Contents

	Preface and Acknowledgments	xiii
1	What Is Cryptic Female Choice?	3
1.1	Sexual Selection Results from Competition for Female Gametes, Not for Females	3
1.2	How to Recognize Cryptic Female Choice	7
1.3	Female "Rules of the Game"	10
1.4	Taxonomic and Conceptual Biases of This Book	20
1.5	Relationship with Genitalic Evolution	21
1.6	Relationship with Male-Female Conflict	22
1.7	Previous Biases: Male-Female Cooperation and "the Good of the Species"	27
1.8	Previous Biases: Overly Strict Categorizations and "Fertilization Myopia" <i>Morphology; Behavioral Evolution and Physiology</i>	28
1.9	Previous Biases: Male Control and Female Passivity	34
1.10	Summary	42
	Notes	43
2	Selection on Cryptic Female Choice	44
2.1	Female Control Mechanisms and Natural Selection	45
2.2	Categorical Descriptions and the Multiplicity of Female Sperm Storage Mechanisms <i>Multiple Specialized Sperm Storage Organs; Sperm at Other Sites in the Female Reproductive Tract; Sperm Outside the Female Reproductive Tract; Female Variations and Male Dimorphisms; Consequences</i>	50
2.3	Genetic Variance among Males	61
2.4	Conditions Favoring the Evolution of Cryptic Female Choice	64
2.5	A Test Case: Bedbugs	65
2.6	Relationship between Cryptic Female Choice and "Sensory Traps"	67

2.7	Do All Female-imposed "Rules of the Game" Result in Sexual Selection on Males?	70
2.8	Good Genes, Runaway, or Endless Race?	73
2.9	Summary	77
	Notes	78
3	Principal Mechanisms of Cryptic Female Choice	80
3.1	Criteria	80
3.2	Sometimes Discard Sperm of Current Male	81
3.3	Sometimes Discard Sperm of Previous Males	88
3.4	Sometimes Prevent Complete Intromission and Ejaculation	94
3.5	Sometimes Fail to Transport Sperm to Storage Organs or Fertilization Sites	102
3.6	Sometimes Remate with Another Male	111
3.7	Sometimes Reduce Rate or Number of Offspring Produced	119
3.8	Sometimes Forcefully Terminate Copulation before Sperm Are Transferred	125
3.9	Sometimes Fail to Ovulate	133
3.10	Sometimes Fail to Mature Eggs (Vitellogenesis)	139
	Notes	140
4	Other Mechanisms of Cryptic Female Choice	142
4.1	Sometimes Fail to Prepare Uterus for Embryo Implantation	142
4.2	Sometimes Impede Plugging of Reproductive Tract	146
4.3	Sometimes Impede or Fail to Carry Out Plug Removal	153
4.4	Sometimes Remove Spermatophore before Sperm Transfer Is Complete	155
4.5	Sometimes Abort Zygotes (Bruce Effect)	162
4.6	Biased Use of Stored Sperm <i>Interejaculate Biases; Intraejaculate Biases</i>	167
4.7	Sometimes Move Previous Male's Sperm to a Site Where the Current Male Can Manipulate Them	174
4.8	Sometimes Make Subsequent Sperm Transfer More Difficult Morphologically	179
4.9	Sometimes Resist Male Manipulations That Result in Discharge of His Spermatophore	182

4.10	Sometimes Invest Less in Each Offspring	184
4.11	Choose among Sperm That Have Reached the Egg	187
4.12	Cryptic <i>Male</i> Choice	189
4.13	Undetermined Mechanisms	190
4.14	Discussion of Chapters 3 and 4	197
4.15	Summary	202
	Notes	203
5	Evidence That Cryptic Female Choice Is Widespread, I: Copulatory Courtship and Related Phenomena	204
5.1	Copulatory Courtship	204
5.2	Genitalic Movements during Copulation as Courtship	219
	<i>Evidence of Widespread Occurrence; Evidence of Courtship Effects; Multiple Ejaculations; Copulation Duration</i>	
5.3	Other Evidence of Copulation as Courtship	239
	<i>Clasping (Genitalic and Nongenitalic) as Courtship; Copulation outside Female Fertile Periods</i>	
5.4	Stimulation Necessary to Trigger Ejaculation	248
	<i>Natural Selection on Ejaculation Time; Evidence of Sexual Selection; Alternative Explanations for Preejaculatory Delays</i>	
5.5	Summary	254
	Notes	255
6	Evidence That Cryptic Female Choice Is Widespread, II: Effects of Male Sexual Products on Females	256
6.1	Two Hypotheses	257
6.2	Insects	258
	<i>"Invasive" Action of Male Substances; Multiplicity of Cues for the Same Female Process; Graded Female Responses to Quantitative Variation in Male Cues; Interspecific Diversity of Male Products; Triggering of Appropriate Female Responses; Mimicry of Female Messenger Molecules; Sperm vs. Other Seminal Products as Signals</i>	
6.3	Ticks	291
	<i>Invasive Action of Male Substances; Multiplicity of Cues for the Same Female</i>	

	<i>Process; Graded Female Responses to Quantitative Variation in Male Cues; Interspecific Diversity of Male Products; Mimicry of Female Messenger Molecules</i>	
6.4	Mammals <i>Induce Muscle Contraction (Transport); Hormones; Induce Reproductive Readiness</i>	298
6.5	Other Animals	303
6.6	A Third Hypothesis: Nutritional Effects on Females <i>The Importance of Distinctions; Difficulties in Making Distinctions; Possible Criteria for Distinctions</i>	304
6.7	Taking Stock	315
6.8	Summary	317
	Notes	318
7	Evidence That Cryptic Female Choice Is Widespread, III: Male and Female Morphology	331
7.1	Female Reproductive Ducts: A Tortuous Route to the Egg <i>Obstacles to Insemination and Female Control; Physiological Barriers; What Do Female Barriers Prevent? What Do Females Gain from Barriers?</i>	331
7.2	Frequent Rapid, Divergent Evolution of Genitalia <i>The Special Problem of Asymmetric Tests; Experimental Tests; Other Evidence; New Ideas; Summary of Evidence on Genital Evolution</i>	349
7.3	Summary	365
	Notes	366
8	Related Topics	367
8.1	Significance of Variation in Volumes of Ejaculates and Sperm Storage Organs <i>Possible Explanations of Oversized Ejaculates; Possible Explanations of Undersized Ejaculates; What Determines the Sizes of Sperm Storage Organs?</i>	367
8.2	Intraspecific Variation in Cryptic Female Choice Criteria and Sexual Selection Theory	384
8.3	Relative and Absolute Female Criteria in Cryptic Female Choice	386

8.4	A Possible Relationship between Infertile Eggs and Overly Aggressive Sperm	389
8.5	"Mistimed" Matings	394
8.6	Summary	396
9	Evidence Ruling Out Cryptic Female Choice: Is It Common?	397
9.1	Lack of Variation in Female Processes Determining Paternity <i>Variation in Insemination Success; Variation in Sperm Precedence</i>	397
9.2	Lack of Correlation between Paternity and Other Male Characters	406
9.3	Lack of Intraspecific Genetic Differences	407
9.4	Female Monandry	411
9.5	Summary	414
	Notes	415
10	Summary and Conclusions	416
10.1	Overview of the Arguments	417
10.2	Consequences for Sexual Selection Theory	418
	References	423
	Subject Index	489
	Taxonomic Index	492
