## Optimization and Operations Research

Proceedings of a Workshop Held at the  
University of Bonn, October 2–8, 1977

FB Mathematik TUD

58271438

Edited by  
R. Henn, B. Korte, and W. Oettli

---

Fachbereich Mathematik  
Technische Hochschule Darmstadt  
Bibliothek

Springer-Verlag  
Berlin Heidelberg New York 1978

Inv.-Nr. B 17 030

TABLE OF CONTENTS

A. Bachem	
The theorem of Minkowski for polyhedral monoids and aggregated linear diophantine systems . . . . .	1
S. Baum and L.E. Trotter, Jr.	
Integer rounding and polyhedral decomposition for totally unimodular systems . . . . .	15
D. Bierlein	
Measure extensions according to a given function . . . . .	25
B. Brosowski	
On parametric linear optimization . . . . .	37
P. Brucker	
On the complexity of clustering problems . . . . .	45
R.E. Burkard and U. Zimmermann	
The solution of algebraic assignment and transportation problems . . . . .	55
L. Collatz	
Application of optimization methods to the solution of operator equations . . . . .	67
B. Dejon	
A note on directional differentiability of flow network equilibria with respect to a parameter . . . . .	73
U. Derigs	
On solving symmetric assignment and perfect matching problems with algebraic objectives . . . . .	79
R. Euler	
Generating maximum members of independence systems . . . . .	87
W. Gaul	
Remarks on stochastic aspects on graphs . . . . .	95
M. Grötschel and M.W. Padberg	
On the symmetric travelling salesman problem: Theory and computation . . . . .	105
J. Gwinner	
On the existence and approximation of solutions of pseudomonotone variational inequalities . . . . .	117
J. Hartung	
Minimum norm solutions of convex programs . . . . .	127
D. Hausmann and B. Korte	
Oracle-algorithms for fixed-point problems - an axiomatic approach . . . . .	137

K. Hinderer and D. Kadelka	
The general solution of a classical stochastic inventory problem and its generalization . . . . .	157
R. Kannan and C.L. Monma	
On the computational complexity of integer programming problems . . . . .	161
P. Kosmol	
On stability of convex operators . . . . .	173
F. Lempio and H. Maurer	
Differentiable perturbations of infinite optimization problems . . . . .	181
L. Matthews	
Matroids on the edge sets of directed graphs . . . . .	193
Ph. Michel	
A discrete time maximum principle in a stochastic case . . . . .	201
E.J. Muth and K. Spremann	
A class of stationary EOQ problems and learning effects . .	209
E. Sachs	
Optimal control for a class of integral equations . . . .	223
M. Schäl	
On the M/G/1-queue with controlled service rate . . . . .	233
C.P. Schnorr	
Multiterminal network flow and connectivity in unsymmetrical networks . . . . .	241
M. Vlach	
Augmented penalty function technique for optimal control problems . . . . .	255
J. Zowe and H. Maurer	
Optimality conditions for the programming problem in infinite dimensions . . . . .	261
