# Environmental Assessment

**R. K. Jain, Ph.D., P.E.**

*Director*

*Army Environmental Policy Institute*

*Adjunct Professor*

*University of Illinois*

*Research Affiliate*

*Massachusetts Institute of Technology*

**L. V. Urban, Ph.D., P.E.**

*Director*

*Water Resources Center*

*Professor of Civil Engineering*

*Texas Tech University*

**G. S. Stacey, Ph.D.**

*Senior Economist*

*Battelle-Europe Centres de Recherche de Genève*

**H. E. Balbach, Ph.D.**

*Senior Scientist*

*Environmental Research Program Manager*

*U. S. Army Corps of Engineers*

# Contents

**Preface**    xi

<b>Chapter 1. Environmental Assessment</b>	<b>1</b>
1.1 What Is Environmental Assessment?	4
1.2 Why Environmental Assessment Is Needed	6
1.3 Who Prepares Environmental Assessment Documents?	7
1.4 Integrating Art and Science	9
1.5 Discussion and Study Questions	9
1.6 Further Readings	10
 <b>Chapter 2. Environmental Laws and Regulations</b>	 <b>13</b>
2.1 Rationale for Environmental Legislation and Regulations	14
2.2 Shortcomings of Environmental Legislation and Regulations	15
2.3 Legislative Data Systems	15
2.4 Overview of Federal Environmental Legislation	18
2.5 Balancing Economic and Environmental Costs	38
2.6 Discussion and Study Questions	40
2.7 Further Readings	41
 <b>Chapter 3. National Environmental Policy Act</b>	 <b>43</b>
3.1 Elements of NEPA	44
3.2 Judicial Review	45
3.3 Effects of NEPA	48
3.4 Implementation of NEPA	49
3.5 Council on Environmental Quality (CEQ)	50
3.6 Executive Orders and Agency Response	51
3.7 State Environmental Policy Acts	53
3.8 Discussion and Study Questions	54
3.9 Further Readings	55

<b>Chapter 4. Environmental Documents and CEQ Regulations</b>	<b>57</b>
4.1 Function and Purpose of the Assessment Process	57
4.2 NEPA Regulations	60
4.3 Environmental Documents	62
4.4 Discussion of the EA/EIS and Finding of No Significant Impact	64
4.5 EIS Format and Content	65
4.6 Processing of the EA/EIS	71
4.7 Timing of Agency Action	75
4.8 Tiering	76
4.9 Scoping Process	76
4.10 Mitigation	78
4.11 General Considerations In EIS Preparation	79
4.12 Discussion and Study Questions	79
4.13 Further Readings	80
 <b>Chapter 5. Elements of Environmental Assessment</b>	 <b>83</b>
5.1 Agency Activities	83
5.2 Environmental Attributes	84
5.3 Determining Environmental Impact	104
5.4 Report Findings	112
5.5 Discussion and Study Questions	113
5.6 Further Readings	114
 <b>Chapter 6. Environmental Assessment Methodologies</b>	 <b>115</b>
6.1 Choosing a Methodology	115
6.2 Categorizing Methodologies	118
6.3 Review Criteria	120
6.4 Methodology Descriptions	123
6.5 Methodology Review	126
6.6 Future Directions	139
6.7 Discussion and Study Questions	140
6.8 Further Readings	140
 <b>Chapter 7. Generalized Approach for Environmental Assessment</b>	 <b>141</b>
7.1 Agency Activities	141
7.2 Environmental Attributes	145
7.3 Institutional Constraints	148
7.4 Environmental Setting	149
7.5 System	149
7.6 Output	149
7.7 Rationale for a Computer-Based System	150
7.8 Discussion and Study Questions	151
7.9 Further Readings	151

<b>Chapter 8. Procedure for Reviewing Environmental Impact Statements</b>	<b>153</b>
8.1 Types of EIS Review	154
8.2 General Considerations in EIS Review	158
8.3 EIS Review Procedures	160
8.4 Approaches to Systematic EIS Review	161
8.5 Summary	169
8.6 Discussion and Study Questions	170
8.7 Further Readings	171
<b>Chapter 9. International Perspectives on Environmental Assessment</b>	<b>173</b>
9.1 International Implications of NEPA	174
9.2 Future NEPA Trends	176
9.3 Environmental Assessment in Other Countries	177
9.4 EA in Developing Countries	178
9.5 Limitations to EA Effectiveness in Developing Countries	179
9.6 EA in Asia and the Pacific	180
9.7 EA in Latin America	180
9.8 EA in Canada	181
9.9 EA in Europe	181
9.10 International Aid Organizations	183
9.11 Discussion and Study Questions	184
9.12 Further Readings	185
<b>Chapter 10. Economic and Social Impact Assessment</b>	<b>187</b>
10.1 Socioeconomic Assessment within NEPA	188
10.2 Economic Impact Analysis	189
10.3 Economic Models	191
10.4 Future Direction for Economic Impact Analysis	199
10.5 Social Impact Assessment	199
10.6 Social Impact Analysis Methods	202
10.7 Assembling the Socioeconomic Impact Assessment	207
10.8 Problem Areas	214
10.9 Conclusions	217
10.10 Discussion and Study Questions	217
10.11 Further Readings	218
<b>Chapter 11. Public Participation</b>	<b>219</b>
11.1 Beginnings	219
11.2 Early American Experiences in Public Participation	220
11.3 Modern Applications of the Participation Concept	222
11.4 Public Involvement Requirements within NEPA	222
11.5 What Is a Public?	223
11.6 What Is Participation?	225

11.7	Contemporary Experience In Public Participation	226
11.8	Getting Input from the Public	229
11.9	Commenting on the Draft EIS—A Special Case of Public Participation	229
11.10	Case Study Example 1	230
11.11	Case Study Example 2	232
11.12	Application of Public Input	233
11.13	Participation In Developing Regulations	234
11.14	An Effective Public Participation Program	235
11.15	Benefits from an Effective Public Participation Program	236
11.16	Discussion and Study Questions	237
11.17	Further Readings	240
<b>Chapter 12.</b>	<b>Energy and Environmental Assessment</b>	<b>241</b>
12.1	Energy as a Resource	242
12.2	Fuel Alternatives and Development of Supplies—Environmental Considerations	246
12.3	Energy Costs of Pollution Control	249
12.4	Energy Aspects of Recycling Materials	250
12.5	Discussion and Study Questions	256
12.6	Further Readings	256
<b>Chapter 13.</b>	<b>Contemporary Issues In Environmental Assessment</b>	<b>259</b>
13.1	Global Warming	259
13.2	Acid Rain	267
13.3	Deforestation	273
13.4	Endangered Species and NEPA	275
13.5	Biodiversity	284
13.6	Cultural Resources	290
13.7	How Are These Contemporary Issues Different?	298
13.8	Discussion and Study Questions	299
13.9	Further Readings	300
<b>Appendix A.</b>	<b>National Environmental Policy Act</b>	<b>301</b>
<b>Appendix B.</b>	<b>Attribute Descriptor Package</b>	<b>309</b>
Air		
1.	Diffusion factor	309
2.	Particulates	310
3.	Sulfur Oxides	313
4.	Hydrocarbons	316
5.	Nitrogen oxide	320
6.	Carbon monoxide	324
7.	Photochemical oxidants	328
8.	Hazardous toxicants	330
9.	Odors	332
		336

**Water**

10. Aquifer safe yield	342
11. Flow variations	344
12. Oil	349
13. Radioactivity	351
14. Suspended solids	352
15. Thermal discharge	354
16. Acid and alkali	356
17. Biochemical oxygen demand	358
18. Dissolved oxygen (DO)	359
19. Dissolved solids	361
20. Nutrients	362
21. Toxic compounds	364
22. Aquatic life	366
23. Fecal coliforms	368
	369

**Land**

24. Erosion	371
25. Natural hazards	371
26. Land use patterns	376
	383

**Ecology**

27. Large animals (wild and domestic)	387
28. Predatory birds	388
29. Small game	391
30. Fish, shellfish, and waterfowl	394
31. Field crops	396
32. Listed species	401
33. Natural land vegetation	404
34. Aquatic plants	407
	410

**Sound**

35. Physiological effects	413
36. Psychological effects	413
37. Communication effects	421
38. Performance effects	425
39. Social behavior effects	429
	433

**Human Aspects**

40. Life styles	435
41. Psychological needs	436
42. Physiological systems	438
43. Community needs	440
	441

**Economics**

44. Regional economic stability	444
45. Public sector revenue and expenditures	444
46. Per capita consumption	446
	449

**Resources**

47. Fuel resources	452
48. Nonfuel resources	453
49. Aesthetics	456
	459

**Appendix C. A Step-by-Step Procedure for Preparing  
Environmental Assessments and Statements**

**Appendix D. Regulations for Implementing Procedural Provisions  
of the National Environmental Policy Act**

**473**

**Bibliography 509**

**Index 517**
