

AUTOMATA, LANGUAGES AND PROGRAMMING

Proceedings of a symposium organized by

IRIA Institut de Recherche d'Informatique et d'Automatique,
78-Rocquencourt, France

July 3-7, 1972

edited by

M. Nivat

LIST OF CONTENTS

Editor's preface, M. Nivat	
Opening address, A. Danzin	

I. AUTOMATA THEORY

Une famille de congruences de Thue pour lesquelles le problème de l'équivalence est décidable. Application à l'équivalence des grammaires séparées, P. Butzbach	3
Transducteurs conservant l'imprimitivité du langage d'entrée, C. Choffrut	13
Sur des langages vérifiant des équations avec opérateur, R. Cori	31
Finite delay solutions for sequential conditions, F. A. Hosch, L. H. Landweber	45
Realization theory of linear systems over a commutative ring, R. E. Kalman, Y. Rouchaleau	61
Equations in free monoids, A. Lentin	67
Finite power property of regular languages, M. Linna	87
Linear automata – approximation problem, A. Paz, M. Rabinovich	99
A propos des relations rationnelles fonctionnelles, M. Schutzenberger	103
Quelques applications des automates à arbres infinis, G. Vidal-Naquet	115
Automates et bascules, G. Viennot	123
Syntactic semigroups of some classes of star-free languages, Y. Zalcstein	135

II. PROGRAMMING THEORY

An algorithmic approach to the semantics of programming languages, G. Aguzzi, R. Pinzani, R. Sprugnoli	147
---	-----

A calculus for recursive program schemes, J. W. de Bakker, W. P. de Roeven	167
Can syntax be ignored during translation? C. Böhm, M. Dezani Ciancaglioni	197
Assignment – programs, V. Claus	209
Translation of simple program schemes, J. Engelfriet	215
Induction rules and termination proofs, P. Hitchcock, D. Park	225
Comparing algebraic structures up to Algorithmic equivalence, D. Kfoury	253
Remarques sur la structure des schémas de programmes, J. Kott	265
Fixpoint approach to the theory of computation, Z. Manna, J. Vuillemin	273
Langages algébriques sur le magma libre et sémantique des schémas de programmes, M. Nivat	293
Systèmes algorithmiques, systèmes fonctionnels, L. Nolin	309
Les types et les appels de procédures, G. Ruggiu	319
A concrete approach to abstract recursive definitions, M. Wand	331

III. THEORY OF FORMAL LANGUAGES

Sur la densité asymptotique de langages formels, J. Berstel	345
Un critère de rationalité des langages algébriques, L. Boasson	359
Approximation of phrase markers by regular sets, S. Crespi Reghizzi, P. della Vigna	367
Un langage non ambigu dont le carré est d'ambiguïté non bornée, J. P. Crestin	377
À comparison of the properties of complexity classes and honesty classes, P. van Emde Boas	391

Automates stochastiques et séries rationnelles non commutatives, M. Fließ	397
On a family of deterministic grammars, M. A. Harrison, I. M. Havel	413
Finite automata with markers, P. Hsia, R. T. Yeh	443
A tree generating system, A. K. Joshi, L. S. Levy, M. Takahashi	453
On structural similarity of phrase-structure languages, S. Y. Kuroda	467
Primitive transformations of regular sets and recognizable sets, M. Takahashi	475
Convex languages, G. Thierrin	481
Algebraic parsing techniques for context-free grammars, S. F. Weiss, G. A. Mago, D. F. Stanat	493

IV. COMPLEXITY OF ALGORITHMS

Context-sensitive grammars generating context-free languages, B. S. Baker	501
Complexity problems related to the approximation of probabilistic languages and events by deterministic machines, A. Bertoni	507
Complexity classes of formal languages, R. V. Book	517
The functions computed by a monadic program schema with one location, A. Dubinsky	521
Complexité des problèmes de décision relatifs aux algorithmes de tri, P. Flajolet, J. M. Steyaert	537
Hierarchies of primitive recursive wordfunctions and transductions defined by automata, F. W. von Henke, K. Indermark, K. Weihrauch	549
An estimation of the set of states of the minimal LR(O)-acceptor, R. Kemp	563
Relationships between pushdown automata and tape-bounded Turing machines, B. Monien	575
Does the computational speed-up concern programming? C. P. Schnorr	585

An approach to mathematical complexity.
An infinite hierarchy of term languages,
R. Turner 593

A generalization of a theorem of Specker and some applications
B. Vilfan 609
