

**SIMULATION AND
OPTIMIZATION METHODS IN
RISK AND RELIABILITY THEORY**

**PAVEL S. KNOPOV
AND
PANOS M. PARDALOS
EDITORS**

Nova Science Publishers, Inc.
New York

CONTENTS

Preface		vii
Part I: Modern Methods of Accelerated Modeling Reliability and Risk Theory		1
Chapter 1	Problems of Risk Estimation under Uncertainty Conditions <i>P. Knopov, Yu. Kolesnik and T. Maryanovich</i>	3
Chapter 2	Light-traffic Analysis of Some Queueing Models with Losses <i>I. Kovalenko</i>	19
Chapter 3	Integrated Modeling for Management of Catastrophic Risks: Spatial Stochastic Optimization Model <i>T. Ermolieva, Yu. Ermoliev, G. Fischer and M. Makowski</i>	45
Chapter 4	Fast Simulation Technique in Reliability Evaluation of Markovian and Non-markovian Systems <i>N. Kuznetsov</i>	69
Chapter 5	Reduction Measurements for Calculation in Fuzzy Experiment Scheme and Soft Modelling of Dynamic Processes in Non-crisp Conditions <i>Yu. A. Belov, A. S. Bychkov, A. L. Zavorotnyy and M. G. Merkuriev</i>	113
Chapter 6	Development of New Mathematical Models and Methods for Determining Critical States of Nuclear Plant Reactors <i>V. A. Yatsenko, P. M. Pardalos, A. S. Makarenko and Y. I. Samoilenko</i>	137
Part II: Methods of Robust Estimation and Optimization in Reliability Theory		171
Chapter 7	Investigation of Bayesian Estimates for Binomial Failure Models <i>A. Golodnikov, P. Knopov and V. Pepelyaev</i>	173
Chapter 8	Investigation of Sensitivity of Bayesian Estimates for Exponential Failure Models <i>A. Golodnikov</i>	221

Chapter 9	Multicriteria Optimal Design Problems of Ecologically Dangerous Objects and Numerical Methods for Their Solving <i>M. Salukvadze, N. Jibladze, V. Maisuradze and A. Topchishvili</i>	239
Index		275
