

# The Ecology of Fishes on Coral Reefs

Edited by  
**Peter F. Sale**  
Department of Zoology  
University of New Hampshire  
Durham, New Hampshire

**ACADEMIC PRESS, INC.**

*Harcourt Brace Jovanovich, Publishers*

San Diego New York Boston London Sydney Tokyo Toronto

# CONTENTS

Contributors	xiii
Foreword	xv
Preface	xvii

## **PART I BASICS**

### **CHAPTER 1. Introduction**

Peter F. Sale

- I. Ecology of Coral Reef Fishes 3**
- II. A Crash Course for the Nonspecialist 8**
- III. Structure of This Book 11**

### **CHAPTER 2. The Visual World of Coral Reef Fishes**

William N. McFarland

- I. Introduction 16**
- II. Light in Tropical Seas: Attenuation and Hue 16**
- III. The Vision of Fishes 18**
- IV. Correlations of Scotopic Vision and Light 20**
- V. Correlations of Photopic Vision and Light 31**
- VI. Topics for Further Study 36**

### **CHAPTER 3. Reef Fishes: Their History and Evolution**

J. H. Choat and D. R. Bellwood

- I. Introduction 39**
- II. What Are Reef Fishes? 41**
- III. Reefs as Habitats 43**
- IV. Key Features of the Reef Fish-Habitat Relationship 47**

- V. The Origin of Reef Fishes 54
- VI. Morphology, Phylogeny, and History: Reef Fishes Revisited 61

## **PART II TROPHIC ECOLOGY**

### **CHAPTER 4. Trophic Relationships of Fishes Specialized to Feed on Zooplankters above Coral Reefs**

Edmund S. Hobson

- I. Introduction 69
- II. Diurnal Planktivores 70
- III. Crepuscular Changeover 81
- IV. Nocturnal Planktivores 85
- V. Vulnerability of Zooplankters above Reefs 92
- VI. Topics for Further Study 93

### **CHAPTER 5. Fish–Seaweed Interactions on Coral Reefs: Effects of Herbivorous Fishes and Adaptations of Their Prey**

Mark E. Hay

- I. Introduction 96
- II. Refuges in Space or Time 98
- III. Seaweed Characteristics That Deter Feeding by Reef Fishes 103
- IV. Tolerance of Herbivory 117
- V. Summary 118

### **CHAPTER 6. The Biology of Herbivorous Fishes on Coral Reefs**

J. H. Choat

- I. Introduction 120
- II. Significance of Previous Studies 122
- III. General Features of Herbivorous Fishes and Their Resources 124
- IV. Summary 132
- V. Review Topics 133
- VI. Discussion 153

## **CHAPTER 7. Fish Predation and Its Impact on the Invertebrates of Coral Reefs and Adjacent Sediments**

G. P. Jones, D. J. Ferrell, and P. F. Sale

- I. Introduction 156
- II. Patterns in Carnivore Diets and Feeding Selectivity 159
- III. Patterns in Carnivore Abundance and Foraging 163
- IV. Impact on Coral Reef Invertebrate Assemblages 168
- V. Impact on Soft-Sediment Assemblages 172
- VI. Critique of Methodologies Employed to Assess Impacts 176
- VII. Fish Predation as Functional Explanation of Prey Characteristics 177
- VIII. Conclusions 178

## **PART III LARVAL AND JUVENILE ECOLOGY**

### **CHAPTER 8. The Pelagic Stage of Reef Fishes: The Larval Biology of Coral Reef Fishes**

Jeffrey M. Leis

- I. Introduction 183
- II. Larval Fish Morphology and Identification 186
- III. Where Are the Pelagic Stages of Reef Fishes? 189
- IV. What Are Reef Fishes Doing while Pelagic? 210
- V. The End of the Pelagic Stage 217
- VI. Why a Pelagic Stage? 223
- VII. Use of Larvae in Zoogeographic Analyses 224
- VIII. Conclusions 227

### **CHAPTER 9. Settlement Strategies and Biogeography of Reef Fishes**

Benjamin C. Victor

- I. Introduction 231
- II. Settlement Strategies of Reef Fishes 232
- III. Planktonic Larval Duration and Biogeography 247
- IV. Daily Otolith Increments and Early Life History Studies 252

## **CHAPTER 10. Spatial and Temporal Patterns in Recruitment**

Peter J. Doherty

- I. Introduction to Nonequilibrium Systems 261**
- II. Why Study Recruitment? 266**
- III. Methods 267**
- IV. Spatial and Temporal Patterns in Recruitment 271**
- V. Synthesis 288**
- VI. Future Directions 291**
- Addendum 292**

## **CHAPTER 11. Postrecruitment Processes in the Ecology of Coral Reef Fish Populations: A Multifactorial Perspective**

G. P. Jones

- I. Introduction 294**
- II. Patterns in the Postrecruitment Phase 298**
- III. Evidence for Recruitment Modification 300**
- IV. Demographic Parameters 303**
- V. Ecological Processes 308**
- VI. Multiple Causality and Ecological Importance 324**
- VII. Looking to the Future 327**

# **PART IV REPRODUCTIVE AND LIFE HISTORY PATTERNS**

## **CHAPTER 12. Intraspecific Variability in Social Systems of Coral Reef Fishes**

Douglas Y. Shapiro

- I. Introduction 331**
- II. Types of Variation within Social Systems 333**
- III. Settlement Models for Individual and Group Spacing and Their Application to Social System Variation 344**
- IV. Conclusions 353**

**CHAPTER 13. The Role of Adult Biology in the Timing of Spawning of Tropical Reef Fishes**

D. Ross Robertson

- I. Introduction 356
- II. Diel Spawning Patterns 357
- III. Lunar Spawning Patterns 364
- IV. Seasonal Spawning Patterns 370

**CHAPTER 14. The Use of Phenotypic Plasticity in Coral Reef Fishes as Tests of Theory in Evolutionary Ecology**

Robert R. Warner

- I. Introduction 387
- II. Examples of Intraspecific Variability 389
- III. Discussion 396

**PART V COMMUNITY ORGANIZATION****CHAPTER 15. Geographic Variability in the Ecology of Coral Reef Fishes: Evidence, Evolution, and Possible Implications**

R. E. Thresher

- I. Introduction 401
- II. Previous Geographic Comparisons of Reef Fish Assemblages 402
- III. An Analysis of Interoceanic and Regional Variation in Assemblage Structure 405
- IV. Life History Features and the Evolution of Geographic Variation in Indo-Pacific Reef Fish Communities 417
- V. Ecological Consequences of Regional Variation in Assemblage Structure 426
- VI. Summary, Conclusions, and Even More Unsubstantiated Speculations 433

**CHAPTER 16. Patterns and Processes in the  
Distribution of Coral Reef Fishes**

David McB. Williams

- I. Introduction 437**
- II. Patterns 439**
- III. Processes 463**
- IV. Conclusions 473**

**CHAPTER 17. Predation as a Process Structuring  
Coral Reef Fish Communities**

Mark A. Hixon

- I. Introduction 475**
- II. Circumstantial Evidence 477**
- III. Correlative Evidence 485**
- IV. Experimental Evidence 493**
- V. Synthesis 500**

**CHAPTER 18. Tropical and Temperate Reef Fishes:  
Comparison of Community Structures**

Alfred W. Ebeling and Mark A. Hixon

- I. Introduction 509**
- II. Comparison of Environments 510**
- III. Environment-Induced Sampling Constraints and  
Bias 522**
- IV. Description of Community Structure 526**
- V. Regulation of Community Structure 537**
- VI. Future Research 561**

**CHAPTER 19. Reef Fish Communities: Open  
Nonequilibrium Systems**

Peter F. Sale

- I. Introduction 564**
- II. Difficulty in Evaluating Current Data 567**
- III. Survey of the Data: Patterns 574**
- IV. Survey of the Data: Processes 585**
- V. Conclusions 596**

## **PART VI FISHERIES AND MANAGEMENT**

### **CHAPTER 20. Coral Reef Fisheries: Effects and Yields**

Garry R. Russ

- I. Introduction 601**
- II. Basic Concepts of Stock Assessment and Effects of  
Fishing on Stocks 602**
- III. Effects of Fishing on Coral Reef Fishes 605**
- IV. Some Comments on Yields of Fishes from Coral  
Reefs 631**
- V. Conclusions and Recommendations for Future  
Research 634**
