Contents

PREFACE	ix
1. Nonparametric Analysis	3
1.1 Introduction	3
1.2 Quantitative Analysis	4
1.3 Nonparametric Analysis	6
1.4 An Example	8
1.5 Organization of the Book	11
2. Qualitative Comparative Statics and Stability	13
2.1 Introduction	13
2.2 Sign Solvability—Background	13
2.3 The Algorithmic Approach to Strong Sign Solvability	15
2.4 The Algebraic Approach to Sign Solvability	20
2.5 Sign Stability	27
2.6 Potential Stability	36
2.7 Conclusions	38
Appendix: Special Topics in Matrix Analysis	40
3. Information and Invertibility	49
3.1 Introduction	49
3.2 An Algebraic Analysis of Qualitative Invertibility	50
3.3 The Elimination Principle	56
3.4 Categorizing Information	60
3.5 The Invertibility of Matrices with Ranked Entries	63
3.6 The Invertibility of Matrices with Entries Specified within Given Intervals	81
3.7 Summary of the Algebraic Method	85
3.8 Stability	86
4. Applications in Qualitative Comparative Statics	92
4.1 Introduction	92

4.2	Algorithmic Principles	93
4.3	A Qualitative Analysis of the Oil Market Simulation Model	98
4.4	A Qualitative Analysis of the Oil and Gas Supply Model	104
4.5	Klein's Model I	117
4.6	Summary	121
5.	The Maximization Hypothesis	122
5.1	Introduction	122
5.2	Unconstrained Maximization	122
5.3	Application: Profit-Maximizing Choices of Inputs by a Competitive Firm	134
5.4	Constrained Maximization	136
5.5	Application: Minimizing the Cost of Production	141
	Appendix: Advanced Topics in Matrix Analysis	143
6.	The Correspondence Principle	150
6.1	Introduction	150
6.2	An Example	152
6.3	Stability and Sign Solvability	157
6.4	GM-Matrices	161
6.5	Scope of the Correspondence Principle	165
6.6	Interpretation	168
7.	The Competitive Equilibrium: Comparative Statics	170
7.1	Introduction	170
7.2	A Competitive Economy	171
7.3	Some Historical Comments	174
7.4	Restatement of Sign Solvability	176
7.5	Sign Solvability under Walras's Law	180
7.6	Sign Solvability under Walras's Law and Homogeneity	196
8.	The Competitive Equilibrium: Stability	206
8.1	Introduction	206
8.2	Stability under Walras's Law and Homogeneity	208
	NOTES	223
