Post-classics not neo-classics

PART I Classics and Post-classics

1 'Revolutions' in Economics (1976) 3
   Prefatory note 3
   Adjustment to a changing world 3 Adam Smith's 'revolution'
   6 Marx and Mill 8 catallactist 'revolution' 9 plutology, old
   and new 12 Keynes and Hawtrey 14 present and past 15

2 The Social Accounting of Classical Models 17
   Origins: Petty and Cantillon 17 Physiocrats 21 Smith, his
   working capital model 23 Ricardo, his three models 28 echo
   in Keynes and Hayek 31

3 Ricardo's Theory of Distribution (1972) 32
   The share of rent 32 a concealed linearity assumption 34
   effect of relaxing it 35 shares in net revenue 36 substitution
   of capital for land 37

4 Ricardo and the Moderns (1977) 39
   (with Samuel Hollander)
   Prefatory note 39
   Conversation between authors 41
   (I) A simplified version of Ricardo's growth model: the barriers
   42 the model in circulating (or working) capital terms 46 a
   possible (but controversial) exception 48 fixed capital 49
   static method 52
   (II) Evidence from Ricardo's text - 'money' wages and real wages
   53 the main texts 54 the 'Notes on Malthus' 58 fixed capital
   again 58
## Contents

5 From Classical to Post-classical: The Work of J. S. Mill 60

- Mill's contributions to economics: (1) international trade 61
- monetary theory, his important insights 62
- qualifications to value theory 65
- (4) his rejection of Smith-Ricardo growth theory, and consequent opening of the way to post-classical statics 66
- on environmentalism 70

6 Edgeworth, Marshall and the 'Indeterminateness' of Wages (1930) 71

- Prefatory note
- Edgeworth on determinateness of equilibrium 72
- application to labour market 74
- Marshall's apparently different doctrine 78
- sales from stocks 79
- application to labour market 81
- neither doctrine is very applicable 82
- standard rates 83
- influence of competition mostly indirect 83

7 Léon Walras (1934) 85

- Prefatory note
- Cournot and Walras
- simple exchange 88
- multiple exchange 89
- how equilibrium is established 90
- (static) equilibrium of production 91
- capital 93
- work on money not considered 95

8 The Austrian Theory of Capital and its Re-birth in Modern Economics (1973) 96

- Prefatory note
- Böhm-Bawerk and Hayek
- varieties of capital 97
- joint supply 98
- the production process: conditions for viability 100
- fundamental theorem on \( r \) and \( k_t \) 102
- internal rate of return 104
- the \( (w, r) \) or efficiency curve 106
- re-switching 106
- steady-state model 107
- causal analysis 109
- old- and new-dominant 110
- change in time-pattern of output 111

9 Is Interest the Price of a Factor of Production? (1979) 113

- Prefatory note: Relation to Causality book
- use of 'equilibrium' in causal analysis different from traditional usage 114
- Two distinct 'Austrian' doctrines
- the formation of expectations and the role of norms 116
- historical explanation 118
- counter-factuals and 'equilibrium' 120
- the von Neumann convention 121
- Defining 'factor of production' 121
- The various meanings of 'capital' 122
- the successful candidate is ITSO 125
- liquidity 127

### PART II  Competition and the Firm

10 The Theory of Monopoly: A survey (1935) 131

- Prefatory note 131
- Origins 132
Contents

(I) Simple monopoly 134 demand for inputs 135 joint production 137 selling costs 138 discrimination 138 private factors and the quiet life 139
(II) Monopolistic competition 139 product variation 142 duopoly 144 conjectural variations 145
(III) Bilateral monopoly, the two types 147 rehabilitation of Marshall 151

11 Scitovsky on Competition (1952)
Prefatory note: Rejection of perfect competition as standard 153 informed and uninformed markets 154 duopoly again 154n
Scitovsky on perfect competition 156 the profit margin 158 free competition and restricted competition 160 pyramiding of margins 161

12 Stickers and Snatchers (1954)
Prefatory note 163
Harrod on imperfect competition, in short and long periods — his change of view 164 close and open periods 164 simple expectations 166 short and long period outputs jointly determined 168 polypolistic expectations 171 rapid turnover of firms 172 oligopolistic expectations 173 strong policy of Perfect Sticker 176 building goodwill 178

Reasons for its introduction 179 shareholder approximates to a kind of bondholder 180 non-transferable shares 181 importance of transferability 183 control: succession 185 what is to be maximised 185 the core 186 take-overs 187 gains and losses from anonymity of ownership 188

14 The Concept of Business Income (1979)
Prefatory note: capital gains 189
History of profit taxation 190 ascertainment of profits — the accountant 191 depreciation quotas and allocation of overheads 192 economists’ depreciation compared with accountants’ 193 double take-over model 193 current profit and capital profit need to be distinguished 195 the Lindahl analysis 196 leads to permanent income concept 199 two distinctions: internal-external and normal-exceptional 200 consequences for taxation principles 201 inflation 202

PART III International Trade

15 Productivity and Trade (1953)
Prefatory note 207
An application of Ricardian theory 208 uniform increase in
Contents

Productivity 209  Non-uniform increase 212  Export and import bias 213  Historical cases 214

16 Import Bias: A Reply to Critics (1959)
Central proposition re-asserted 218  Measurement of productivity change in output terms 219  Not necessary 220  Qualifications admitted 222

17 The Factor Price Equalisation Theorem (1959)
Restatement of Samuelson’s argument 225  Qualifications due to Harrod 228  Does not apply to actual conditions 229  But still has some significance 230  Scale economies 231  Industrialisation 233

PART V  Mathematical Economics

18 A Note on the Elasticity of Supply (1934)
Prefatory note 237  Defence of approach 237  The model 239  The two formulae 239, 240  Proofs of the formulae 241  Their significance 244

19 Linear Theory (1960)

20 Prices and the Turnpike: The Story of a Mare’s Nest (1961)
Testing the Turnpike Theorem 292  Simplifications 293  Conditions for optimum path 295  Imitation of DOSSO proof of
