CONTENTS

PREFACE viii

1	Linear Algebra	2	
1.1	Introduction		2
1.2	Vector Spaces		2
1.3	Matrices		9
1.4	Computing Inverses and Solving Systems of Linear Equations		16
1.5	Determinants		26
1.6	Eigenvalues of Matrices		31
	References		33
	Problems		33
2	Classical Mathematics of Optimization	42	
2.1	Introduction		42
2.2	Functions of a Single Variable		43
2.3	Functions of Several Variables—No Constraints		53
2.4	Constrained Optimization—Equality Constraints		65
2.5	Constrained Optimization—Inequality Constraints		88
2.6	Introduction to the Calculus of Variations		113
	References		119
	Problems		119

3	Linear Programming	130
3.1	Introduction	130
3.2	The Problem and its Structure	132
3.3	Solution of Linear-Programming Problems	144
3.4	More General Linear-Programming Problems	163
3.5	Further Geometric Aspects	169
3.6	Dismissing Nonnegativity Requirements	175
3.7	Another Procedure for Artificial Variables	177
3.8	Duality	180
3.9	Formulation of Linear-Programming Problems	200
	References	205
	Problems	205
4	PERT and Network Flows	220
4.1	Introduction	220
4.2	PERT	221
4.3	Critical Path Method—CPM	232
4.4	Graph Theory and Network Flows	239
	References	254
	Problems	254
5	Transportation and Assignment Problems	258
5.1	Introduction	258
5.2	A Transportation Problem	260
5.3	Theoretical Basis for the Transportation Algorithm	276
5.4	Alternative Methods for Locating Initial Feasible Solutions	282
5.5	Duality in the Transportation Problem	290
5.6	Other Transportation Problems	296
5.7	Transportation Problems with Transshipment	302
5.8	Assignment Problem—Mathematical Formulation	309
	References	337
	Problems	337
6	Search Techniques	344
6.1	Introduction	344
6.2	Functions of a Single Variable	347
6.3	Functions of Several Variables	373
	References	400
	Problems	400
7	Dynamic Programming	402
7.1	Introduction	402
7.2	Introductory Concepts	402
7.3	Solving Dynamic-Programming Problems	409
7.4	More General Measures of Total Return	426

7.5 Reversing the Direction of the Problem	430
7.6 Extensions of the Model and the Methods	432
7.7 Treating Problems in Several Dimensions	443
7.8 Introduction to Nonserial Decision Processes	448
7.9 A Brief Note on Infinite Stage Processes	458
References	459
Problems	459
8 Geometric Programming	466
8.1 Introduction	466
8.2 Arithmetic Mean-Geometric Mean Inequality	467
8.3 Solving Unconstrained Geometric-Programming Problems	472
8.4 General Constrained Problem	479
References	494
Problems	495
INDEX	498
