PREFACE

xv

Part I

The Elements of Air Pollution

1	<i>The History of Air Pollution</i>	
	I. Before the Industrial Revolution	3
	II. The Industrial Revolution	6
	III. The Twentieth Century	8
	IV. The 1980s	13
	V. The Future	15
	References	15
	Suggested Reading	16
	Questions	17
2	<i>The Natural versus the Polluted Atmosphere</i>	
	I. The Atmosphere	18
	II. Unpolluted Air	19
	III. Particulate Matter	22
	IV. Concepts	28
	References	33

	Suggested Reading	33
	Questions	34
3	<i>Scales of the Air Pollution Problem</i>	
	I. Local	36
	II. Urban	37
	III. Regional	39
	IV. Continental	40
	V. Global	42
	References	44
	Suggested Reading	45
	Questions	45
4	<i>Air Quality</i>	
	I. Averaging Time	47
	II. Cycles	49
	III. Primary and Secondary Pollutants	51
	IV. Measurement Systems	52
	V. Air Quality Levels	54
	References	63
	Suggested Reading	63
	Questions	63
5	<i>The Philosophy of Air Pollution Control</i>	
	I. Strategy and Tactics—The Air Pollution System	65
	II. Episode Control	67
	III. Air Quality Management Control Strategy	70
	IV. Alternate Control Strategies	72
	V. Economic Considerations	74
	References	75
	Suggested Reading	75
	Questions	75
6	<i>Sources of Air Pollution</i>	
	I. General	76
	II. Combustion	82
	III. Stationary Sources	86
	IV. Mobile Sources	94
	V. Emission Inventory	96
	References	99
	Suggested Reading	99
	Questions	100

Part II

The Effects of Air Pollution

7	<i>Effects on Human Health and Welfare</i>	
	I. Air–Water–Soil Interactions	103
	II. Total Body Burden	105
	III. The Human Respiratory System	107
	IV. Impact of Air Pollution on Humans	110
	V. Impact of Odor on Humans	112
	References	112
	Suggested Reading	113
	Questions	113
 8	 <i>Effects on Vegetation and Animals</i>	
	I. Injury versus Damage	114
	II. Effects on Vegetation and Crops	116
	III. Effects on Forests	120
	IV. Effects on Experimental Animals	125
	V. Effects on Large or Commercial Animals	125
	References	128
	Suggested Reading	129
	Questions	129
 9	 <i>Effects on Materials and Structures</i>	
	I. Effects on Metals	130
	II. Effects on Stone	133
	III. Effects on Fabrics and Dyes	133
	IV. Effects on Leather, Paper, and Paint	136
	V. Effects on Rubber	137
	References	138
	Suggested Reading	138
	Questions	138
 10	 <i>Effects on the Atmosphere, Soil, and Water Bodies</i>	
	I. The Physics of Visibility	140
	II. Formation of Atmospheric Haze	148
	III. Effects of Atmospheric Haze	151
	IV. Visibility	152
	V. Acidic Deposition	153

VI. Effects of Acidic Deposition	156
References	157
Suggested Reading	158
Questions	158

Part III

The Measurement and Monitoring of Air Pollution

11	<i>Atmospheric Chemistry</i>	
	I. Types of Atmospheric Chemical Transformations	161
	II. Role of Solar Radiation in Atmospheric Chemistry	163
	III. Gas Phase Chemical Reaction Pathways	164
	IV. Heterogeneous Reactions	173
	V. Scavenging and Removal from the Atmosphere	173
	References	173
	Suggested Reading	174
	Questions	174
12	<i>Ambient Air Sampling</i>	
	I. Elements of a Sampling System	176
	II. Sampling Systems for Gaseous Pollutants	178
	III. Sampling Systems for Particulate Pollutants	183
	IV. Static Sampling Systems	185
	V. Sampler Siting Requirements	188
	References	188
	Suggested Reading	189
	Questions	189
13	<i>Ambient Air Pollutant Analysis and Measurement</i>	
	I. Analysis and Measurement of Gaseous Pollutants	190
	II. Analysis and Measurement of Particulate Pollutants	198
	III. Analysis and Measurement of Odors	201
	IV. Analysis and Measurement of Visibility	203
	V. Analysis and Measurement of Acidic Deposition	207
	References	209
	Suggested Reading	210
	Questions	210
14	<i>Air Pollution Monitoring and Surveillance</i>	
	I. Stationary Monitoring Networks	212
	II. Mobile Monitoring and Surveillance	215

III. Remote Sensing	217
IV. Quality Assurance	219
V. Data Analysis and Display	222
References	223
Suggested Reading	224
Questions	224

Part IV

The Meteorology of Air Pollution

15	<i>The Physics of the Atmosphere</i>	
	I. Sun-Atmosphere System—Heat Balance	227
	II. Stability and Instability	235
	III. Laws of Motion	240
	IV. Local Wind Systems	245
	V. General Circulation	251
	References	254
	Suggested Reading	255
	Questions	255
16	<i>The Meteorological Bases of Atmospheric Pollution</i>	
	I. Ventilation	257
	II. Stagnation	259
	III. Meteorological Conditions during Historic Pollution Episodes	260
	IV. Effects of Pollution on the Atmosphere	265
	V. Removal Mechanisms	267
	References	270
	Suggested Reading	270
	Questions	270
17	<i>Transport and Dispersion of Air Pollutants</i>	
	I. Wind Velocity	272
	II. Turbulence	274
	III. Estimating Concentrations from Point Sources	277
	IV. Dispersion Instrumentation	287
	V. Atmospheric Tracers	294
	VI. Concentration Variation with Averaging Time	296
	References	298
	Suggested Reading	299
	Questions	300

18	<i>Air Pollution Modeling and Prediction</i>	
	I. Plume Rise	302
	II. Modeling Techniques	305
	III. Modeling Nonreactive Pollutants	308
	IV. Modeling Pollutant Transformations	309
	V. Model Performance, Accuracy, and Utilization	311
	References	317
	Suggested Reading	319
	Questions	319
19	<i>Air Pollution Climatology</i>	
	I. Sources of Data	321
	II. Representativeness	325
	III. Frequency of Atmospheric Stagnations	329
	IV. Ventilation Climatology	331
	V. Wind and Pollution Roses	333
	VI. Climate Modification	337
	References	341
	Suggested Reading	342
	Questions	342

Part V

The Regulatory Control of Air Pollution

20	<i>Air Quality Criteria and Standards</i>	
	I. Air Quality Criteria	347
	II. Conversion of Effects Data and Criteria to Standards	349
	III. Conversion of Physical Data and Criteria to Standards	353
	IV. Conversion of Biological Data and Criteria to Standards	355
	V. Air Quality Standards	356
	Suggested Reading	362
	Questions	362
21	<i>Emission Standards</i>	
	I. Subjective Standards	363
	II. Objective Standards	365
	III. Types of Emission Standards	366
	IV. Variant Forms of Emission Standards	370
	V. Means for Implementing Emission Standards	370
	References	373

	Suggested Reading	373
	Questions	374
22	<i>The Elements of Regulatory Control</i>	
	I. Control of New Stationary Sources	376
	II. Control of Existing Stationary Sources	377
	III. Control of Mobile Sources	378
	IV. Air Quality Control Regions	379
	V. Tall Stacks, and Intermittent and Supplementary Control Systems	380
	Reference	381
	Suggested Reading	381
	Questions	381
23	<i>Organization for Air Pollution Control</i>	
	I. Functions	382
	II. Organization	385
	III. Finance	388
	IV. Personnel	389
	V. Advisory Groups	394
	Suggested Reading	397
	Questions	397

Part VI

The Engineering Control of Air Pollution

24	<i>Engineering Control Concepts</i>	
	I. Introduction	401
	II. Process Change	403
	III. Fuel Change	404
	IV. Pollution Removal	406
	V. Disposal of Pollutants	407
	References	411
	Suggested Reading	411
	Questions	411
25	<i>Control Devices and Systems</i>	
	I. Introduction	413
	II. Removal of Dry Particulate Matter	415
	III. Removal of Liquid Droplets and Mists	427

IV. Removal of Gaseous Pollutants	432
V. Removal of Odors	439
References	441
Suggested Reading	441
Questions	441
26 <i>Control of Stationary Sources</i>	
I. Introduction	443
II. Energy, Power, and Incineration	444
III. Chemical and Metallurgical Industries	454
IV. Agriculture and Forest Products Industries	466
V. Other Industrial Processes	472
References	479
Suggested Reading	480
Questions	480
27 <i>Control of Mobile Sources</i>	
I. Introduction	481
II. Gasoline-Powered Vehicles	481
III. Diesel-Powered Vehicles	484
IV. Gas Turbines and Jet Engines	484
V. Alternatives to Existing Mobile Sources	486
References	487
Suggested Reading	488
Questions	488
28 <i>Source Sampling and Monitoring</i>	
I. Introduction	489
II. Source Sampling	489
III. Statistics of Sampling	491
IV. The Source Test	493
V. Source Monitoring	504
References	508
Suggested Reading	508
Questions	509
CONVERSION TABLE	511
INDEX	513
