CONTENTS

1. The Arachidonic Acid Cascade	1
Prostate Extracts and Perfused Lungs	7
2. Biosynthesis, Storage and Mobilization of Arachidonic Acid ...	15
Arachidonic Acid Biosynthesis	16
Incorporation into Phospholipids	17
Pathways of Arachidonate Mobilization	20
Phospholipases A ₂ : An Overview	21
Group IV Phospholipase A ₂	24
Group I and II Phospholipases A ₂	25
Calcium-Independent Phospholipase A ₂	29
Proteins that Modulate Phospholipase A ₂ Activity	31
The Phospholipase C/Acylglycerol-Lipase Pathway	31
Phospholipase D	34
Inhibitors of Arachidonate Mobilization	35
Receptor-Dependent Control of Arachidonate Mobilization	35
Receptors that Stimulate Arachidonate Mobilization	37
Some Receptors May Inhibit Arachidonate Mobilization	40
A Third Group of Receptors Facilitate Arachidonate Mobilization, but Do Not Stimulate it Directly	42
Second Messenger Interactions on Arachidonate Mobilization	45
3. Before Metabolism: Arachidonate as an Intracellular Second Messenger	55
How Much Free Arachidonate Is Produced in Cells?	56
How Is Arachidonate Transported Within Cells?	60
Direct Modulation of Ion Channels by Arachidonate	63
Arachidonate Modulation of Protein Kinase C	69
Physiological Roles?	73
4. Arachidonate Metabolism	79
Arachidonate Metabolism: An Overview of Analytical Methods	81
Enzymes of Prostanoid Biosynthesis	84
The Lipoxygenases	103
Cytochrome P ₄₅₀	117

5. The Eicosanoids in Cellular Signaling	133
Eicosanoids as Second Messengers.....	134
How Do Eicosanoids Exit Cells?	145
The Prostanoid Receptors	148
The Leukotriene Receptors	155
A High-Affinity Lipoxin Receptor	157
6. Arachidonate Derivatives	
as Endogenous Cannabinoid Substances	167
The Pharmacology of Cannabis.....	168
Searching for an Endogenous Cannabinoid Substance	173
The Rediscovery of N-Acylethanolamines	177
Formation of Anandamide and Other N-Acylethanolamines	181
Anandamide Inactivation: Uptake and Enzymatic Hydrolysis	184
Lipoxygenase Metabolism of Anandamide	187
A Second Endogenous Cannabinoid: sn-2-Arachidonoyl-Glycerol	189
Open Questions	191
