# CONTENTS

PREFACE	xiii
ACKNOWLEDGMENTS	xv
ABBREVIATIONS	xvii

---

## 1 INTRODUCTION

Overview	1
Definitions	6
<i>Source–Receptor Relationships</i>	6
<i>Chemical Constituents</i>	6
<i>Deposition Processes</i>	8
<i>Visibility</i>	8
<i>Scale of Phenomena</i>	8
Descriptive Factors	11
<i>Emission Distributions</i>	11
<i>Meteorological Factors</i>	11
Role of Major Experiments	14

## 2 CLIMATOLOGICAL FACTORS IN EASTERN NORTH AMERICA

---

Role of Climate Factors	17
<i>Factors Influencing Exposure</i>	17
<i>Factors Influencing Visibility</i>	19
Climate of Eastern North America	20
<i>Airflow</i>	20
<i>Mixing</i>	22
<i>Prevailing Conditions for Dry Deposition</i>	24
Moisture Content, Clouds, and Precipitation	24
<i>Cloud Cover and Microphysics</i>	26
<i>Precipitation</i>	28
Variability in Aerometric Factors	34
<i>Airflow and Wind Trajectories</i>	34
<i>Air Mass Trajectories</i>	34
<i>Mixing</i>	35
<i>Cloudiness and Precipitation</i>	38

## 3 CHARACTERIZATION OF REGIONAL AIR AND DEPOSITION CHEMISTRY

---

Overview	41
Measurement Methods	49
Ambient Concentrations	51
<i>Spatial Distributions</i>	61
<i>Temporal Changes</i>	68
<i>Vertical Structure</i>	72
Visibility	76
Precipitation Chemistry	81
Cloud Chemistry	86
Deposition Rates	92
<i>Wet Deposition</i>	92
<i>Dry Deposition</i>	92
<i>Cloud and Fog Interception</i>	96
<i>Relative Contributions</i>	96
Source-Receptor Relationships	100
<i>Comparison of Spatial Distributions</i>	100
<i>Comparison of Temporal Changes</i>	102

---

## 4 AIR CHEMISTRY AND ATMOSPHERIC PROCESSES

- Description of Events 122
  - Event Days* 122
  - Event Duration* 124
  - Representativeness and Seasonal Occurrence* 126
- Case Studies 128
  - Fall Stagnation: 27–30 October 1977* 128
  - Winter Regional Stagnation: 21–24 January 1978* 134
  - Group 2 Regional Event: 18–23 July 1978* 138
  - Summary* 150
- Prevailing Climatological Features Link to Anticyclonic Systems 152
  - Air Mass Classification of Aerometric Data* 155
  - Relation of Event Groupings to Weather Changes* 165
  - Air Mass Classifications and Cloud Chemistry* 168

---

## 5 INHERENT VARIABILITY IN DEPOSITION CHEMISTRY

- Emission Variability 176
  - Emission Inventories* 176
- Temporal Variability in Aerometric and Deposition Data 181
  - Frequency Distributions* 182
  - Data Representation by Multivariate Analysis* 187
  - Elements of Principal Component Analysis* 188
  - Approach to Analysis from Observations* 195
- Spatial Variability of Data 219
  - Ambient Concentrations* 219
  - Wet Deposition* 222
- Analysis of Spatial Variability 225
  - Kriging Representation* 226
  - Empirical Orthogonal Functions and Their Interpretation* 231
  - Correspondence between Emissions and Ambient Concentrations* 236
- Air Mass Classification by Multivariate Analysis 238
  - Cluster Analyses of Meteorological Conditions at MAP3S Stations* 238
- Variability and Source–Receptor Relationships 249
  - Application of Covariance Analysis* 249
  - An Optimal Sampling Network Design* 257

## 6 THEORETICAL INFERENCE OF SOURCE–RECEPTOR RELATIONSHIPS

---

Overview	263
Inventory of Models	266
Analytical Models	267
Lagrangian Models	267
Eulerian Models	279
Process Description	281
Transport and Advection	281
Dispersion	284
Mixing Height and Dispersion	286
Chemical Transformations	287
Removal Processes	291
Calculation of Meteorological Conditions	296
The Wind Field	296
Simplified Physically Based Models	300
Clouds and Precipitation	302
Reliability of Airflow Estimation	304
Results of Model Simulations	306
Source–Receptor Relationships	307
Natural Potentials	312
Sensitivity Analysis	315
Measures of Performance	323
Regional Model Applications	340
Sulfur Budget for Eastern North America	340
Planning for Emission Control	341
Uncertainty in Experimental Design for SSRs	344
Summary	353

## 7 RETROSPECTIVE

---

Status of Knowledge	356
Perspective and Uncertainties	360
Future Prospects	363
Context of Regulatory Policy	363

---

APPENDIX **A** **CHEMICAL CONVERSION AND DEPOSITION PROCESSES**

Introduction	365
Chemical Conversion	365
<i>Gas-Phase Processes</i>	366
<i>Aqueous-Phase Cloud Water Chemistry</i>	371
<i>Coupled Gas/Liquid Acid Generation</i>	376
Dry Deposition	378
<i>Deposition of Gases</i>	379
<i>Controlling Gas Processes</i>	385
<i>Deposition of Particles</i>	387
Wet Scavenging	388
<i>Nucleation Scavenging</i>	389
<i>Collision Processes</i>	392
<i>Cloud Droplet Deposition on Trees</i>	397

---

APPENDIX **B** **ATMOSPHERIC VISIBILITY**

Definitions of Terms	399
Optical Properties	400
<i>Apparent Radiance</i>	402
<i>Equilibrium Radiance</i>	402
<i>Contrast Measurements</i>	412
Parameters Characterizing Human Perception	416
