Table of contents

Preface iii

List of figures x

List of tables xi

✓ Chapter 1 Introduction 1

The scope and method of industrial organization analysis

An introductory paradigm

A note on methodology

✓ Chapter 2 The welfare economics of competition and monopoly 9

Competition defined

The case for competition

Qualifications and doubts

Doubts concerning the profit maximization hypothesis

Workable competition

Conclusion

✓ Chapter 3 The structure of U.S. industry 45

✓ The position of the largest corporations

Concentration in particular markets

The diversification of American corporations

Vertical integration in American industry

✓ **Chapter 4 The determinants of market structure 81**

Economies of scale
Mergers and concentration
The impact of government policies
Stochastic determinants of market structure

Chapter 5 Economic theories of oligopoly pricing 151

Oligopolistic interdependence
The pure theory of oligopoly pricing
The contributions of game theory
The kinked demand curve and price rigidity
Conclusion

Chapter 6 Conditions facilitating oligopolistic coordination 169

Overt and covert agreements
Price leadership
Rule-of-thumb pricing as a coordinating device
Focal points and tacit coordination
Order backlogs, inventories, and oligopolistic coordination
Conclusion

Chapter 7 Conditions limiting oligopolistic coordination 199

* The number and size distribution of sellers
Product heterogeneity
Dynamic implications of cost structures
A digression on cutthroat competition
Lumpiness and infrequency of orders
Secrecy and retaliation lags
Industry social structure
Conclusion

Chapter 8 The dynamics of monopoly and oligopoly pricing 229

Substitution and long-run demand functions
Limiting entry: the dominant firm analysis
Deterring large-scale entry
Entry deterrence through plant location strategy
Entry deterrence through product differentiation
Pricing to maximize sales growth
Other dynamic influences affecting price
Conclusion

x **Chapter 9 The price and profit consequences of market structure 267**

The basic paradigm
Measurement problems
The empirical findings
Conclusion

Chapter 10 Buyer power and vertical pricing relationships 297

The extent of buyer concentration
The exercise of buyer power: theory
Countervailing power and consumer prices
Conclusion

Chapter 11 Price discrimination 315

Standard theoretical cases
Types of discrimination found in practice
The implications of discrimination for economic welfare
Geographic price discrimination and the basing point system
Conclusion

Chapter 12 Conglomerate size and pricing behavior 335

Predatory pricing
The spheres of influence hypothesis
Reciprocal buying
Nonmaximization of profits
Statistical evidence
Conclusion

Chapter 13 Market structure, administered prices, and macroeconomic stability 349

An historical overview
The administered price hypothesis
The theory of administered price inflation
The evidence on administered price inflation
Inflexible prices and business recession
Conclusion

Chapter 14 Product differentiation, market structure, and competition 375

Image differentiation and its social benefits
The social costs of image differentiation
The **links** between market structure and product differentiation effort
Conclusion

Chapter 15 Market structure and technological innovation 407

Industrial research and development
The process of research, development, invention, and innovation
Firm size, invention, and innovation
Diversification, research, and invention
Monopoly, concentration, and innovation
Conclusion

Chapter 16 The economics of the patent system 439

Some background on the system
The purposes of the patent grant
The costs and benefits of the patent system
Alternative incentives to invent and innovate
The social costs of the patent system
The costs and benefits on balance
Proposals for reforms

Chapter 17 Market structure and performance: overall appraisal 459

The welfare losses attributable to resource misallocation
Other inefficiencies
Other effects of monopoly power
Conclusion

Chapter 18 Policy approaches to the monopoly problem 475

Taxation policy
Price controls
Moral suasion
Public regulation
Public ownership of industry
Informational programs
Antitrust Policy

Chapter 19 Antitrust policy: price-fixing agreements 497

The *per se* illegality of explicit restraints
Remedies and penalties in price-fixing cases
Antitrust abroad: a comparison
The *per se* vs. rule of reason question revisited
Oligopoly pricing and the conscious parallelism doctrine
Price leadership
Trade association price and cost reporting activities

Chapter 20 Antitrust policy: the control of market structures 527

Monopoly and monopolization

Proposals to reform Sherman Act Section 2

Merger policy

Structural antitrust abroad: a comparison

Chapter 21 Antitrust policy: other restrictions on conduct 571

Price discrimination

Tying contracts, requirements contracts, and exclusive dealing

Resale price maintenance

Appendix to chapter 2 595

Appendix to chapter 3 601

Law case index 609

Name index 613

Subject index 625
