

"ELASTIC-PLASTIC BUCKLING OF LONG PLATES IN COMPRESSION"

Civilingeniør Kim Rasmussen

BIBLIOTHEK  
Konstruktiver Ingenieurbau  
TU Darmstadt, FB 13  
Petersenstraße 12  
64287 Darmstadt

Institut f. Massivbau  
der Techn. Hochschule Darmstadt

Inv.-Nr. 7783

Department of Structural Engineering  
Technical University of Denmark

| <u>CONTENTS</u>   | Page |
|---|------|
| Summary   | I    |
| Preface   | III  |
| Contents  | IV   |
| Symbols   | V    |
| 1. Introduction.....  | 1    |
| 2. Previous work.....   | 5    |
| 3. Theory.....  | 11   |
| 3.1 Assumptions.....  | 11   |
| 3.2 Solution Procedure.....   | 13   |
| 3.2.1 Changes in LEM, Discretisation.....   | 14   |
| 3.2.2 Changes in LEM, Displacement functions.....   | 16   |
| 3.2.3 Changes in LEM, Geometric imperfections.....  | 19   |
| 4. Computer Program.....  | 23   |
| 4.1 Displacement functions used in the computer analysis.....   | 23   |
| 4.2 Discretisation, convergence criterion and increment size.....   | 29   |
| 4.3 Graphic presentation of the results.....  | 33   |
| 5. Results.....   | 34   |
| 5.1 Comparison with previous work.....  | 35   |
| 5.1.1 Elastic analysis.....   | 35   |
| 5.1.2 Elastic-plastic analyses.....   | 41   |
| 5.2 Localized buckling.....   | 57   |
| 5.3 Influence of the three different types of geometric imperfections on the behaviour of a long plate.....                                 | 67   |
| 5.3.1 Ripple distortion.....  | 67   |
| 5.3.2 Hungry horse shape distortion.....  | 76   |
| 5.3.3 Localized distortion.....   | 83   |
| 5.4 Differences in the behaviour of long elastic and long elastic-plastic plates. Comments on the modelling of geometric imperfections..... | 92   |
| 5.5 On the stabilizing effect of the hungry horse shape distortion.....   | 113  |
| 6. Conclusions.....   | 125  |
| Appendix I.....   | 129  |
| References.....   | 135  |
| Acknowledgements.....   | 138  |
