

Fiscal Theory

Government, Inflation, and Growth

Hans Brems
University of Illinois

LexingtonBooks
D.C. Heath and Company
Lexington, Massachusetts
Toronto

Contents

	Figures	xi
	Tables	xiii
	Preface	xv
	Acknowledgments	xvii
	Introduction on Scope and Method	xix
<i>Part I</i>	<i>The Setting</i>	1
Chapter 1	A Touch of Fiscal History	3
Chapter 2	Recent History as Experienced in Six Macroeconomic Functions	11
Chapter 3	Early Macroeconomic Theory: Unemployment and Inflation	21
	I. Unemployment Theory	22
	II. Inflation Theory	27
	III. Keynesians and Monetarists Compared	32
<i>Part II</i>	<i>The Short Run</i>	37
Chapter 4	Keynesian Short-Run Statics: One or Two Equilibrating Variables	39
	I. Notation	39
	II. One Equilibrating Variable	40
	III. Two Equilibrating Variables	44
Chapter 5	Short-Run Semidynamics: Government and Four Equilibrating Variables— A Nonaccommodating Fiscal Policy	49
	I. Notation	49
	II. The Model	50
	III. Solutions for Balanced-Budget Case	55

	IV. The Rates of Change of Solutions	58
	V. Conclusions	59
Chapter 6	Short-Run Semidynamics: Government and Four Equilibrating Variables—An Accommodating Fiscal Policy	61
	I. Solutions for Nonbalanced-Budget Case	62
	II. The Rates of Change of Solutions	64
	III. Fiscal Equilibrium	65
	IV. Conclusions	71
<i>Part III</i>	<i>The Long Run</i>	73
Chapter 7	Long-Run Dynamics: The Neoclassical Growth Parable Revisited	75
	I. Notation	75
	II. The Model	76
	III. Convergence to Steady-State Growth	77
	IV. Five Properties Confronted with Historical Reality	79
Chapter 8	Monetarist Long-Run Dynamics: Three Equilibrating Variables	93
	I. Notation	94
	II. The Model	95
	III. Steady-State Equilibrium Growth Solutions	99
	IV. Steady-State Equilibrium Level Solutions: The Rates of Interest	101
	V. Nonsteady-State Growth: Crowding Out and Crowding In	106
	VI. Conclusions	110
Chapter 9	Full Long-Run Dynamics: Government, Inflation, and Growth	113
	I. Notation, Definitions, and Sectors	113
	II. Firms	116
	III. Households	120
	IV. Government	128
	V. Equilibrium	130
	VI. Steady-State Equilibrium Growth Solutions	130

	VII. Steady-State Equilibrium Level Solutions: Rates of Interest, Capital Coefficient, and the Real Wage Rate	139
	VIII. Nonsteady-State Growth: Crowding Out and Crowding In	147
	IX. Conclusions	156
<i>Part IV</i>	<i>The End</i>	159
Chapter 10	Conclusions and Reality	161
	Part I. The Setting	161
	Part II. The Short Run	162
	Part III. The Long Run	164
	Index	173
