Contents

Part I

ELEMENTARY ECONOMETRICS

1	Introduction to Regression	1
2	Regression Theory	15
3	Multiple Regression	53
4	Regression Extensions	81
5	Correlation	103
6	Serial Correlation and Other Problems	132
7	Simultaneous Equations and Other Examples of Correlated Regressor and Error	149
8	The Identification Problem	172
9	Selected Estimating Techniques	190
10	Decision Theory	196

Part II

MORE ADVANCED ECONOMETRICS

13	Multiple Regression Using Matrices	237
14	Distribution Theory: How the Normal, t , χ^2 , and F Distributions are Related	265
15	The Vector Geometry of Regression and Correlation	280
16	Generalized Least Squares (GLS)	318
17	Instrumental Variables (IV)	337
18	Identification	343
19	Single Equation Estimation	357
20	Systems Estimation	383
	<i>Appendix</i>	401
	<i>Answers to Odd-Numbered Problems</i>	431
	<i>Glossary of Important Symbols</i>	439
	<i>Index</i>	I-1
