## List of Contributors XXI

### 1 Introduction

#### 1.1 Sensors in Intelligent Buildings: Overview and Trends 3

*Oliver Gassmann, Hans Meixner*

- 1.1.1 Introduction 3
- 1.1.2 Towards the Intelligent Building 4
  - 1.1.2.1 Reduced Resource Consumption 6
  - 1.1.2.2 Optimized Convenience and More Comfort 6
  - 1.1.2.3 Increased Impact of Microsystems Technology 8
  - 1.1.2.4 Increased Impact of New Communication Systems 10
  - 1.1.2.5 Development of an Intelligent Home Market 12
  - 1.1.2.6 More Integrated Buildings: the FuturElife Smart Building 12
  - 1.1.2.7 Pneumatic Building Structures: Airitecture 14
- 1.1.3 Trends in Sensor Systems 16
- 1.1.4 Sensor Systems in Intelligent Buildings 21
  - 1.1.4.1 Energy and HVAC 22
  - 1.1.4.2 Information and Transportation 22
  - 1.1.4.3 Safety and Security 23
  - 1.1.4.4 Maintenance and Facility Management 23
  - 1.1.4.5 System Technologies 24
- 1.1.5 References 24

### 2 Energy and HVAC

#### 2.1 Intelligent Air-conditioning Control 29

*Albert T.P. So, Brian W.L. Tse*

- 2.1.1 Introduction 29
- 2.1.2 General Specifications of a Sensor 29
- 2.1.3 A Quick Review on HVAC Sensors 30
  - 2.1.3.1 Temperature Sensors 30

2.1.3.2	Pressure Sensors	31
2.1.3.3	Flow Rate Sensors	33
2.1.3.4	Humidity Sensors	35
2.1.3.5	Comfort Sensors	36
2.1.3.6	Indoor Air Quality Sensors	37
2.1.3.7	Occupancy Sensors	37
2.1.3.8	Smoke Sensors	38
2.1.4	Computer Vision-based HVAC Control	40
2.1.4.1	The Computer Vision System	41
2.1.4.2	Calibration of the Stereoscopic Camera System	41
2.1.4.3	Velocity Field Computation by Optical Flow	42
2.1.4.4	Pixel Correspondence	44
2.1.4.5	Scene Spots Fuzzy Clustering	45
2.1.5	Internet-based HVAC System Monitoring and Control	46
2.1.5.1	Philosophy of Internet-based Building Automation with Image Transfer	47
2.1.5.2	The BAS Web Site	48
2.1.6	PMV-based HVAC Control	50
2.1.6.1	Elements of Comfort-based Control	51
2.1.6.2	Control Algorithms	53
2.1.6.3	Computer Simulation	54
2.1.6.4	Simulation Results	57
2.1.7	Conclusion	60
2.1.8	References	60
<b>2.2</b>	<b>NEUROBAT – a Self-commissioned Heating Control System Using Neural Networks</b>	<b>63</b>
	<i>Jens Krauss, Manuel Bauer, Jürg Bichsel, Nicolas Morel</i>	
2.2.1	Introduction	63
2.2.2	Control Concept	64
2.2.2.1	Methodologies	64
2.2.2.2	Controller Block Diagram	66
2.2.2.3	Optimal Control Algorithm	67
2.2.2.4	Applied Sensors and NEUROBAT Controller Versions	69
2.2.3	Controller Performance Assessment	69
2.2.3.1	Simulation Study	69
2.2.3.2	Comparative Tests Within Office Rooms	72
2.2.4	Prototype Realization with Functional Tests on Residential Buildings	75
2.2.4.1	Industrial NEUROBAT Prototype	75
2.2.4.2	Test Results Heating Season 1999/2000	76
2.2.5	Conclusion	81
2.2.6	References	83

<b>2.3</b>	<b>Air Quality Measurement and Management</b>	<b>85</b>
	<i>Hanns-Erik Endres</i>	
2.3.1	Introduction	85
2.3.2	Substances in Indoor Air	85
2.3.3	Sensors for Air Quality Measurements	88
2.3.4	Sensor Systems and Arrays for Air Quality Measurement	91
2.3.5	Examples of Long-term Air Quality Evaluation	95
2.3.6	CO <sub>2</sub> Measurements	96
2.3.7	VOC Sensor	98
2.3.8	Summary and Future Outlook	99
2.3.9	Acknowledgments	101
2.3.10	References	101
<b>2.4</b>	<b>Sensor-based Management of Energy and Thermal Comfort</b>	<b>103</b>
	<i>Thomas Bernard, Helge-Björn Kuntze</i>	
2.4.1	Motivation	103
2.4.2	Control Concept	104
2.4.3	Theoretical Approach of Multi-objective Fuzzy Optimization	106
2.4.3.1	The Basic Algorithm	106
2.4.3.2	Important Features	107
2.4.3.3	Weighting of Different Performance Criteria	107
2.4.3.4	Model Equations	108
2.4.4	Application to the Supervisory Control of HVAC Systems	109
2.4.4.1	Comfort Criteria	109
2.4.4.2	Economy Criteria	109
2.4.4.3	Optimization of Heating Temperature	110
2.4.4.4	Optimization of Air Exchange Rate	113
2.4.4.5	Optimization of Blind Position	116
2.4.5	Simulations and Measured Results	119
2.4.5.1	Supervisory Control of Heating and Ventilation Systems	120
2.4.5.2	Supervisory Control of Heating and Blind Systems	123
2.4.6	Conclusions	125
2.4.7	References	125
<b>2.5</b>	<b>Wireless and M-Bus enabled Metering Devices</b>	<b>127</b>
	<i>Dieter Mrozinski</i>	
2.5.1	Introduction	127
2.5.2	Benefits of Remote Reading	128
2.5.2.1	User	129

### 3 Information and Transportation

- 3.1 **Fieldbus Systems** 203 
  - Dietmar Dietrich, Thilo Sauter, Peter Fischer, Dietmar Loy*
  - 3.1.1 Introduction 203
  - 3.1.2 Abstract View and Definition of the Fieldbus 204
  - 3.1.3 Communication Basics for Fieldbus Systems 206
    - 3.1.3.1 Decentralization and Hierarchies 206
    - 3.1.3.2 The ISO/OSI Model 207
    - 3.1.3.3 Topologies 212
  - 3.1.4 Historical Aspects 213
    - 3.1.4.1 The Roots of Industrial Networks 213
    - 3.1.4.2 The Evolution of Fieldbuses 215
  - 3.1.5 Examples of Fieldbus Systems 218
    - 3.1.5.1 EIB 218
    - 3.1.5.2 LonWorks and ANSI/EIA 709 221
    - 3.1.5.3 BACnet 225
    - 3.1.5.4 EIBnet 227
  - 3.1.6 Fieldbus Systems in Connection with the Internet 230
  - 3.1.7 Present and Future Challenges 232
    - 3.1.7.1 Interoperability and Profiles 232
    - 3.1.7.2 System Complexity and Tools 232
    - 3.1.7.3 Management – and Plug and Play 233
    - 3.1.7.4 Security 234
    - 3.1.7.5 Driving Forces 236
  - 3.1.8 Outlook and Conclusion 238
  - 3.1.9 References 238
- 3.2 **Wireless In-building Networks** 241
  - Mike Barnard*
  - 3.2.1 Introduction 241
  - 3.2.2 Network Characteristics 241
    - 3.2.2.1 Wired vs. Wireless? 241
    - 3.2.2.2 Sensor Network Requirements 243
  - 3.2.3 Existing and Emerging Standards 250
    - 3.2.3.1 Network Standards 251
    - 3.2.3.2 Wired Links 252

3.2.3.3	Wireless Links	255
3.2.4	Existing and Emerging Wireless Products	258
3.2.4.1	Remote Controls	258
3.2.4.2	Security and Telemetry	258
3.2.4.3	Data Networks	258
3.2.5	References	259
<b>3.3</b>	<b>Sensor Systems in Modern High-rise Elevators</b>	<b>261</b>

## 4 Safety and Security

- 4.1 **Life Safety and Security Systems** 307  
*Marc Thuillard, Peter Ryser, Gustav Pfister*
  - 4.1.1 Introduction 307
  - 4.1.2 Fire Sensing 309
    - 4.1.2.1 Fire Physics, Smoke Aerosols, Gases, and Flames 309
    - 4.1.2.2 Smoke Sensing Principles 316
    - 4.1.2.3 Heat/Temperature-sensing Principles 323
    - 4.1.2.4 Flame-sensing Principles 327
    - 4.1.2.5 Multicriteria/Multisensor Detectors 329
    - 4.1.2.6 System Concepts 332
    - 4.1.2.7 Application Concepts and Criteria 334
    - 4.1.2.8 Trends 335
    - 4.1.2.9 Standards 336
  - 4.1.3 Gas Sensing 338
    - 4.1.3.1 Toxic and Combustible and Explosive Gases 338
    - 4.1.3.2 Catalytic Devices (Pellistors) 340
    - 4.1.3.3 Photoacoustic Cells 341
    - 4.1.3.4 Electrochemical Cells 343
    - 4.1.3.5 Metal Oxides 344
    - 4.1.3.6 Application Concepts and Criteria 346
    - 4.1.3.7 Standards 347
  - 4.1.4 Intrusion Sensing 347
    - 4.1.4.1 Passive Sensing Principles 347
    - 4.1.4.2 Active Sensing Principles 356
    - 4.1.4.3 Multisensor Sensing 358
    - 4.1.4.4 System Concepts 359
    - 4.1.4.5 Trends 361
    - 4.1.4.6 Standards 361
  - 4.1.5 Identification Sensing 363
    - 4.1.5.1 PIN Code 363
    - 4.1.5.2 Reading Methods for Identification Cards 364
    - 4.1.5.3 Biometric Reading Principles 368
    - 4.1.5.4 Concepts for Automatic Processing of Card Data 371
    - 4.1.5.5 Trends 373
    - 4.1.5.6 Standards 374
  - 4.1.6 Emergency Handling 374
    - 4.1.6.1 Voice Evacuation Systems 374
    - 4.1.6.2 Fire Extinguishing Systems 376
    - 4.1.6.3 Alarm Receiving Centers 379

4.1.7	Signal Processing	383
4.1.7.1	Intelligent Development Methods	385
4.1.7.2	Application of Multi-resolution and Fuzzy Logic to Fire Detection	387

## 5 Maintenance and Facility Management

### 5.1 Maintenance Management in Industrial Installations 451

*Jerry Kahn*

- 5.1.1 Introduction 451
- 5.1.2 Predictive Maintenance and Condition Monitoring 451
  - 5.1.2.1 Vibration 453
  - 5.1.2.2 Acoustic and Ultrasonic Monitoring 455
  - 5.1.2.3 Lubricant Analysis (Tribology) 455
  - 5.1.2.4 Infrared Thermography 456
  - 5.1.2.5 Process Parameter Monitoring; 457
  - 5.1.2.6 Electrical Testing 457
  - 5.1.2.7 Sensory Inspection 458
- 5.1.3 Enhancing Condition Monitoring with Expert Systems 458
- 5.1.4 Integration with Plant Systems 460
- 5.1.5 Maintenance Management Methods 461
  - 5.1.5.1 Reliability-centered Maintenance (RCM) 462
  - 5.1.5.2 Total Productive Maintenance (TPM) 462
- 5.1.6 Future Directions in Maintenance Technology 464
  - 5.1.6.1 Wireless and Smart Sensor Development 464
  - 5.1.6.2 Human Sensory Sensors 465
  - 5.1.6.3 E-Maintenance via the World Wide Web 467
- 5.1.7 Summary 467
- 5.1.8 References 468

### 5.2 WWFM – Worldwide Facility Management 469

*Rolf Reinema*

- 5.2.1 Introduction 469
- 5.2.2 Facility Management 470
- 5.2.3 Worldwide Facility Management (WWFM) 472
- 5.2.4 The RoomServer 472
- 5.2.5 Single-chip PCs 475
- 5.2.6 Advanced Architectures 476
- 5.2.7 Security Aspects' 477
- 5.2.8 Conclusion 480
- 5.2.9 References 481

## 6 System Technologies

### 6.1 Sensor Systems in Intelligent Buildings 485

*Hans-Rolf Tränkler, Olfa Kanoun*

- 6.1.1 Introduction 485
- 6.1.2 Sensor Applications in Intelligent Buildings 486
- 6.1.3 Requirements for Sensor Systems in Intelligent Buildings 487

6.1.4	Sensor Systems for Safety and Health	488
6.1.4.1	Fire Detection	488
6.1.4.2	Gas Detection	491
6.1.4.3	Intrusion and Person Detection	495
6.1.4.4	Sensor Systems for Health Safety	500
6.1.5	Sensor Systems for Heating, Ventilation, and Air Conditioning (HVAC) and Comfort	502
6.1.5.1	Convenience and Easy Usability	502
6.1.5.2	Thermal Comfort	503
6.1.5.3	Indoor Air Quality	504
6.1.6	Future Trends for Sensor Systems in Intelligent Buildings	505
6.1.7	Acknowledgements	508
6.1.8	References	508
<b>6.2</b>	<b>System Technologies for Private Homes</b>	<b>511</b>
	<i>Friedrich Schneider, Lars Binternagel, Yuriy Kyselytsya, Wolfgang Müller, Thomas Schlütsmeier, Bernhard Schreyer, Rostislav Stolyar, Kay Werthschulte, Günter Westermeyer, Dirk Wölfe, Thomas Weinzierl</i>	
6.2.1	Introduction	511
6.2.2	Requirements in Home Automation Systems	512
6.2.3	Microcontroller Level	515
6.2.3.1	Realization	515
6.2.3.2	Choice of the Microcontroller	515
6.2.3.3	Bus Connection with BCU	515
6.2.3.4	Bus Connection via TP-UART	515
6.2.3.5	Bus Coupling with RF-UART	517
6.2.3.6	Operating System ContROS	520
6.2.3.7	Feature Controller	520
6.2.3.8	Intelligent Outlet	521
6.2.4	Operating System's Level	522
6.2.4.1	Introduction	522
6.2.4.2	Interfaces	523
6.2.4.3	The IrDA-EIB Interface	524
6.2.4.4	USB-EIB Interface	525
6.2.4.5	Bluetooth	526
6.2.4.6	The EIB Modem	527
6.2.4.7	Software Interfaces	528
6.2.4.8	Accessing the EIB with Windows CE and Other Operating Systems	531
6.2.5	Bus Monitoring and Service Programs	532
6.2.5.3	Future Work: Interpretation and Test Management	534
6.2.6	Configuration of Home Automation Systems	534
6.2.6.1	Introduction	534
6.2.6.2	Easy Configuration	536
6.2.6.3	Configuration via the Internet	538

6.2.6.4	The IMOS Tool	538
6.2.7	Visualization and Tele Services	539
6.2.7.1	Possibilities of Visualization	539
6.2.7.2	Video and EIB	540
6.2.7.3	Visualization Software	541
6.2.7.4	Special Applications and Clients for Visualization	543
6.2.7.5	Access Technologies	547
6.2.7.6	Use of PDAs with HTML and CGI	549
6.2.7.7	Standard Browser and EIB. The EIB Web Server	549
6.2.7.8	Security Aspects of Tele-services Using HTTP	553
6.2.7.9	Using Applets, Java in Tele-services	553
6.2.8	Outlook	554
6.2.9	Internet Addresses	556
6.2.10	References	557
