Contents

Preface	
Acknowledgements	
How to use this book	
Map of Borneo	
Introduction	
Mount Kinabalu - the surrounding environment	
Topography, Geology, Geomorphology	
Zoogeography	
Climate	
Vegetation	
Tropical lowland vegetation zone (to 900 m a.s.l.)	
Tropical lower montane vegetation zone (900-1800 m a.s.l.)	
Tropical upper montane vegetation zone (1800-3000 m a.s.l.)	
Tropical subalpine vegetation zone (3000-3700 m a.s.l.)	
Fauna	
Herpetofauna	
Human settlements in the vicinity of Mount Kinabalu	
A retrospective glance on herpetological research in Borneo and the area of Mt. Kinabalu	
Amphibia (amphibians)	
Anura (tailless amphibians or frogs)	
Important traits for the identification of frogs and their larvae	
Morphology	
Habitats of tadpoles	
Larval feeding types	
Bioacoustics	
Reproductive strategies	
Key to the families of Bornean frogs	
Preliminary key to the larvae of Bornean frog families	
Bufonidae	
Megophryidae	
Microhylidae	
Ranidae	
Rhacophoridae	
Gymnophiona	
Ichthyophiidae	

Reptilia (reptiles)

Squamata (scaly reptiles)

Sauria (lizards)

 Distinguishing features in lizards

 Key to the families of Bornean lizards

 Agamidae

 Anguidae

 Gekkonidae

 Scincidae

 Varanidae

Serpentes (snakes)

 Distinguishing features in snakes

 Key to the families of Bornean snakes

 Colubridae

 Crotalidae

 Cylindrophiidae

 Elapidae

 Pythonidae

 Typhlopidae

 Xenopeltidae

Testudines (turtles, tortoises, and terrapins)

 Distinguishing features in turtles

 Key to the families of Bornean turtles

 Bataguridae

 Trionychidae
