CONSTITUTIVE EQUATIONS AND THEIR

APPLICATION IN FINITE ELEMENT ANALYSIS

Xiaoqing Yin

Preface

Summary (in Chinese, Danish, English)

PART I: CONSTITUTIVE EQUATIONS FOR CONCRETE

PART II: CONSTITUTIVE MODELING OF POST-CRACK BEHAVIOR OF REINFORCED CONCRETE AND ITS FINITE ELEMENT ANALYSIS

Notations

Chapter 1	Introduction			
	1.1	.1 Background		
	1.2	Aim of the present work	7	
	1.3	3 Summary of the contents		
Chapter 2	Material Properties and Constitutive Models			
	2.1	Constitutive modeling of reinforcement	9	
		2.1.1 General characteristics of		
		reinforcement	9	
		2.1.2 Constitutive models for		
		reinforcement	10	
	2.2	Constitutive modeling of plain concrete	11	
		2.2.1 Uniaxial behavior of concrete		
		and its modeling	12	
		2.2.2 Biaxial property of concrete		
		and its modeling	18	
	2.3	Constitutive modeling for reinforced		
		concrete elements	23	
		2.3.1 General consideration	23

÷ .

	2.3.2	Tension stiffening	24	
	2.3.3	Reduction of concrete		
		compressive strength	31	
	2.3.4	Changing of crack direction	- 34	
Chapter 3	Crack M	odels with the Consideration of Crack		
	Direction	n Change	36	
	3.1 Crac	k orientation in a reinforced		
	conc	rete element	36	
	3.2 The	mechanism of the change in a crack		
	direc	ction	38	
	3.3 Crac	ek models	43	
	3.3.1	Swing crack model	. 44	
	3.3.2	2 Gupta's model	46	
	3.3.3	Fracture model	55	
	3.3.4	Present changing crack model	62	
Chapter 4	Finite Element Formulation			
	4.1 Basi	c equations	72	
	4.2 Elen	nent modeling for concrete and		
	reinf	forcement	75	
	4.3 Fini	te element modeling of cracks	78	
	4.4 Nun	nerical solutions and development of	•	
	com	puter programs	80	
	4.4.1	Numerical integration	80	
	4.4.2	2 Solution methods	81	
	4.4.3	3 Developed computer programs	84	
Chapter 5	Numerical studies			
	5.1 Coll	ins' Panels	87	
	5.1.1	1 Verification of the proposed	97	
	/	model	01	
	5.1.3	2 The influence of the tensile strength of	0.0	
	.	concrete on snear capacity	90	
	5.1.	3 The influence of θ change on the	0.4	
		stress in reinforcement	94	

	5.1.4 The influence of tension stiffening on the	
	stress in reinforcement	97
	5.2 T-beam failed in shear	99
Chapter 6	Conclusions	105
