photographs .....	423
Index .....	429
