List of tables		xv
List of main symbols		xvii
<b>Part I Dam engineering</b>		<b>1</b>
1 Elements of dam engineering		3
1.1 General		3
1.2 Introductory perspectives		3
1.3 Embankment dam types and characteristics		9
1.4 Concrete dam types and characteristics		12
1.5 Spillways, outlets and ancillary works		16
1.6 Site assessment and selection of type of dam		19
1.7 Loads on dams		25
References		29
2 Embankment dam engineering		31
2.1 Introduction		31
2.2 Nature and classification of engineering soils		31
2.3 Engineering characteristics of soils		36
2.4 Principles of design		45
2.5 Materials and construction		54
2.6 Internal seepage		59
2.7 Stability and stress		63
2.8 Settlement and deformation		69
2.9 Rockfill and rockfill embankments		71
Worked examples		72
References		78
3 Concrete dam engineering		81
3.1 Loading: concepts and criteria		81
3.2 Gravity dam analysis		93
3.3 Buttress dam analysis		114
3.4 Arch dam analysis		115

3.5	Design features and construction	121
3.6	Concrete for dams	127
3.7	The roller-compacted concrete gravity dam	131
	Worked examples	134
	References	139
<b>4</b>	<b>Dam outlet works</b>	<b>141</b>
4.1	Introduction	141
4.2	The design flood	142
4.3	Flood routing	144
4.4	Freeboard	146
4.5	Sedimentation in reservoirs	148
4.6	Cavitation	152
4.7	Spillways	154
4.8	Bottom outlets	174
	Worked examples	176
	References	180
<b>5</b>	<b>Energy dissipation</b>	<b>183</b>
5.1	General	183
5.2	Energy dissipation on spillways	184
5.3	Stilling basins	187
5.4	Plunge pools	196
5.5	Energy dissipation at bottom outlets	197
	Worked examples	199
	References	201
<b>6</b>	<b>Gates and valves</b>	<b>202</b>
6.1	Classification of gates	202
6.2	Crest gates	202
6.3	High-head gates and valves	207
6.4	Hydrodynamic forces acting on gates	210
	References	212
<b>7</b>	<b>Dam safety: instrumentation and surveillance</b>	<b>214</b>
7.1	Introduction	214
7.2	Instrumentation	215
7.3	Surveillance	226
7.4	Dam safety legislation	227
7.5	Reservoir hazard analysis	230
	References	231
<b>Part II Other hydraulic structures</b>		<b>233</b>
<b>8</b>	<b>River engineering</b>	<b>235</b>
8.1	Introduction	235

8.2	Some basic principles of open-channel flow	236
8.3	River morphology and regime	241
8.4	River surveys	245
8.5	Flow-measuring structures	251
8.6	River improvement	254
	Worked examples	263
	References	269
9	Diversion works	271
9.1	Weirs and barrages	271
9.2	Intakes	289
9.3	Fish passes	306
	References	310
10	Cross drainage and drop structures	311
10.1	Cross drainage structures	311
10.2	Culverts, bridges, and dips	318
10.3	Drop structures	335
	References	345
11	Inland waterways	347
11.1	Introduction	347
11.2	Definitions, classification, and some UK and other waterways	348
11.3	Multipurpose utilization of waterways	352
11.4	Transport on inland waterways	355
11.5	Canalization and navigation canals	356
11.6	Resistance of ships	359
11.7	Wave action on banks	361
11.8	Locks	362
11.9	Thrift locks	371
11.10	Lifts and inclined planes	373
11.11	Lock approaches	375
11.12	Inland ports	376
	Worked examples	377
	References	379
12	Hydroelectric power development	381
12.1	Introduction	381
12.2	Worldwide hydroelectric power development in perspective	381
12.3	Power supply and demand	382
12.4	Some fundamental definitions	383
12.5	Types of water power development	384
12.6	Head classification of hydropower plants	387
12.7	Streamflow data essential for the assessment of water power potential	387
12.8	Hydraulic turbines and their selection	390
12.9	Other components of hydropower plants	403

12.10	Surge tanks	409
12.11	Mini-hydroelectric power plant development	414
12.12	Renewable energy sources	415
	Worked examples	418
	References	431
<b>13</b>	<b>Pumping stations</b>	<b>432</b>
13.1	Introduction	432
13.2	Pumps and their classification	432
13.3	Design of pumping mains	438
13.4	Classification of pumping stations and intakes	440
13.5	Sump design	442
13.6	Screening devices	445
13.7	Surges	445
13.8	General design considerations of pumping stations and mains	448
	Worked examples	450
	References	456
<b>14</b>	<b>Coastal engineering</b>	<b>457</b>
14.1	Introduction	457
14.2	Wave motion	458
14.3	Range of validity of linear theory	466
14.4	Waves approaching a shore	467
14.5	Wave breaking	470
14.6	Wave reflection	472
14.7	Oscillations in two-dimensional basins	473
14.8	Wave diffraction	474
14.9	Wave prediction	475
14.10	Wave statistics	480
14.11	Coastal defence	482
14.12	Wave forces on coastal structures	487
14.13	Wave run-up	490
14.14	Rubble-mound breakwaters	493
14.15	Forces on piles and pipelines	497
14.16	Vortex-induced oscillations	501
	Worked examples	506
	References	517
<b>15</b>	<b>Scale models in hydraulic engineering</b>	<b>519</b>
15.1	Hydraulic models	519
15.2	Structural models	526
	Worked examples	529
	References	530
	Subject index	534
	Author index	542
