## Part 1. Space weapons and international security—an overview

*BHUPENDRA JASANI*

<b>Chapter 1. Introduction</b>	3
Notes and references	6
<b>Chapter 2. Systems related to space weapons</b>	7
I. Some surveillance systems	7
II. Early-warning satellites	11
III. Communications satellites	11
Notes and references	12
<b>Chapter 3. Space weapons—technical aspects</b>	14
I. Kinetic energy weapons	14
II. Directed-energy weapons	25
III. Countermeasures	30
IV. Conclusions	32
Notes and references	32
<b>Chapter 4. Can space weapons be controlled?</b>	36
I. Is a defence-dominant world possible?	36
II. Interpretation of the ABM Treaty	38
III. Implications	40
IV. Prospects for an ASAT Treaty	41
V. Some possible ASAT measures	43
VI. Conclusions	43
Notes and references	44
<b>Chapter 5. Space weapons—international dimension</b>	46
I. SDI and Europe	46
II. International impact of SDI	50
III. Conclusions	51
Notes and references	53
<b>Chapter 6. Conclusions</b>	54

## Part II. Technical aspects of space weapons

<b>Paper 1. Technical issues for strategic defence research</b>	59
<i>STEPHEN D. ROCKWOOD</i>	
I. Introduction	59
II. Boost-phase and mid-course weapons	60
III. Defence constellations	66
IV. Research issues	67
V. Summary	68
Notes and references	69
<b>Paper 2. Enforcing BMD against a determined adversary?</b>	71
<i>RICHARD L. GARWIN</i>	
I. General emphasis on defence	71
II. Defence for what?	71
III. Candidate systems	72
IV. Required performance	73
V. Countermeasures	74
VI. Mid-course intercept	78
VII. Active discrimination of mid-course decoys	78
VIII. Countering the defensive response to countermeasures	80
IX. Epilogue	82
Notes and references	83
<b>Paper 3. 'Star Wars' down to earth: A technical operational and bureaucratic assessment</b>	
<i>KOSTA TSIPIS</i>	85
I. Introduction	85
II. Some technical difficulties	86
III. Operational difficulties of entire system	89
IV. Bureaucratic difficulties	90
Notes and references	90
<b>Paper 4. Measures for counteracting space strike weapons</b>	91
<i>ANDREI A. KOKOSHIN, ALEXEI A. VASSILIEV AND MIKHAIL I. GERASYOV</i>	
I. Introduction	91
II. Special measures of destruction and neutralization of a large-scale ABM system with space-based elements	91
III. Strategic nuclear weapon developments as a means of maintaining adequate retaliatory capability	93
IV. Conclusion	97
<b>Paper 5. Sub-systems of battle management for an echeloned space-based anti-missile system</b>	99
<i>ANDREI A. KOKOSHIN, VIKTOR M. SERGEYEV, AND ALEXEI A. VASSILIEV</i>	

I. Introduction	99
II. The sub-system architecture	99
III. The problem of vulnerability	100
IV. The problem of the degree of responsibility delegation	101
V. Creating software and detecting programming mistakes	101
VI. Conclusion	103
Notes and references	103

### Part III. Space weapons vs deterrence: policies and arms control

#### **Paper 6. Defending versus avenging: a critical assessment of SDI and MAD policies** 107 *BARRY R. SCHNEIDER AND COLIN S. GRAY*

I. Introduction	107
II. The case for SDI	108
III. The critics' case against SDI	112
IV. MAD and MAS: continuities and discontinuities	118
V. The USSR and SDI: co-operation or competition?	120
VI. SDI implications for US arms control positions	129
Notes and references	132

#### **Paper 7. Implications of change from MAD to defensive policies** 135 *SIDNEY D. DRELL*

I. Mutual assured deterrence (MAD)	135
II. Technical appraisal of strategic defence	136
III. Requirement of restraint of offensive forces	138
IV. Problems of the transition to a defensive policy	139
V. Implications for Europe and the alliance	141
VI. Conclusion	143
Notes and references	143

#### **Paper 8. Implications of US and Soviet BMD programmes for the ABM Treaty** 145 *JOHN B. RHINELANDER*

I. Introduction	145
II. Analysis of the ABM Treaty	147
III. Interpretation Issues	149
IV. The SDI programme	149
V. US BMD programmes	152
VI. Impact of SDI on the USSR and on US allies	152
VII. Soviet BMD programmes	153
VIII. Principal US and Soviet compliance issues	154
IX. Enhancement of the ABM Treaty	156
X. Conclusion	159
Notes and references	160

<b>Paper 9. The ABM Treaty: to be or not to be</b>	163
<i>SUNE DANIELSSON</i>	
I. Introduction	163
II. Some legal aspects of the ABM Treaty	163
III. X-ray lasers and the Outer Space Treaty and Partial Test Ban Treaty	171
IV. The ASAT connection	172
V. Some implications of the introduction of space weapons	173
VI. Conclusions	175
Notes and references	176
<b>Paper 10. Preventing the militarization of space: is it necessary or possible?</b>	179
<i>ALEXEY G. ARBATOV AND BORIS G. MAYORSKY</i>	
I. Introduction	179
II. Space strike weapons: impact on security	181
III. Legal barriers to space weapons	186
IV. Soviet research	188
V. Need for new agreements	189
Notes and references	192
<b>Paper 11. Possible ASAT arms control agreements</b>	193
<i>WALTER SLOCOMBE</i>	
I. Introduction	193
II. Objectives of agreement: ASAT threats to stability	194
III. Obstacles to agreement	197
IV. Possible ASAT arms control agreements	200
V. Prospects	206
Notes and references	207
<b>Paper 12. Space weapon verification</b>	209
<i>DONALD M. KERR</i>	
I. Prospects for space and defence arms control	209
II. The classification of space arms	211
III. Architectures	220
IV. The implications of limited verifiability	221
V. Strategic implications of clandestine or unverified limited defences	222
VI. Potential strategic benefits of limited deployments	223
<b>Part IV. International dimension</b>	
<b>Paper 13. Implications of SDI for NATO and possibilities of agreement</b>	229
<i>SANFORD A. LAKOFF</i>	
I. Introduction	229
II. Political prospects for SDI in the US	230
III. SDI and NATO: the US 'Dual-Track' approach	231
IV. SDI and US-Soviet relations	231
V. Three interrelated questions	232

VI. Conclusions	241
Notes and references	242
<b>Paper 14. Strategic defences: facts and opinions</b>	245
<i>RONALD MASON</i>	
I. The UK position	245
II. Deterrence and defence in Western Europe	245
III. Problems	246
IV. Conclusions	247
<b>Paper 15. How new ASAT and BMD developments could affect third countries</b>	249
<i>BENOIT D'ABOVILLE AND MICHEL GUIONNET</i>	
I. Implications of ASAT developments	249
II. BMD implications	250
III. Conclusions	254
<b>Paper 16. The impact of SDI on international security</b>	257
<i>YAO WENBIN</i>	
I. The background of SDI	257
II. Possible impact of SDI	260
III. Conclusion	263
Notes and references	263
<b>Paper 17. Implications of high technology for disarmament</b>	265
<i>RYUKICHI IMAI</i>	
I. Introduction	265
II. The action-reaction model	266
III. Barriers to meaningful contributions to the space debate	268
IV. Research and development: military and civilian objectives	271
V. The challenge for arms control	272
Notes and references	274
<b>Part V. Politics of space weapons</b>	
<b>Paper 18. The Soviet attitude to strategic defence</b>	277
<i>YEVGENIY VELIKHOV</i>	
I. Contradictory motives	277
II. The impact of SDI	278
III. Conclusions	279
<b>Paper 19. The strategic context of SDI: a US assessment of Soviet attitudes towards mutual vulnerability</b>	281
<i>FRANK GAFFNEY</i>	
I. Introduction	281

II. Phase one: 1965–72	281
III. Phase two: 1972–83	284
IV. The current phase and the future	296
<b>Paper 20. SDI from the viewpoint of the non-aligned nations</b>	297
<i>MUJKUND DUBEY</i>	
I. Introduction	297
II. The consequences of SDI	298
<b>Paper 21. Strategic defence in Western Europe</b>	303
<i>JOHN WILKINSON</i>	
I. Introduction	303
II. Soviet commitment to strategic defence	304
III. Examination of arguments against SDI	304
IV. Towards a saner world order	306
V. Conclusion	308
<b>Appendix 1. Treaties and treaty proposals which contain provisions aimed at some form of arms control in space</b>	311
Partial Test Ban Treaty (1963)	311
Outer Space Treaty (1967)	312
ABM Treaty (1972) and Protocol (1974)	315
Moon Treaty (1979)	323
1981 Soviet proposal	327
1983 Soviet proposal	328
1985 Soviet proposal	330
<b>Appendix 2. Special report on strategic defence</b>	332
<b>Appendix 3. Opening address by Birgitta Dahl, Swedish Minister of Energy</b>	349
<b>Appendix 4. Conference delegates</b>	352
<b>Appendix 5. Further reading</b>	353
<b>Glossary</b>	355
<b>Index</b>	359
