Introduction: On evidence and the convergence of evidence in linguistic research 1
Doris Schönefeld

Issues in collecting converging evidence: Is metaphor always a matter of thought? 33
Gerard J. Steen

PART 1. Multi-methodological approaches to constructional and idiomatic meaning

1.1 *Cognition verb constructions*

Perception and conception: The '*see* x *to be* y' construction from a cognitive perspective 57
Thomas Egan

Explaining diverging evidence: The case of clause-initial *I think* 81
Gunther Kaltenböck

1.2 *Constructional alternatives*

I am about to die vs. *I am going to die*: A usage-based comparison between two future-indicating constructions 115
Silke Höche

Studying syntactic priming in corpora: Implications of different levels of granularity 143
Stefan Th. Gries

Islands of (im)productivity in corpus data and acceptability judgments: Contrasting two potentiality constructions in Dutch 165
Ad Backus and Maria Mos

1.3 *Idioms and creative language use*

Compositional and embodied meanings of somatisms: A corpus-based approach to phraseologisms 195
Alexander Ziem and Sven Staffeldt

Word-formation patterns in a cross-linguistic perspective: Testing predictions for novel object naming in Hungarian and German 221
Susanne R. Borgwaldt and Réka Benczes

PART 2. Multi-methodological approaches to language acquisition

The interaction of function and input frequency in L1-acquisition: The case of *was...für* 'what kind of...' questions in German 249
Rasmus Steinkrauss

Relative clause acquisition and representation: Evidence from spontaneous speech, sentence repetition, and comprehension 273
Silke Brandt and Evan Kidd

Converging evidence in the typology of motion events: A corpus-based approach to interlanguage 293
Nina Reshöft

PART 3. Multi-methodological approaches to the study of discourse

Differences in the use of emotion metaphors in expert-lay communication: Converging evidence from two complementary studies 319
Anke Beger
