1 Introduction by <i>Iftikhar Ahmed</i>	
Background	1
Objectives	2
Methodology and design	5
Summary and highlights	6

Part I CONCEPTUAL APPROACHES

2 Technological Change and Rural Women: A Conceptual Analysis by <i>Amit Bhaduri</i>	
Relevance of traditional analysis	15
A relevant analytical framework	19
Social acceptability of technological change among rural women	25
3 Effects of Technological Change on Rural Women: A Review of Analysis and Concepts by <i>Ann Whitehead</i>	
Introduction	27
Women and technological change: some pointers from the literature	29
Evidence from the Green Revolution	30
Technological innovation and the intensification of women's work within the peasant household	36
Some characteristics of unremunerated labour within the peasant household	37
Factors affecting the intensification of women's work: the sexual division of labour	41
Further implications for technological change and women	49

vi *Technology and Rural Women*

Gender hierarchy and the rural production system: women and access to resources	51
How to conceptualise women in the rural production system?	51
Gender hierarchy in access to productive resources: land	52
Gender hierarchy in costs and access for women	57
Concluding remarks	62

Part II EMPIRICAL OVERVIEWS

4 Women and Technological Change in Agriculture: The Asian and African Experience <i>by Bina Agarwal</i>	
Introduction	67
Some conceptual issues: intra-household distribution of work, income and consumption	69
Distribution of work burden	70
Control and sharing of household income	74
Sharing of household food	76
The impact of technological change in agriculture by class and gender	78
The Asian experience	80
The African experience	103
Forms of survival	109
Concluding comments	111
5 Technologies for Rural Women: Impact and Dissemination <i>by Marilyn Carr</i>	
Introduction	115
Current situation	117
Role of women and division of labour	117
Technologies relevant to rural women's tasks	120
Impact and dissemination of technologies	124
Major problem areas	142
Limited impact	143
Limited dissemination	144
Limited access	145
A new approach	150

Part III PROGRAMMES AND PROJECTS

6	Modernisation, Production Organisation and Rural Women in Kenya by <i>Vivianne Ventura-Dias</i>	
	Introduction	157
	Outline and analytical approach	161
	Historical overview	163
	The division of labour between sexes	163
	Social differentiation and technical change	165
	Rural women in modern Kenya	172
	Rural women and the agrarian structure	172
	Access to sources of capital formation and credit	178
	Employment alternatives for rural women	180
	Alternative technologies for rural women	184
	The nature of female tasks	184
	The household unit of production	192
	The nature of technological change	194
	Reallocation of labour time	197
	Summary and conclusions	205
7	Technologies for Rural Women of Ghana: Role of Socio-Cultural Factors by <i>Eugenia Date-Bah</i>	
	Introduction	211
	Potential for technological improvements in rural women's traditional activities	213
	Farming	214
	Agricultural extension services	220
	Land tenure system	221
	Food processing	223
	Domestic chores	226
	Other activities	230
	Constraints to technological improvements in rural women's activities	234
	Food processing	235
	Other improved technologies	237
	Strategies for technology diffusion	242
	Conclusions	247

8	Innovation and Rural Women in Nigeria: Cassava Processing and Food Production by Tomilayo Adekanye	
	Introduction	252
	Objectives	253
	Survey design	253
	Technology of <i>gari</i> processing	255
	Traditional processing	255
	Mechanised processing	258
	Time spent in processing	258
	Traditional processing	259
	Mechanised processing	261
	Costs and returns	264
	Traditional processing	264
	Mechanised processing	269
	Innovation, women and development	270
	Alternative technologies	270
	Impact of innovations	272
	Conclusions and policy implications	279
	Conclusions	279
	Policy implications	280
9	Improved Technologies for Rural Women: Problems and Prospects in Sierra Leone by Yvette Stevens	
	Introduction	284
	Technology spectrum for rural women's tasks – review and appraisal	289
	Cooking	295
	Water collection and storage	296
	Farming	298
	Rice processing	298
	Food preservation	300
	Food processing	301
	<i>Gari</i> (tie) dyeing	306
	<i>Lubi</i> and 'black' soap production	307
	'Soda' soap preparation	308
	Handicrafts	308
	Shallow water fishing	309
	Conditions for the widespread adoption of improved technologies	309

Flow chart for the introduction of improved technologies	312
Examination of 'improved' technologies developed in the light of the conditions for widespread adoption	315
Problems of generation, production and diffusion of improved technologies in Sierra Leone	315
Improved technologies to increase production, relieve boredom and save women's labour time	319
Cooking stoves	319
Problems of water supply	320
Farming and rice processing	321
Food preservation	322
Food processing technology	323
Improved technologies in income-generating activities	324
Conclusions	324
10 Conclusions <i>by Iftikhar Ahmed</i>	
Introduction	327
Traditional macroeconomic theories	327
Prediction of impact	327
Labour and production processes	328
The institutional basis of female labour input	329
Are women a homogeneous group?	330
The household as a unit of analysis	331
Mechanisms and causes of female labour displacement	331
Factor price distortions	331
Scale of production and commercialisation	332
Rural factor market imperfections, technology choice and the institutionalisation of sexual discrimination	333
Diffusion of innovations	334
Technology and welfare	336
Areas for future research	336
Bibliography	342
Index	370
