<i>PREFACE</i>	<i>ix</i>
<i>ACKNOWLEDGMENTS</i>	<i>xi</i>

1

Introduction and Overview

Terminology	3
The Proximate Determinants	3
Fertility and the Proximate Determinants	5
Variations in Individual Fertility	9
Age-Specific Fertility	12
The Determinants of the Proximate Variables	14
The Organization of This Book	18
References	18

2

Natural Fertility and Its Proximate Determinants

Natural Fertility	21
The Proximate Determinants of Natural Marital Fertility	23
The Effect of the Proximate Determinants on Natural Fertility	44
Summary	46
References	47

3

Regulated Fertility and Its Proximate Determinants

Regulated Fertility	53
Marriage	57

Contraceptive Use	61
Contraceptive Effectiveness	65
Induced Abortion	71
Summary	73
Appendix	73
References	76

4

An Aggregate Fertility Model

The Structure of the Model	78
Direct Estimation of the Fertility Effects of the Proximate Determinants	81
Testing the Validity of the Model	87
The Proximate Determinants of Fertility Levels TF, TN, TM, and TFR	93
Summary	98
Appendix: An Equation for Estimating C_c	99
References	101

5

Applications of an Aggregate Fertility Model

Application 1: The Transition in the Proximate Determinants	103
Application 2: Decomposition of a Change in Fertility	106
Application 3: Socioeconomic Differentials in Marital Fertility	112
Application 4: An Age-Specific Fertility Model	114
Application 5: The Empirical Relationship between Fertility and Contraceptive Prevalence	118
Application 6: Projected Fertility Trends Associated with Changes in Contraceptive Practice	122
Application 7: Contraceptive Prevalence Levels Required to Reach a Fertility Target	124
Summary	125
References	126

6

A Macrosimulation Model and Applications to Fecundity and Natural Fertility

Introduction	127
Reproductive Models	130

REPMOD	132
Validation of the Model	138
Application to Fecundity	140
Natural Fertility	143
Summary	148
References	149

7

Family-Size Control

Introduction	151
Operationalization	154
Subfertility	156
Excess Fertility	162
Some Additional Topics	174
Summary	177
References	178

8

Birth Spacing

Introduction	180
Previous Study	182
Unregulated Birth Spacing	184
Master-Schedule Spacing	186
Serial-Spacing Preferences	190
Evaluating Fecundability	195
Pinpoint Spacing	198
Summary	198
References	199

9

Sex Preselection

Introduction	201
Previous Research	203
An Alternative Approach	207
Assumptions	209
Birth-Trial Probabilities	211
Family Composition without Sex Preselection	213

Sequential Goals	214
Compositional Goals	216
Spacing Consequences	219
Summary	221
References	222
