Preface		xi
PART ONE THE POLICY IN THEORY AND PRACTICE		1
I Introduction		3
II The Case for New Keynesian Demand Management		11
1 Three Competing Strategies		11
2 The Merits and Demerits of Cross-Linked Keynesianism		14
3 The Merits and Demerits of Orthodox Keynesianism		18
4 The Merits and Demerits of New Keynesianism		20
5 The Demerits of Monetarism		22
6 Some Further Implications of New Keynesianism		24
III Three Financial Targets: Money Income, Balance of Payments and Investment Ratio		26
1 Introductory		26
2 The Money Income Target: Coverage		26
3 The Money Income Target: Rate versus Path of Growth		31
4 The Money Income Target: Choice of Growth Rate		34
5 The Balance of Payments Target		40
6 The Investment Ratio Target		41
7 Short-Term and Long-Term Targets		44
IV Three Financial Weapons: Fiscal, Monetary and Foreign-Exchange Measures		46
1 Four Types of Time Lag		46
2 Fiscal Measures		47
3 Monetary Measures		52
4 Variations in the Foreign-Exchange Rate		58
V The Marriage of Weapons and Targets		62
1 Introduction		62

2	A First Draft of the Rules of the Game	64
3	A Revised Set of Rules of the Game	69
4	International Co-operation in Monetary and Foreign-Exchange Policies	70
5	Cross-Linkage Revisited	72
6	The Procedures Actually Adopted in this Volume	73
VI	Discretionary Interventions	77
1	Some Examples of Adjustment of the Policy Targets	77
2	Treatment of Unspecified Shocks to the System	78
3	Structural Forward Planning	80
PART TWO	RERUNNING HISTORY	83
VII	The Formulation and Historical Application of the Control Rules	85
1	The Nature of the Exercise	85
2	Policy Targets for the Rerun of History	87
3	Feedback Rules for the Control Variables	88
4	The Base Run: Derivation of Unspecified Shocks	91
5	Modification of the Exogenous Variables in the Base Run	93
6	Discretionary Modification of the Economic Targets	94
7	Structural 'Feedforward' Planning	95
	Note to Chapter VII on the Statistical Series	96
VIII	Results of the Rerun	98
1	Keeping to the Target Paths	98
2	Some Structural Implications	112
	Note to Chapter VIII on the Effect of Price Compensation in Wage Bargaining on the Stability of New Keynesian Policies	123
PART THREE	SOME ADMINISTRATIVE PROBLEMS OF FISCAL CONTROL	127
IX	The Use of Indirect Taxes as a Regulator	129

1	Quantitative Effects	129
2	The Distinction between the 'Destination' Principle and the 'Origin' Principle	130
3	Existing Powers to Vary Indirect Taxes for the Regulation of Demand	131
4	The Administration of Variations in the Rates of Excise Duties	132
5	The Administration of Variations in the Rate of VAT	133
X	The Use of Income Tax as a Regulator	142
1	Some General Costs of a Change of Tax Schedules	142
2	The Difference between Cumulative and Non-Cumulative PAYE Systems	143
3	One Solution of the Problems due to the Cumulative System	145
4	Regulatory Changes on a Non-Cumulative Principle	145
	Note 1 to Chapter X	146
	Note 2 to Chapter X	148
XI	The Use of a Wages Tax as a Regulator	150
1	Background	150
2	Present Arrangements for the National Insurance Surcharge	151
3	Flexibility within the Present System	152
4	A Regulator Power Using the Existing National Insurance System	153
5	A Separate Tax on the Wage Bill	155
6	Conclusions	157
	Note to Chapter XI on National Insurance Benefit Entitlement	157
PART FOUR THE DERIVATION OF CONTROL RULES FOR ECONOMIC POLICY		159
XII	Feedback Systems and Economic Policies	161
1	Some Special Models and Policies	161
2	Transfer Functions	168
3	The Benefits and Costs of Feedback	173
4	The Structure of a New Keynesian Policy	177

XIII	Frequency-Response Methods for Policy Design	182
1	The Problem of Stability	182
2	The Nyquist Theorem	182
3	Frequency Responses and Transfer Functions	189
4	Frequency Response and System Performance	196
5	Factors Limiting Performance	208
6	Multivariable Systems	210
7	Design Techniques	214
8	Why Not 'Optimal Control'?	216
XIV	The Design and Performance of New Keynesian Policies	219
1	Introduction	219
2	Obtaining a Linear Model	219
3	The Initial Design	221
4	A More Robust Design	233
5	The Proposed Policy	235
6	A Summary of Policy Performance	247
Appendix A	The Economic Model	250
1	The Purpose of the Model	250
2	The Basic Structure of the Model	251
3	Notation and Layout of the Model	257
4	Equations of the Model	258
5	Dynamic Multipliers	285
6	Equations for the Proposed Policy Rules	290
Appendix B	The Policy Rules Discussed in Chapter XIV	294
