Contents

Part I: Computers in an Alien Environment 1

Introduction 3

Introductory Remarks 3
Plan of the Book 5
The Methodological Challenge 9
Illustrations of Technological Change 10
The Broken Promise of Modernity in Africa 13
The Simulation of Postmodernity 16
Computers and Office Work 17
The New Computer Professionals 21
Conclusions 25

Chapter One
The Symbolic and the Social:
Computer Use in Two African Settings 27

Structuring Interaction with Computers 27
Two Models of Narrative and Performance 28
A Narrative Program for Computer Adoption in Africa 30
Social and Economic Environments of Computer Use in Kenya and Ivory Coast 41
Focus on Small and Medium – Sized Enterprises 43
External Computing and Internal Change 45
New Technologies as Representations of Development 48

Chapter Two
Computer-Related Successes and Excuses:
The Discourse of Confrontation 51

Introduction 51
The Discourse of Human-Machine Confrontation 53
Computer-Related Successes and Excuses 57

New Technologies as Bureaucratic Justifications 71
Conclusions 75

Chapter Three
New Technicians of the Sacred:
Technology, Belief Systems, and Social Control 77

Introduction 77
New Technicians of the Sacred: Technology and Sectarian Processes 78
External Control of Technology and Religion 85
Computers as Symbols of Change 98
Technology and Religion as Modeling Systems 100
Conclusions 103

Part II: New Technologies, Work Organization, and the Administrative Revolution 105

Chapter Four
The Last Train of the Twentieth Century:
The Computer Revolution in Ivory Coast 107

Abidjan On-Line 107
Interpreting Computer Adoption in Ivory Coast 110
The Ivorian Informatics Plans 113
INSET: The University of the Future 118
The Role of the Commercial Schools 123
The Computer Consulting Firms (SSII) 129
Overview of the Computer Consulting Firms 145
Computer Vendors 148
Conclusion: The Ivorian Picture in Comparative Perspective 152
Appendix A 155

Chapter Five
Display, Domination, and Mastery:
Computers in the Kenyan Setting 157

Decentralization vs. Centralization: The Background for Computer Adoption 157
Application of the Narrative Program to the Kenyan Setting 158

Six Computer Case Studies 160
Implications of the Kenyan Data 183
The Computer Experiment 191
The Educational Ceiling 198
Conclusions 200
Appendix B 203

Chapter Six
Socializing Workers into the New Mechanical
Solidarity 205

Philosophies of Computer Education in Kenya and Ivory Coast . . 205
Computer Training and Employment in Comparative Perspective 212
Public Training Institutions 221
Secondary Schools 226
Commercial Colleges 229
Profiles of Starehe Graduates 238
The Conversion Experience in Computer Education 244

Part III: Simulating Postmodernity 247

Chapter Seven
Indigenizing the Computer:
Social and Interpretive Practices Surrounding New Technologies . . 249

The Computer as a Tutor 249
Computers and the Semiotics of Invention 253
Analysis of the Image-Discourse Sets 256
Computers and the Discourse of Domination 269
Learning to Labor with Computers 275
The Politics of Signification in Human-Machine Interaction 277
Appendix C 280

Chapter Eight
The Computer Contract:
A Sociosemiotic Analysis of Computer Adoption 283

Introduction 283
Contractual Structures 284
Contractual Exchanges in Computer Adoption 288

Text and Paratext in Computer Use 310
The Simulacrum and the Model 312
Information and Ideology 317

Chapter Nine
Terminal Signs 321

Introduction 321
Signs of Postmodernity 323
Postmodern Narrativity African-Style 335
Africa and the Computer 342
Africa in the Postmodern Era 344
Conclusions 345

Notes 349

Glossary 371
