

# The Ionisation of Carbon Acids

J. R. JONES

*Department of Chemistry,  
University of Surrey,  
Guildford, Surrey*

1973

Academic Press  
London and New York

## CONTENTS

|  |     |
|--|-----|
| ACKNOWLEDGEMENTS                                       | iii |
| CHAPTER 1. Introduction                                | 1   |
| References   | 4   |
| CHAPTER 2. Rates of Ionisation—Methods                 | 5   |
| 2.1. Halogenation                                      | 5   |
| 2.2. Spectrophotometric                                | 7   |
| 2.3. Electrochemical                                   | 10  |
| 2.4. Isotopic Exchange                                 | 13  |
| 2.5. Miscellaneous                                     | 23  |
| References   | 25  |
| CHAPTER 3. Rates of Ionisation—Results                 | 28  |
| 3.1. Factors Affecting the Stabilisation of Carbanions | 28  |
| 3.2. Aromatic Nitro Compounds                          | 37  |
| 3.3. Mechanism of Internal Return                      | 39  |
| 3.4. Extent of Hydration                               | 41  |
| 3.5. Intramolecular Catalysis                          | 44  |
| 3.6. Statistical Factors                               | 46  |
| References   | 48  |
| CHAPTER 4. The Acidities of Carbon Acids—Methods       | 50  |
| 4.1. Electrochemical                                   | 50  |
| 4.2. Spectrophotometric                                | 54  |
| 4.3. Kinetic   | 57  |
| 4.4. Theoretical                                       | 59  |
| 4.5. Miscellaneous                                     | 60  |
| References   | 61  |
| CHAPTER 5. The Acidities of Carbon Acids—Results       | 63  |
| 5.1. Cyano Compounds                                   | 63  |
| 5.2. Nitro Compounds                                   | 65  |
| 5.3. Sulphones   | 74  |
| 5.4. Ketones   | 76  |

|  |            |
|--|------------|
| 5.5. Hydrocarbons  | 78         |
| 5.6. Theoretical Values  | 84         |
| 5.7. Acidities in the Gas Phase  | 86         |
| References   | 90         |
| <b>CHAPTER 6. Highly Basic Media</b>                                   | <b>92</b>  |
| 6.1. Acidity Functions in Aqueous Hydroxide Solutions                  | 93         |
| 6.2. Acidity Functions in Alcohol Alkoxide Solutions                   | 98         |
| 6.3. Acidity Functions in Media containing Dipolar<br>Aprotic Solvents | 102        |
| 6.4. Other Media of High Basicity                                      | 107        |
| References   | 107        |
| <b>CHAPTER 7. Ion Association</b>                                      | <b>109</b> |
| 7.1. Ion Pairs   | 110        |
| 7.2. Aqueous Media   | 110        |
| 7.3. Methanol, Ethanol and <i>t</i> -Butanol                           | 113        |
| 7.4. Cyclohexylamine and Liquid Ammonia                                | 117        |
| 7.5. Structure of Carbanions in Various Solvents                       | 119        |
| References   | 122        |
| <b>CHAPTER 8. Rate-Equilibria Correlations</b>                         | <b>124</b> |
| 8.1. The Brönsted Relationship   | 126        |
| 8.2. The Marcus Theory   | 142        |
| 8.3. Highly Basic Media  | 144        |
| References   | 147        |
| <b>CHAPTER 9. Kinetic Hydrogen Isotope Effects</b>                     | <b>150</b> |
| 9.1. Theory of Kinetic Isotope Effects                                 | 151        |
| 9.2. Results of Model Calculations                                     | 157        |
| 9.3. Experimental Isotope Effects                                      | 166        |
| 9.4. Quantum Mechanical Tunnelling                                     | 171        |
| 9.5. Solvent Reorganisation  | 181        |
| References   | 183        |
| <b>CHAPTER 10. Solvent Isotope Effects</b>                             | <b>185</b> |
| 10.1. Fractionation Factors  | 186        |
| 10.2. Theory of Solvent Isotope Effects                                | 189        |
| 10.3. Model Calculations   | 197        |
| 10.4. Application to Solvent Catalysed Reactions                       | 199        |
| 10.5. Application to Hydroxide Catalysed Reactions                     | 203        |
| 10.6. Application to Methoxide Catalysed Reactions                     | 205        |
| References   | 207        |

## CONTENTS

vii

|   |     |
|---|-----|
| CHAPTER 11. Labelling of Molecules      | 209 |
| 11.1. Various Methods of Labelling      | 209 |
| 11.2. Application of Highly Basic Media | 213 |
| 11.3. Labelled Carbon Acids             | 215 |
| References                              | 216 |
| AUTHOR INDEX                            | 219 |
| SUBJECT INDEX                           | 229 |
